GENERAL INFORMATION

Fidelity UCITS II ICAV (the "Fund") was registered in Ireland pursuant to the Irish Collective Asset-management Vehicles Act 2015 (as amended) on 14 November 2017 under registration number C174793 and is authorised by the Central Bank of Ireland (the "Central Bank") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations").

Except where the context otherwise requires, defined terms shall bear the meaning given to them in the Prospectus of the Fund.

The Fund is organised in the form of an umbrella fund with segregated liability between sub-funds. The Prospectus provides that the Fund may offer separate sub-funds. Each sub-fund will have a distinct schedule of investments. Currently, there are 28 Sub-Funds under the umbrella. Of these 28 sub-funds, 10 Sub-Funds have 31 December year end and 18 Sub-Funds have 31 January year end. These 31 January year end financial statements are prepared for the below 16 Sub-Funds which were launched as of the financial year end (each, a "Sub-Fund" and, collectively, the "Sub-Funds").

There are two other Sub-Funds of the umbrella with 31 January year end (Fidelity MSCI Eurozone Index Fund and Fidelity MSCI UK Index Fund) that have been approved by the Central Bank of Ireland, but they have not been launched as at the financial year end.

With the prior approval of the Central Bank, the Fund from time to time may create an additional Sub-Fund or Sub-Funds, the investment policies and objectives for which will be outlined in a Relevant Supplement, together with details of the initial offer period, the initial subscription price for each Share and such other relevant information in relation to the additional Sub-Fund or Sub-Funds as the Directors may deem appropriate, or the Central Bank requires, to be included. Each Relevant Supplement will form part of, and should be read in conjunction with, the Prospectus.

GENERAL INFORMATION

In addition, the Fund may create additional Classes of Shares within a Sub-Fund to accommodate different terms, including different charges and/or fees and/or brokerage arrangements provided that the Central Bank is notified in advance, and gives prior clearance, of the creation of any such additional Class of Shares.

The most recent Prospectus of the Fund and Supplements for the Sub-Funds are dated 18 February 2025.

Fidelity Enhanced Reserve and Fidelity Global Credit ex-US Fund are Actively Managed Sub-Funds.

Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD EM Bond UCITS ETF, Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD High Yield Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD High Yield Bond Paris-Aligned Multifactor UCITS ETF and Fidelity Sustainable EUR High Yield Bond Paris-Aligned Multifactor UCITS ETF are Actively Managed Sub-Funds and Shares in these Sub-Funds may be designated as ETF Shares or Non-ETF Shares.

The following Sub-Funds are the launched Index Tracking Sub-Funds: Fidelity MSCI Emerging Markets Index Fund, Fidelity MSCI Europe Index Fund, Fidelity MSCI Japan Index Fund, Fidelity MSCI Pacific ex-Japan Index Fund, Fidelity MSCI World Index Fund, Fidelity S&P 500 Index Fund and Fidelity Global Government Bond Climate Aware UCITS ETF. Shares in the Fidelity Global Government Bond Climate Aware UCITS ETF may be designated as ETF Shares or Non-ETF Shares. The benchmark indices for the Index Tracking Sub-Funds launched as at the year end are listed below:

Sub-Fund	Index
Fidelity MSCI Emerging Markets Index Fund	MSCI Emerging Markets Index
Fidelity MSCI Europe Index Fund	MSCI Europe Index
Fidelity MSCI Japan Index Fund	MSCI Japan Index
Fidelity MSCI Pacific ex-Japan Index Fund	MSCI Pacific ex-Japan Index
Fidelity MSCI World Index Fund	MSCI World Index
Fidelity S&P 500 Index Fund	S&P 500 Index
Fidelity Global Government Bond Climate Aware UCITS ETF	Solactive Paris Aware Global Government USD Index

The investment objective of the Index Tracking Sub-Funds is to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the relevant index (each, an "Index").

The investment objective of the Fidelity Enhanced Reserve Fund is to provide an attractive level of risk adjusted total return (income plus capital appreciation) from a portfolio of debt securities issued worldwide.

The investment objective of the Fidelity Global Credit ex-US Fund is to seek to deliver long-term total returns.

The investment objective of the Fidelity Sustainable USD EM Bond UCITS ETF is to achieve income and capital growth.

The investment objective of the Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable EUR Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD High Yield Bond Paris-Aligned Multifactor UCITS ETF and Fidelity Sustainable EUR High Yield Bond Paris-Aligned Multifactor UCITS ETF is to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve income and capital growth.

Fidelity MSCI Emerging Markets Index Fund

The MSCI Emerging Markets Index is designed to reflect the performance of large and mid-capitalisation companies across emerging market countries which comply with MSCI's size, liquidity and free float criteria. These criteria are designed to identify those companies whose securities make up 85% of the publically traded market (i.e., the large and mid-capitalisation companies). Full details of the criteria are available on the Index provider's website at https://www.msci.com/index-methodology.

The investment objective of the Sub-Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

In order to seek to achieve this investment objective, Geode Capital Management LLC (the "Investment Manager") will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably practical (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Sub-Fund will use optimisation to select the Index securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

Fidelity MSCI Emerging Markets Index Fund (continued)

The following are the active Share Classes in the Sub-Fund as at 31 January 2025:

Share Class	Share Class Launch Date	Currency
P EUR Acc	20 March 2018	EUR
P USD Acc	20 March 2018	USD
P PLN Acc	27 February 2019	PLN

Fidelity MSCI Europe Index Fund

The MSCI Europe Index is designed to reflect the performance of large and mid-capitalisation companies across developed market countries in Europe which comply with MSCI's size, liquidity and free float criteria. These criteria are designed to identify those companies whose securities make up 85% of the publically traded market (i.e., the large and mid-capitalisation companies). Full details of the criteria are available on the Index provider's website at https://www.msci.com/index-methodology.

The investment objective of the Sub-Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

In order to seek to achieve this investment objective, the Investment Manager will aim to replicate the Index by holding all of the index securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably practical (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Sub-Fund will use optimisation to select the Index securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

The following are the active Share Classes in the Sub-Fund as at 31 January 2025:

Share Class	Share Class Launch Date	Currency

P PLN Acc	27 February 2019	PLN
P PLN Hedged Acc	25 November 2019	PLN

Fidelity MSCI Japan Index Fund

The MSCI Japan Index is designed to reflect the performance of large and mid-capitalisation companies in Japan which comply with MSCI's size, liquidity and free float criteria. These criteria are designed to identify those companies whose securities make up 85% of the publically traded market (i.e., the large and mid-capitalisation companies). Full details of the criteria are available on the Index provider's website at https://www.msci.com/index-methodology.

The investment objective of the Sub-Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

In order to seek to achieve this investment objective, the Investment Manager will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably practical (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Sub-Fund will use optimisation to select the Index securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

P EUR Hedged Acc	20 March 2018	EUR
P GBP Hedged Acc	21 June 2018	GBP
P PLN Acc	27 February 2019	PLN

Fidelity MSCI Pacific ex-Japan Index Fund

The MSCI Pacific ex-Japan Index is designed to reflect the performance of large and mid-capitalisation companies across developed market countries in the Pacific region excluding Japan which comply with MSCI's size, liquidity and free float criteria. These criteria are designed to identify those companies whose securities make up 85% of the publically traded market (i.e., the large and mid-capitalisation companies). Full details of the criteria are available on the Index provider's website at https://www.msci.com/index-methodology.

The investment objective of the Sub-Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

In order to seek to achieve this investment objective, the Investment Manager will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably practical (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Sub-Fund will use optimisation to select the Index securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

Share Class	Share Class Launch Date	Currency
P USD Acc	20 March 2018	USD
P GBP Hedged Acc	21 June 2018	GBP
P PLN Acc	27 February 2019	PLN

Fidelity MSCI World Index Fund

The MSCI World Index is designed to reflect the performance of large and mid-capitalisation companies across developed market countries which comply with MSCI's size, liquidity and free float criteria. These criteria are designed to identify those companies whose securities make up 85% of the publically traded market (i.e., the large and mid-capitalisation companies). Full details of the criteria are available on the Index provider's website at https://www.msci.com/index-methodology.

The investment objective of the Sub-Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

In order to seek to achieve this investment objective, the Investment Manager will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably practical (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Sub-Fund will use optimisation to select the Index securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

The following are the active Share Classes in the Sub-Fund as at 31 January 2025:

Share Class	Share Class Launch Date	Currency

P CZK Hedged Acc	14 January 2019	CZK
P PLN Acc	27 February 2019	PLN

Fidelity S&P 500 Index Fund

The S&P 500 Index measures the performance of 500 stocks from top US companies in leading industries of the US economy which comply with S&P's size, liquidity and free-float criteria. These criteria are designed to identify those companies whose securities make up 85% of the publically traded market (i.e., the large and mid-capitalisation companies). Full details of the criteria are available on the Index provider's website at http://us.spindices.com/indices/equity/sp-500.

The investment objective of the Sub-Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

Fidelity S&P 500 Index Fund (continued)

In order to seek to achieve this investment objective, the Investment Manager will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably practical (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Sub-Fund will use optimisation to select the Index securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

The following are the active Share Classes in the Sub-Fund as at 31 January 2025:

Share Class	Share Class Launch Date	Currency
P EUR Acc	20 March 2018	EUR
P USD Acc	20 March 2018	USD
P EUR Hedged Acc	20 March 2018	EUR
P GBP Hedged Acc	20 March 2018	GBP
P PLN Acc	27 February 2019	PLN
P PLN Hedged Acc	25 November 2019	PLN

Fidelity Enhanced Reserve Fund

The investment policy of the Sub-Fund is to invest primarily in a broad range of fixed income securities and money market instruments which are issued by governments, government agencies or corporate issuers worldwide. The Sub-Fund may invest in such securities issued in both developed and emerging market countries.

FIL Investment Management (Hong Kong) Limited (The "Investment Manager") will not focus on any particular market sector or industry and investments may be in a number of sectors, including the financial services, industrials, and technology sectors. The Investment Manager will approach investment opportunities from a total return perspective, benefiting not only from the debt securities' regular coupon payments but also from capital appreciation. The Investment Manager will seek to deliver attractive risk adjusted returns by extracting the highest level of return per unit of risk or minimising the risk for each unit of return.

Fidelity Global Credit ex-US Fund

The investment policy of the Sub-Fund is to invest primarily in a diversified portfolio of U.S. and non-U.S. dollar denominated instruments (which may be either fixed or floating and government or corporate). The Sub-Fund will seek to generate returns that, over time, exceed the Bloomberg-Barclays Global Aggregate Credit Ex U.S. Index Hedged (USD) (the "Benchmark"). The Benchmark is a market value weighted index of global ex-U.S. investment grade credit markets, including corporate bonds and government related bonds, hedged in USD.

The Sub-Fund's portfolio is not constrained by reference to any index; the Sub-Fund will be actively managed and the Sub-Sub-Investment Manager may use its discretion to invest in instruments which are not included in the Benchmark. In managing the Sub-Fund, the Sub-Sub-Investment Manager may seek to closely match the currency exposures of the Benchmark. However, as the Sub-Fund will be actively managed, there are instances in which the currency exposure of the Sub-Fund will differ from the currency exposure of the Benchmark.

The following is the active Share Class in the Sub-Fund as at 31 January 2025:

Share Class	Share Class Launch Date	Currency
X-ACC USD	2 March 2020	USD

Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF

The Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF aims to achieve its investment objective on an active basis by investing in a portfolio primarily made up of investment grade corporate debt securities of issuers globally. The reduction of carbon emission objective of the Sub-Fund will be aligned with the Solactive Paris Aligned Global Corporate USD Index (the "Benchmark").

The Benchmark tracks the performance of investment grade corporate debt securities publicly issued globally while at the same time aiming to align with the Paris Agreement's climate targets on greenhouse gas emission reduction (the "EU PAB Emission Reduction Requirements"). The EU PAB Emission Reduction Requirements require the Benchmark to exhibit a level of emission intensity 50% lower than an equivalent global market universe (which does not integrate alignment with the Paris Agreement) at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. As a result of complying with the EU PAB Emission Reduction Requirements and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark will be labelled as an EU Paris Aligned Benchmark. In addition, the Benchmark excludes issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms (such as United Nations Global Compact (UNGC) principles) and with a significant negative impact on certain sustainable development goals. Such exclusions ensure that the securities in the Benchmark and their issuers do not significantly harm sustainable objectives pursuant to the SFDR. Finally, the governance practices of issuers are assessed as part of the Benchmark construction process with the exclusion of companies with verified failure to respect established norms such as the UNGC principles, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises or UN Guiding Principles for Business and Human Rights. Such exclusions ensure that the issuers of securities in the Benchmark follow good governance principles pursuant to the SFDR. Further details regarding the Benchmark are available on the index provider's website at www.solactive.com/indices.

As a result of its aim of outperformance, the Sub-Fund will likely bear a close resemblance to the Benchmark and the risk characteristics (e.g. level of volatility) and carbon footprint of the Sub-Fund's portfolio will be broadly similar to that of the Benchmark, but the Sub-Fund will be actively managed and will not attempt to replicate the Benchmark. Rather, the Investment Manager may overweight the securities which it considers have the highest potential to outperform the Benchmark and underweight or not invest at all in securities which the Investment Manager considers most overvalued. The Sub-Fund may also invest in securities which do not form part of the Benchmark in the following circumstances: 1) instruments that were previously constituents of the Benchmark may be held for a transition period after they fall out of the Benchmark in a manner appropriate to protect the best interests of Shareholders and will then be divested; and 2) for liquidity management purposes where inflows and liquidity levels require holdings in certain instruments that are not constituents of the Benchmark.

Fidelity Sustainable USD EM Bond UCITS ETF

The Fidelity Sustainable USD EM Bond UCITS ETF aims to achieve its investment objective on an active basis by investing in a portfolio primarily made up of debt securities issued by governments and government agencies of emerging market countries denominated in USD.

The Sub-Fund will hold a portfolio of securities which is systematically selected and managed with the aim of outperforming the JP Morgan ESG EMBI Global Diversified Index (the "Benchmark").

The Sub-Fund will only invest in securities which are part of the Benchmark and the Benchmark is therefore the potential universe of securities. Securities are then screened using the Investment Manager's fundamental research and its own ESG assessment. The resulting securities are then weighted with a view to delivering positive returns relative to the Benchmark and to improving the portfolio's overall ESG score.

Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF

The Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF aims to achieve its investment objective on an active basis by investing in a portfolio primarily made up of high-yielding, sub-investment grade corporate debt securities of issuers globally. The reduction of carbon emission objective of the Sub-Fund will be aligned with the Solactive Paris Aligned Global Corporate High Yield USD Index (the "Benchmark").

The Benchmark tracks the performance of high yield, sub-investment grade corporate debt securities publicly issued globally while at the same time aiming to align with the Paris Agreement's climate targets on greenhouse gas emission reduction (the "EU PAB Emission Reduction Requirements"). The EU PAB Emission Reduction Requirements require the Benchmark to exhibit a level of emission intensity 50% lower than an equivalent global market universe (which does not integrate alignment with the Paris Agreement) at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. As a result of complying with the EU PAB Emission Reduction Requirements and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark will be labelled as an EU Paris Aligned Benchmark. In addition, the Benchmark excludes issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms (such as United Nations Global Compact (UNGC) principles) and with a significant negative impact on certain sustainable development goals. Such exclusions ensure that the securities in the Benchmark and their issuers do not significantly harm sustainable objectives pursuant to the SFDR. Finally, the governance practices of issuers are assessed as part of the Benchmark construction process with the exclusion of companies with verified failure to respect established norms such as the UNGC principles, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises or UN Guiding Principles for Business and Human Rights. Such exclusions ensure that the issuers of securities in the Benchmark follow good governance principles pursuant to the SFDR. Further details regarding the Benchmark are available on the index provider's website at www.solactive.com/indices.

Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF (continued)

As a result of its aim of outperformance, the Sub-Fund will likely bear a close resemblance to the Benchmark and the risk characteristics (e.g. level of volatility) and carbon footprint of the Sub-Fund's portfolio will be broadly similar to that of the Benchmark, but the Sub-Fund will be actively managed and will not attempt to replicate the Benchmark. Rather, the Investment Manager may overweight the securities which it considers have the highest potential to outperform the Benchmark and underweight or not invest at all in securities which the Investment Manager considers most overvalued. Fidelity Global Government Bond Climate Aware UCITS ETF

The investment policy of the Fidelity Global Government Bond Climate Aware UCITS ETF is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index. Given the Index aims to achieve a reduction in carbon emission intensity, the Sub-Fund therefore promotes an environmental characteristic and is subject to the disclosure requirements of article 8 of the SFDR.

In order to seek to achieve this investment objective, the Investment Manager will aim to replicate the Index by holding all of the Index Securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably practical (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Sub-Fund will use optimisation to select Index Securities in order to build a representative portfolio that provides a return that is comparable to that of the Index. Consequently, the Sub-Fund may over certain periods only hold a certain sub-set of the Index Securities. Further information on the use of optimization methodology can be found under "Index Tracking Sub-Funds" in the "Investment Objectives and Policies" section of the Prospectus. The Sub-Fund may hold some securities which are not constituents of the Index, where such securities provide similar exposure (with similar risk profiles) to certain securities that make up the Index. These securities, which are not constituents of the Index, are selected by virtue of the fact that they provide substantively the same exposure by industry and by company characteristics in the case of liquidity considerations or corporate actions to certain Index Securities.

The Sub-Fund may achieve exposure to China by investing in eligible bonds traded on the China Interbank Bond Market ("CIBM") through Bond Connect

The investment objective and investment policy description listed for the Sub-Fund applies to all Share Classes offered in the Sub-Fund. For Currency Hedged Share Classes, the return will be hedged to the base currency of the relevant Share Class. Currency Hedged Share Classes aim to reduce the impact of exchange rate fluctuations between the underlying portfolio currency exposures of the Sub-Fund and the Share Class Currency of the Currency Hedged Share Class on returns of the relevant Index to investors in that Currency Hedged Share Class, through entering into forward foreign exchange contracts for currency hedging. The Currency Hedged Share Classes will implement currency hedging in accordance with the "Currency Hedging at Portfolio Level" section of the Prospectus.

The Sub-Fund launched on 15 March 2023.

The following are the active Share Classes in the Sub-Fund as at 31 January 2025:

Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF

The Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF aims to achieve its investment objective on an active basis by investing in a portfolio primarily made up of USD denominated investment grade corporate debt securities of issuers globally. The reduction of carbon emission objective of the Sub-Fund will be aligned with the Solactive USD Corporate IG PAB Index (the "Benchmark").

The Benchmark tracks the performance of investment grade USD denominated corporate debt securities publicly issued globally while at the same time aiming to align with the Paris Agreement's climate targets on greenhouse gas emission reduction (the "EU PAB Emission Reduction Requirements"). The EU PAB Emission Reduction Requirements require the Benchmark to exhibit a level of emission intensity 50% lower than an equivalent USD denominated global market universe (which does not integrate alignment with the Paris Agreement) at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. As a result of complying with the EU PAB Emission Reduction Requirements and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark will be labelled as an EU Paris Aligned Benchmark. In addition, the Benchmark excludes issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms (such as United Nations Global Compact (UNGC) principles) and with a significant negative impact on certain sustainable development goals. Such exclusions ensure that the securities in the Benchmark and their issuers do not significantly harm sustainable objectives pursuant to the SFDR. Finally, the governance practices of issuers are assessed as part of the Benchmark construction process with the exclusion of companies with verified failure to respect established norms such as the UNGC principles, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises or UN Guiding Principles for Business and Human Rights. Such exclusions ensure that the issuers of securities in the Benchmark follow good governance principles pursuant to the SFDR. Further details regarding the Benchmark are available on the index provider's website at www.solactive.com/indices.

As a result of its aim of outperformance, the Sub-Fund will likely bear a close resemblance to the Benchmark and the risk characteristics (e.g. level of volatility) and carbon footprint of the Sub-Fund's portfolio will be broadly similar to that of the Benchmark, but the Sub-Fund will be actively managed and will not attempt to replicate the Benchmark. Rather, the Investment Manager may overweight the securities which it considers have the highest potential to outperform the Benchmark and underweight or not invest at all in securities which the Investment Manager considers most overvalued. INVESTMENT MANAGER'S REPORT

Fidelity MSCI Emerging Markets Index Fund

The MSCI Emerging Markets Index ("Index") was up +14.75% for the 1-year period ending 31 January 2025. The Fidelity MSCI Emerging Markets Index Fund ("Sub-Fund") return was ahead of the index by 17 basis points returning +14.92% (gross of fees). The Sub-Fund is managed on a risk-controlled basis and is constructed to approximate the exposure to its mandated benchmark. Expected sources of performance variance include the impact of security selection from the portfolio optimization employed, trading costs associated with index rebalances, and tax differences between the Sub-Fund and the Index.

Twenty of the twenty-eight countries within the Index had positive returns. China contributed the most to the return during the period (+35.29%) followed by Taiwan (+41.24%). South Korea (-9.24%) was the largest laggard during the period.

The Sub-Fund seeks to track benchmark returns by replicating the constituents and characteristics of the Index, investing dividend income, and implementing trading strategies for index events with the most cost effective means available. As a result, the Sub-Fund is expected to perform in line with its benchmark.

Please see table in Appendix 3 - Tracking Error section on page 365.

February 2025

Geode Capital Management LLC

Fidelity MSCI Europe Index Fund

The MSCI Europe Index ("Index") rose +13.82% for the 1-year period ending 31 January 2025. The Fidelity MSCI Europe Index Fund ("Sub-Fund") outperformed the Index by 38 basis points, up +14.20% (gross of fees). The Sub-Fund is managed on a risk-controlled basis and is constructed to closely replicate its mandated benchmark. Expected sources of performance variance include the impact of security selection from the portfolio optimization employed, use of futures contracts to keep fully equitized, and tax differences between the Sub-Fund and the Index. (returns in Euro)

Thirteen of the fifteen countries within the Index had positive returns. The United Kingdom (+19.88%) and Germany (+28.12%) were the top two positive contributors. Denmark (-14.39%) and Portugal (-14.14%) were the only negative contributors to the index return.

The Sub-Fund seeks to track benchmark returns by replicating the constituents and characteristics of the Index, investing dividend income, and implementing trading strategies for index events with the most cost effective means available. As a result, the Sub-Fund is expected to perform closely to its benchmark.

Please see table in Appendix 3 - Tracking Error section on page 365.

February 2025

Geode Capital Management LLC

Fidelity MSCI Japan Index Fund

The MSCI Japan Index ("Index") gained +5.15 for the 1-year period ending 31 January 2025. The Fidelity MSCI Japan Index Fund ("Sub-Fund") return was 6 basis points ahead of its index, up +5.21% (gross of fees). The Sub-Fund is managed on a risk-controlled basis and is constructed to closely replicate its mandated benchmark. Expected sources of performance variance include the impact of security selection from the portfolio optimization employed and withholding tax differences between the Sub-Fund and the Index.

Five of the eleven sectors within the Index had positive returns. Financials contributed the most to the return, up (+33.45%), followed by Industrials, which gained (+8.60%). Materials (-13.13%) and Consumer Staples (-5.75%) contributed the most on the down side.

The Sub-Fund seeks to track benchmark returns by replicating the constituents and characteristics of the Index, investing dividend income, and implementing trading strategies for index events with the most cost effective means available. As a result, the Sub-Fund is expected to perform closely to its benchmark.

Please see table in Appendix 3 - Tracking Error section on page 365.

February 2025

Geode Capital Management LLC

Fidelity MSCI Pacific ex-Japan Index Fund

The MSCI Pacific ex Japan Index ("Index") rose +12.24 for the 1-year period ending 31 January 2025. The Fidelity MSCI Pacific ex-Japan Index Fund ("Sub-Fund") returned in line with its index, also up +12.24% (gross of fees). The Sub-Fund is managed on a risk-controlled basis and is constructed to closely replicate its mandated benchmark. Expected sources of performance variance include the impact of security selection from the portfolio optimization employed, the use of futures contracts to maintain full exposure, and withholding tax differences between the Sub-Fund and the Index.

Seven of the eleven sectors within the Index had positive returns. Financials contributed the most to the return and was up (+26.58%), followed by Communication Services which gained (+55.07%). Materials and Energy contributed the most on the downside for the period dropping (-16.21%), and (-19.08%) respectively.

The Sub-Fund seeks to track benchmark returns by replicating the constituents and characteristics of the Index, investing dividend income, and implementing trading strategies for index events with the most cost effective means available. As a result, the Sub-Fund is expected to perform closely to its benchmark.

Please see table in Appendix 3 - Tracking Error section on page 365.

February 2025

Geode Capital Management LLC

Fidelity MSCI World Index Fund

The MSCI World Index ("Index") gained +21.44% for the 1-year period ending 31 January 2025. The Fidelity MSCI World Index Fund ("Sub-Fund") underperformed the Index by 3 basis points rising +21.41% (gross of fees). The Sub-Fund is managed on a risk-controlled basis and is constructed to closely replicate its mandated benchmark. Expected sources of performance variance include the impact of security selection from the portfolio optimization employed and withholding tax differences between the Sub-Fund and the Index.

All of the eleven sectors within the Index had positive returns for the year. The top contributors to performance included Information Technology and Financials, they rose +25.92% and +33.85% respectively.

The Sub-Fund seeks to track benchmark returns by replicating the constituents and characteristics of the Index, investing dividend income, and implementing trading strategies for index events with the most cost effective means available. As a result, the Sub-Fund is expected to perform closely to its benchmark.

Please see table in Appendix 3 - Tracking Error section on page 365.

February 2025

Geode Capital Management LLC

Fidelity S&P 500 Index Fund

The S&P 500 Index ("Index") gained +25.86% for the 1-year period ending 31 January 2025. The Fidelity S&P 500 Index Fund ("Sub-Fund") outperformed the Index by three basis points up +25.89% (gross of fees). The Sub-Fund is managed on a risk-controlled basis and is constructed to closely replicate its mandated benchmark. Expected sources of performance variance include the impact of trading costs and withholding tax differences between the Sub-Fund and the Index.

All twelve sectors within the Index had positive returns. Materials contributed the most to performance up +27.60% followed by Health Care which rose +35.01%.

The Sub-Fund seeks to track benchmark returns by replicating the constituents and characteristics of the Index, investing dividend income, and implementing trading strategies for index events with the most cost effective means available. As a result, the Sub-Fund is expected to perform closely to its benchmark.

Please see table in Appendix 3 - Tracking Error section on page 365.

Fidelity Enhanced Reserve Fund

Market Commentary

Credit spreads in Asia across both investment grade (IG) and high yield (HY) have continued to compress owing to relatively stable fundamentals, generally resilient Asian economies, along with supportive technicals as new issuances remained relatively light during the year. US IG and HY also posted positive returns in 2024, primarily driven by carry and tighter credit spreads on the back of a resilient US economy. On the rates front, US performed negatively as the yield curve twist steepened, with the front-end (1Y and below) falling by 60 to 113 bps, while the rest of the curve (5Y to 30Y) rose by 54 to 75 bps. Overall, the US Treasury curve experienced enhanced volatility in 2024. For context, UST 10-year yields started the year on an uptrend and peaked in April at 4.7% on the back of a stronger-than-expected US economy. Following which, UST yields retreated from May to September, reaching lows of 3.6% on the UST 10Y, driven by softer-than-expected US economic data and expectation of a Federal Reserve (Fed) pivot that was delivered in September. Since then, US yields have trended upwards due to a resilient US economy, supported by increased inflation expectations on the back of more aggressive fiscal and trade policies from the incoming Trump Administration. As such, UST 10-year yields closed the year at 4.57% (+69 bps compared to the start of the year), despite the Fed cutting the Fed Fund Rates by 100 bps between September and December. More recently, during the January 2025 (Federal Open Market Committee) FOMC meeting, the US Fed kept interest rate unchanged and signaled that further decision will be data dependent, while the Trump administration imposed 10% tariffs on all the goods imported from China to US compared to expectations of 50-60%. On the economic front, US CPI print cooled off to 2.9% in December 2024 compared to 3.4% in December 2023, while the core Personal Consumption Expenditure price index declined to 2.8% in December 2024 versus 3.0% in December 2023. Unemployment rate moderated at ~4.2%, towards levels not seen since October 2021. Nonetheless overall economic data remains relatively strong in the US which has supported continued spread tightening year-to-date.

In Asia, the macroeconomic backdrop remains resilient, whilst the potential implementation of higher tariffs announced by the incoming Trump administration posts uncertainties for export centric economies. Nonetheless, China's economy remains resilient on the back stimulus and policy easing measures announced by policymakers throughout the year with credit markets remaining well anchored by supportive technical and robust domestic demand particularly for onshore bonds. Economic data in China broadly remained strong, as China's GDP grew by 5.4% year-on-year in the fourth quarter of 2024, marking the fastest pace in 1.5 years. This growth was driven by a series of stimulus measures introduced since September. For the full year 2024, the economy expanded by 5%, meeting the official target of around 5% but slowing from the 5.2% growth achieved in 2023. China's Manufacturing Purchasing Managers Index (PMI) came in flat at ~49.1 during the period January 2024 and January 2025, while non-manufacturing PMI declined to 50.2 in January 2025 versus 50.7 at the end of January 2024. Total social financing, a broad measure of credit and liquidity, came in stronger-than-expected at to CNY 2.8 trillion in December 2024 compared to CNY 1.9 trillion in December 2023.

Outside of China, manufacturing PMI readings broadly remained in expansionary territory in the Asia region, although some economies including South Korea and Taiwan shown a decline and remained in contractionary territory in December 2024 compared to readings in December 2023. Notably, the Central Bank of Japan (BoJ) ended its negative interest rate policy and delivered a rate hike recently in July 2024, while Bank of Indonesia cut its interest rate by 50-bps (25 bps each in September 2024 and January 2025), and Bank of South Korea cut benchmark interest rate by 50-bps during the year 2024 to support economic growth in the country amid ongoing internal political tensions.

Portfolio Performance Commentary

The Sub-Fund posted a gross return of +6.51% during the period (February 2024 - January 2024). Stable yield, including carry and coupon income, as well as credit and term structure contributed positively to absolute returns. Over the year we have been actively managing duration, increasing it from 0.8 to 1.3 years in April, and more recently taking some USD duration down as the outcome of the US elections became clearer. From a credit spread perspective, Asia broadly tightened in 2024 across IG and HY, supported by limited new issuances and resilient fundamentals. The main contributors at a sector level were from banks & brokers, quasi-sovereigns, and Treasuries. At a country level, exposure to the US, China and Hong Kong contributed the most to performance, while there were no detractors on both a sector and country level.

At an issuer level, the Sub-Fund's exposure to U.S. Treasury Bills contributed most to absolute performance, due to pull-to-par and the stability of these short-dated Treasuries amid persistent market volatility. The allocation to Nanyang Commercial Bank was also a positive credit contributor as quality financials performed well over the period. The Sub-Fund's exposure to Monetary Authority of Singapore Bill also contributed to performance, providing an attractive yield pick-up versus U.S. Treasuries after being hedged back to USD.

There were no notable credit detractors at an issuer level for the period with the only detractor being China Oil & Gas Group at less than -1 bps impact to the portfolio.

Fidelity Enhanced Reserve Fund (continued)

Outlook and Positioning

Fidelity Enhanced Reserve is a global bond strategy that prioritizes liquidity as an investment objective, followed by stability and yield. The strategy focuses on higher quality, shorter-dated securities, predominantly investing in USD and selective local currency assets.

There continue to be good opportunities for clients looking to preserve liquidity and keep volatility controlled, while generating higher returns than traditional Fixed Deposits and Money Market Funds. Structurally, the Sub-Fund provides a great option for clients who want to better optimize a part of their liquidity option.

From an interest rate perspective, the path for US rates and inflation have become more uncertain, and there are good reasons why investors should exercise some caution when expressing duration views. Our ultra-short duration strategy protects investors against high interest rate volatility, without incurring the large reinvestment risks associated with Fixed Deposits and Money Market Funds.

Overall, while credit spreads are historically expensive, all-in yields remain high, coupled with generally strong fundamentals and technicals to support valuations.

The portfolio positioning currently reflects our view of the market and we continue to monitor market developments with a focus on actively and tactically managing duration, maintaining a quality bias, opportunistically adding to carry, and ensuring that the portfolio is adequately diversified.

Actively and tactically managing duration. The duration band for FERF stands at \sim 0.5 to 1.5 years. While the US is in the early stages of the easing cycle, there is a lot of uncertainty around the path of normalization, with large spikes in interest rate volatility. As such, we continue to actively respond when the market overshoots as it has over the last few years. In this environment, we want to tactically move around that volatility. To illustrate, we have decisively increased duration from 0.8 to 1.3 years as Treasuries were selling off harshly in April 2024 and reduced US duration as interest rates were rallying in Q2-Q3 2024. More recently, we have reduced US duration before the US election and further reduced on election day as some data was coming in, but no critical states were yet called.

Maintain a quality bias by favoring the higher quality IG cohort while remaining selective within the HY bucket, focusing on the more liquid BB and crossover segment. Moreover, relative value between IG and HY has compressed. As such, we are comfortable with our HY exposures at the lower end of the historical range. We hold around 5-6% in HY in recent months which is relatively low compared to our historical range. However, we do not expect spreads to stay tight indefinitely and will opportunistically add risk as valuations become attractive.

Opportunistically adding to carry by adjusting our exposure to local currency bonds to take advantage of attractive hedged USD yields. For example, in 2024 we have increased exposure to SGD and JPY bonds, while reducing USD and HKD bonds. We have also increased exposure to Singapore Treasury Bills, which when hedged back to USD, puts us ahead of US Treasuries. In addition, this also comes with an uplift in credit rating.

Ensuring that the portfolio is adequately diversified across countries and sectors, including exposures to quality US, European and Middle Eastern names. From a sector perspective, we like financials globally, where we can find good relative value. Additionally, this sector is lower beta and more defensive in nature, allowing us to better manage volatility and mitigate potential repricing in credit markets.

Current Sub-Fund Positioning

Top Issuer Holdings and Rationale

Name	Market Weight	Investment outlook and rationale
SINGAPORE Government (MASPSP)	7.2%	Short-dated Singapore government bonds contribute to the Sub-Fund's liquidity bucket and provides stable and attractive income amid market volatility and uncertainty. Bonds are denominated in SGD and hedged back to USD for an attractive yield pick-up.
Mirae Asset Securities (DAESEC)	4.4%	Higher quality name Mirae Asset Securities provides stable and attractive income amid market volatility and uncertainty.
US Treasury Notes / Bills (T/B)	4.2%	Short-dated USTs contribute to the Sub-Fund's liquidity bucket and provides stable and attractive income amid market volatility and uncertainty.

Fidelity Global Credit ex-US Fund

Market Commentary

The last 12 months saw divergence and volatility in asset prices as the narrative around politics, inflation and the path of rates changed during the period. In the US, the prospect and eventual election of Trump along with a Republican sweep produced expectations of deregulation, lower corporate taxes and potentially higher deficits. In Europe, instability in French and German politics along with fears of US tariffs weighed on sentiment. The French government fell to a vote of no confidence in December and was unable to pass a 2025 budget, which pushed French spreads back to their recent wides. And in the UK, the first budget by the new government raised concerns about growth and potential for more Gilt issuance.

During the year major central banks cut rates: the Fed (100bps); European Central Bank (ECB) (125bps); and Bank of England (BoE) (50bps). However, the changing backdrop led a meaningful divergence of expectations for future cuts from the different banks. The market continued to see the ECB cutting 100bps in 2025, but the changing dynamics in the US and the UK forced a change in market expectations from 100bps of cuts to just 50 in 2025.

The market reaction to the above news flow was a selloff in government bonds, with USTs and Gilts the underperformers. Credit spreads compressed, with GBP credit helped by a late rally in the troubled UK water sector; and equities were mixed, impacted by the differing growth prospects in different regions. The volatility and underperformance of fixed income of recent has left us with higher yields and so a reasonable expectation for total returns for the remainder of 2025.

Portfolio Commentary

For the 12-month period ending 31 January, 2025, portfolio performance (gross of fees) of 8.43% outperformed the Bloomberg Global Credit Ex-US Index (Hedged) return of 5.11% by 3.32%. From an attribution perspective, favorable security selection was the primary driver of outperformance. Specifically, exposure to specific property financing companies was additive, buoyed by continued improvement in sentiment towards the property sector. Returns were further bolstered by superior bond picking across the banking and consumer-related segments. Sector allocation decisions resulted in a modest drawback. While relative positioning within corporates was additive, the upside was more than offset by the negative impact of out of benchmark exposure to U.S. and German sovereign debt, which both lagged for the period.

Positioning and Outlook

In terms of outlook, we don't see credit fundamentals as a negative driver of spreads in the near term. The extension of higher rates has generally helped bank earnings, and balance sheets are in good shape, while credit metrics for non-financials remain solid. The UK is currently experiencing low growth with the potential for more rate cuts, while in Europe we expect the ECB to keep cutting as inflation falls toward target. The potential for tariffs and politics may drive uncertainty but are unlikely to impact fundamentals.

On the technical side, higher yields continue to attract buyers of fixed income, including credit. Aside from a disorderly sell off in rates we expect fixed income demand to remain robust. The market has digested significant issuance well as we see demand continuing to outstrip supply.

Regarding valuation, the divergence between € and \$ credit spreads appears unjustified by fundamentals and we believe offers value. Scenario analysis indicates a higher than typical probability of positive total and excess returns for credit. We see value in European property, utilities and banks. We see the most opportunity in the divergence between credit sectors. We would expect to "buy the dips" and add risk on any move wider in credit spreads.

February 2025

FIL Fund Management Limited

Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF

Market Review

Global bond markets delivered positive returns during the review period, amidst a period marked by volatility. Expectations of rising inflation and uncertainty, especially after the US election results, drove US yields upward to around 4.5%. New US administration's announcement of tariffs on Canada, Mexico, and China, alongside executive orders on immigration, deregulation, and energy production, further influenced market sentiment and induced trade war fears.

Early in the review period, markets were jittery due to persistent core inflation and investors adjusting their expectations about potential interest rate cuts by major central banks, leading to a selloff in government bonds across developed markets. However, markets began to rebound in May and maintained this momentum through September. US Treasury yields fell from their year-to-date highs after Fed Chairman Jerome Powell hinted that further rate hikes were unlikely. Positive labor market conditions and encouraging inflation data in the US further buoyed market sentiment. During an annual symposium in August, Powell indicated that the Fed would begin to reduce interest rates, signaling growing confidence in inflation returning to the Fed's 2% target.

Nevertheless, a surge in economic data, particularly payroll and unemployment figures in late September, led markets to adjust their expectations for interest rates, causing US Treasury yields to rise to their highest levels since late July. On the monetary policy front, the US Fed initiated its easing cycle with a 50-basis point interest rate cut at its September meeting and signaled a gradual pace for future cuts. The Fed implemented two additional rate cuts in November and December, albeit at a slower pace anticipated for 2025.

Additionally, five central banks within the 'Group of 10' currency bloc—the Swiss National Bank, Riksbank, Bank of Canada, ECB, and the BoE—lowered interest rates during the period. In contrast, the BoJ raised its policy rate to 0.25% at its July meeting, leading to a significant spike in volatility.

In the corporate credit space, both investment-grade and high-yield bonds produced positive returns as credit spreads narrowed, supported by a stable corporate earnings outlook and balanced technical factors. On the economic front, manufacturing activity in the US, Europe, and the UK showed signs of improvement, though it remained in contractionary territory. The S&P Global US Manufacturing Purchasing Managers' Index (PMI) increased to 51.2 in January 2025, up from 50.3 in January 2024.

Sub-Fund Performance

The Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF generated positive returns (gross of fees) of 2.39% during the 12-month period and outperformed the benchmark which delivered a return of 2.01%. Credit selection in Banks & Brokers and Basic Industry sector added to relative returns. Additionally, USD curve positioning, especially in the maturity bucket of 20-25 years also added to relative returns.

Positioning

The portfolio is managed by the Fidelity Systematic Investing team and is constructed using a rigorous investment process. The Sub-Fund delivers global corporate bond exposure by using our proprietary multifactor model to select and weight securities while capturing the characteristics of the broad market. Taking input from Fidelity's fundamental and sustainable research as well as the multifactor model, the portfolio management team selects companies with a compelling combination of strong fundamentals, positive market sentiment, and attractive bond valuations that have the ability to outperform their peers in the current market environment. The Sub-Fund is overweight Banks & Brokers in names such as Bank of America and Erste bank. It is underweight towards Communications and Consumer Non-Cyclical sectors.

February 2025

FIL Investments International

Fidelity Sustainable USD EM Bond UCITS ETF

Market Review

Emerging market debt posted strong performance during the review period, aided by Fed rate cuts, resilient growth and increasing appetite for higher yielding assets. Credit spreads tightened amid favourable policies, structural reforms, continued International Monetary Fund (IMF) support and debt restructuring progress in several high yield emerging market countries including Sri Lanka, Zambia, and Ukraine. The emerging market risk backdrop improved further with a dovish tone in messaging from the Fed in August and the subsequent economic data releases that supported the likelihood of a soft landing in the US versus an imminent recession. The US Fed initiated its easing cycle with a 50-basis points interest rate cut at its September meeting and implemented another two rate cuts during the November and December meeting. With hard currency sovereigns, Lebanon, Argentina and Ecuador were among the best performers while Senegal, Uruguay and Venezuela were among notable laggards. Lebanon bonds rose amid improved sentiment due to growing optimism for economic and governance reforms in the region.

Fidelity Sustainable USD EM Bond UCITS ETF (continued)

Sub-Fund Performance

The Fidelity Sustainable USD EM Bond UCITS ETF delivered a positive performance of 6.85% (gross of fees) during the review period but trailed the benchmark which delivered a return of 8.38%. Selection weighed on returns, driven by underweight stance in Argentina and Egypt sovereigns. Conversely, USD curve positioning aided relative returns, particularly on the longer end of the maturity curve (20-30 years).

Positioning

The portfolio is managed by the Fidelity Systematic Investing team and is constructed using a rigorous investment process. The Sub-Fund delivers global corporate bond exposure by using our proprietary multifactor model to select and weight securities while capturing the characteristics of the broad market. Taking input from Fidelity's fundamental and sustainable research as well as the multifactor model, the portfolio management team selects companies with a compelling combination of strong fundamentals, positive market sentiment, and attractive bond valuations that have the ability to outperform their peers in the current market environment. As at the end of the January, compared to the Index, the Sub-Fund is overweight to investment grade Sovereigns, Supras and Agencies while being underweight to High Yield and Emerging markets investment grade space.

February 2025

FIL Investments International

Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF

Market Review

During the review period, global high-yield markets performed strongly, driven by elevated all-in yields and narrowing credit spreads. The asset class showed significant macro resilience amid major geopolitical events, moderating inflation, robust balance sheets, improving capital market access, and central banks transitioning to an easing cycle.

The corporate results demonstrated the resilience of business models, characterized by stable profit margins, leverage ratios, and sustained free cash flows. The favourable interest rate cycle in Europe facilitated increased momentum in refinancing and asset sales, ultimately stabilizing credit profiles, while China's property sector benefited from supportive government measures. From a ratings perspective, the most notable outperformer was the lower-rated distressed CCC segment. This cohort delivered significant returns over the period as investors discounted recessionary probabilities, given strong US economic data. Whereas in Europe, this segment experienced volatility due to idiosyncratic names driven by highly leveraged issuers.

On the policy front, US treasury yields initially fell after the Fed signalled that further rate hikes were unlikely. However, strong labour market conditions and positive inflation data boosted sentiment, leading the Fed to start its easing cycle with a 50bps rate cut in September. The Fed later made two more cuts in the fourth quarter, ending the year at 4.5%, while indicating a slower pace of cuts in 2025. Additionally, five central banks within the 'Group of 10' currency bloc (the Swiss National Bank, Riksbank, Bank of Canada, ECB, and the BoE lowered interest rates during the period. In Asia, the BoJ) raised its policy rate to 0.25% at its July meeting, leading to significant volatility, whereas the People's Bank of China implemented two rate cuts, ending the year at 3.1%. However, the recent election of Donald Trump introduced uncertainties, as his proposed policies on immigration and tariffs could significantly impact inflation, central bank actions, and ultimately global economic growth.

Elsewhere, manufacturing activity in the US and Europe showed signs of improvement but remained in contractionary territory, except for emerging economies like China and India. The S&P Global US Manufacturing Purchasing Managers' Index (PMI) rose to 49.4 in December 2024 from 47.9 in December 2023. Additionally, the annual inflation rate in these regions sharply declined, with the eurozone's latest inflation figure nearing the central banks' target of 2.0%.

Sub-Fund Performance

The Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF generated returns of 6.96% (gross of fees) during the review period and underperformed the benchmark Solactive Paris Aligned Global Corporate High Yield USD Index which delivered a return of 9.56%.

Credit selection weighed on returns, driven by overweight stance in CCC rated securities. In sector-wise context, positioning in Communications and Consumer Non-Cyclical were the largest detractors to relative returns.

Positioning

The portfolio is managed by the Fidelity Systematic Investing team and is constructed using a rigorous and repeatable investment process. The Sub-Fund delivers global corporate bond exposure by using our proprietary multifactor model to select and weight securities while capturing the characteristics of the broad market.

On the economic front, manufacturing activity in the US, Europe, and the UK showed signs of improvement, though it remained in contractionary territory. The S&P Global US Manufacturing Purchasing Managers' Index (PMI) increased to 51.2 in January 2025, up from 50.3 in January 2024.

Sub-Fund Performance

The Fidelity Global Government Bond Climate Aware UCITS ETF generated -1.13% (gross of fees) during the review period, as compared to the benchmark which generated a return of -1.59%. Selection contributed the most to relative returns, led by holdings in Italian and Spanish government bonds.

Positioning

The portfolio is managed by the Fidelity Systematic Investing team and is a passive strategy aligned with climate objectives that aims to track the performance of Solactive Paris Aware Global Government USD Index. The strategy provides investors the opportunity to have highly diversified global government exposures in a risk controlled and cost-efficient manner. In order to achieve the investment objective, the portfolio management team will aim to replicate the Index by holding all of the Index Securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably feasible (for example, as a result of the number of securities or the illiquidity of certain securities within the Index), the team will use an optimisation approach to select Index Securities in order to build a representative portfolio that provides a return that is comparable to that of the Index and has no additional risks arising from individual security selection.

Fidelity Global Government Bond Climate Aware UCITS ETF (continued)

Positioning (continued)

The Index only includes publicly traded bonds and green bonds and does not include agency debt. The positioning of the Sub-Fund is aligned to the index on a sector, region, rating and duration basis. The Sub-Fund is overweight to issuers like USA and Thailand while being underweight to issuers such as Chile and Poland.

During the review period, global high-yield markets performed strongly, driven by elevated all-in yields and narrowing credit spreads. The asset class showed significant macro resilience, moderating inflation, robust balance sheets, improving capital market access, and central banks transitioning to an easing cycle.

From a ratings perspective, the most notable outperformer was the lower-rated distressed CCC segment. This cohort delivered significant returns over the period as investors discounted recessionary probabilities, given strong US economic data. Whereas in Europe, this segment experienced volatility due to idiosyncratic names driven by highly leveraged issuers.

Fidelity Sustainable USD High Yield Bond Paris-Aligned Multifactor UCITS ETF (continued)

Market Review – since inception 22 October 2024 to 31 January 2025 (continued)

On the policy front, US treasury yields initially fell after the Fed signalled that further rate hikes were unlikely. However, strong labour market conditions and positive inflation data boosted sentiment, leading the Fed to start its easing cycle with a 50bps rate cut in September. The Fed later made two more cuts in the fourth quarter, ending the year at 4.5%, while indicating a slower pace of cuts in 2025. With the recent victory of Donald Trump in US elections and his proposed policies on immigration and tariffs that could significantly impact inflation and growth, US 10-year treasury yield climbed to around 4.5%.

Elsewhere, manufacturing activity in the US and Europe showed signs of improvement but remained in contractionary territory, except for emerging economies like China and India. The S&P Global US Manufacturing Purchasing Managers' Index (PMI) rose to 51.2 in January 2025, from 47.8 in October 2024. Additionally, the annual inflation rate in these regions sharply declined, with the eurozone's latest inflation figure nearing the central banks' target of 2.0%.

Sub-Fund Performance – since inception 22 October 2024 to 31 January 2025

The Fidelity Sustainable USD High Yield Bond Paris-Aligned Multifactor UCITS ETF generated returns of 1.78% (gross of fees) during the review period and outperformed the benchmark which delivered a return of 1.66%.

Credit selection added to returns, driven by underweight stance in CCC rated securities and overweight stance in BB rated securities. In sectorwise context, underweight stance in Consumer Non-cyclical sector added to relative returns.

Positioning

The portfolio is managed by the Fidelity Systematic Investing team and is constructed using a rigorous investment process. The Sub-Fund delivers USD High yield corporate bond exposure by using our proprietary multifactor model to select and weight securities while capturing the characteristics of the broad market. The portfolio management team selects companies with a compelling combination of strong fundamentals, positive market sentiment, and attractive bond valuations that can outperform their peers in the current market environment. The Sub-Fund is overweight on Property sector in names such as Brookfield Properties and underweight on Consumer and Capital goods sectors.

February 2025

FIL Investments International

Fidelity Sustainable EUR High Yield Bond Paris-Aligned Multifactor UCITS ETF

Market Review - since inception 22 October 2024 to 31 January 2025

During the review period, global high-yield markets performed strongly, driven by elevated all-in yields and narrowing credit spreads. The asset class showed significant macro resilience, moderating inflation, robust balance sheets, improving capital market access, and central banks transitioning to an easing cycle.

From a ratings perspective, the most notable outperformer was the lower-rated distressed CCC segment. This cohort delivered significant returns over the period as investors discounted recessionary probabilities, given strong US economic data. Whereas in Europe, this segment experienced volatility due to idiosyncratic names driven by highly leveraged issuers.

On the policy front, US treasury yields initially fell after the Fed signalled that further rate hikes were unlikely. However, strong labour market conditions and positive inflation data boosted sentiment, leading the Fed to start its easing cycle with a 50bps rate cut in September. The Fed later made two more cuts in the fourth quarter, ending the year at 4.5%, while indicating a slower pace of cuts in 2025. With the recent victory of Donald Trump in US elections and his proposed policies on immigration and tariffs that could significantly impact inflation and growth, US 10-year treasury yield climbed to around 4.5%.

Elsewhere, manufacturing activity in the US and Europe showed signs of improvement but remained in contractionary territory, except for emerging economies like China and India. The S&P Global US Manufacturing Purchasing Managers' Index (PMI) rose to 51.2 in January 2025, from 47.8 in October 2024. Additionally, the annual inflation rate in these regions sharply declined, with the eurozone's latest inflation figure nearing the central banks' target of 2.0%.

INVESTMENT MANAGER'S REPORT (CONTINUED)

Fidelity Sustainable EUR High Yield Bond Paris-Aligned Multifactor UCITS ET (continued)

Sub-Fund Performance – since inception 22 October 2024 to 31 January 2025

The Fidelity Sustainable EUR High Yield Bond Paris-Aligned Multifactor UCITS ETF generated returns of 2.05% (gross of fees) during the review period and underperformed the benchmark which delivered a return of 2.21%.

Credit selection weighed on returns, driven by underweight stance in securities rated B and below. In sector-wise context, underweight stance in Financials and Property contributed to detraction in relative returns.

Positioning

The portfolio is managed by the Fidelity Systematic Investing team and is constructed using a rigorous investment process. The Sub-Fund delivers EUR High yield corporate bond exposure by using our proprietary multifactor model to select and weight securities while capturing the characteristics of the broad market. The portfolio management team selects companies with a compelling combination of strong fundamentals, positive market sentiment, and attractive bond valuations that can outperform their peers in the current market environment. The Sub-Fund is overweight Consumer Sector in names such as eDreams Odigeo and Minor Hotels and underweight on Transportation and Basic Industry sector.

^{*} The Sub-Fund changed name effective 18 February 2025, please refer to the General Information section on page 2.

¹ The Sub-Fund launched on 15 March 2023.

² The Sub-Fund launched on 18 October 2023.

³ The Sub-Fund launched on 22 October 2024.

The Net Asset Value per redeemable participating share is calculated by dividing the total net assets (as calculated for shareholder dealing purposes) of each Sub-Fund by the number of redeemable participating Shares of that Class in issue.

Signed on behalf of the Board of Directors by:

Catherine Fitzsimmons

² The Sub-Fund launched on 18 October 2023.

³ The Sub-Fund launched on 22 October 2024.

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2025

1. Organisation

Fidelity UCITS II ICAV (the "Fund") was registered in Ireland pursuant to the Irish Collective Asset-management Vehicles Act 2015 (as amended) on 14 November 2017 under registration number C174793 and is authorised by the Central Bank of Ireland (the "Central Bank") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations").

The Fund is organised in the form of an umbrella fund with segregated liability between Sub-Funds. The Prospectus provides that the Fund may offer separate Sub-Funds. Each Sub-Fund will have a distinct schedule of investments. The portfolio of assets maintained for each Sub-Fund will be invested in accordance with the investment objectives and policies applicable to such Sub-Fund. For more information please refer to the General Information section.

The active ETF Shares of Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD EM Bond UCITS ETF, Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Global Government Bond Climate Aware UCITS ETF, Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable EUR Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD High Yield Bond Paris-Aligned Multifactor UCITS ETF and Fidelity Sustainable EUR High Yield Bond Paris-Aligned Multifactor UCITS ETF are admitted to the Official List and to trading on the Regulated Market of Euronext Dublin and are admitted to trading on the London Stock Exchange, Deutsche Börse, SIX Swiss Exchange and Borse Italiana.

2. Material Accounting Policies

The material accounting policies and estimation techniques adopted by each Sub-Fund are as follows:

a) Basis of Preparation of Financial Statements

The financial statements are prepared in accordance with International Financial Reporting Standards as adopted by the European Union ('IFRS'), interpretations adopted by the International Accounting Standards Board ('IASB'), ICAV ACT 2015 and certain requirements of the UCITS Regulations and the Central Bank's (Supervision and Enforcement) Act 2013 (section 48(1)) UCITS Regulations 2019 (the "Central Bank UCITS Regulations") that apply to financial reports. The financial statements have been prepared on the going concern basis and under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates as adopted by the European Union. It also requires the Directors to exercise their judgement in the process of applying each Sub-Fund's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to each Sub-Fund's financial statements are disclosed in the following notes.

The Fund is authorised by the Central Bank as a UCITS pursuant to the UCITS Regulations.

For the Fidelity Sustainable USD High Yield Bond Paris Multifactor UCITS ETF and Fidelity Sustainable EUR High Yield Bond Paris Multifactor UCITS ETF the year ended 31 January 2025 is the first annual reporting cycle, and therefore there are no comparatives in the financial statements.

b) New standards, amendments and interpretations

New standards and amendments to existing standards

There are no standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 February 2024 that have a material effect on the financial statements of the Sub-Funds.

New standards, amendments and interpretations effective after 1 February 2025 and have not been early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 February 2025 and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Sub-Funds.

2. Material Accounting Policies (continued)

c) Financial Instruments at Fair Value through Profit or Loss

Classification

(i) Assets

The Sub-Funds classify their investments based on both the Sub-Funds business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Sub-Funds are primarily focused on fair value information and use that information to assess the assets' performance and to make decisions. The Sub-Funds have not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income.

The contractual cash flows of the Sub-Fund's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving each Sub-Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

(ii) Liabilities

Financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective Interest rate. Financial liabilities are classified according to the substance of the contractual arrangements entered into.

(iii) Recognition, derecognition and measurement

Purchases and sales of investments are recognised on trade date, the date on which the Sub-Funds commit to purchase or sell the asset. Investments are initially recognised at fair value. Transaction costs for all financial assets and liabilities carried at fair value through profit and loss are expensed as incurred in the Statement of Comprehensive Income.

Subsequent to initial recognition, all investments continue to be classified at fair value through profit or loss, and the changes in fair value are recognised as net unrealised gain/loss on investments in the Statement of Comprehensive Income in the period in which they arise.

Investments are derecognised when the contractual rights to the cash-flows from the financial asset expire or a Sub-Fund has transferred the financial asset and the transfer qualifies for de-recognition. A financial liability is de-recognised when the obligation specified in the contract is discharged, cancelled or has expired. Realised gains and losses on sales of investments are calculated based on the average cost of the investment in local currency and are recognised in net realised gain/loss on investments in the Statement of Comprehensive Income in the period in which they arise. Realised gains and losses on investment transactions in debt instruments are calculated as the difference between sales proceeds and the historic cost of the instrument.

(iv) Fair value estimation

At the financial year end, the Investments were valued at last traded price as is consistent with the Prospectus. In circumstances where the last traded price is not within the bid-ask spread, the Investment Manager will determine the point within the bid-ask spread that is most representative of fair value. Where market quotations are not available or are unrepresentative, fair value may be determined by the Sub-Fund's using reputable pricing sources (such as pricing agencies) or indicative prices from bond/debt market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. The Sub-Fund's would exercise judgement and estimates on the quantity and quality of pricing sources used. Where no market data is available, each Sub-Fund may value positions using their own models, which are usually based on valuation methods and techniques generally recognised as standard within the industry.

Shares or units in collective investment schemes shall be valued on the basis of the latest unaudited available net asset value per share or unit as published by the collective investment scheme.

(v) Transfers between levels of the fair value hierarchy

Transfers between levels of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period.

2. Material Accounting Policies (continued)

d) Cash and Cash Equivalents

Cash and cash equivalents include cash in hand, deposits held on call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. All cash at bank balances are held with Brown Brothers Harriman, or with third party institutions approved by FIL Investment Management (Luxembourg) S.à r.l., Ireland Branch (the "Manager") on overnight deposit or directly with a sub-custodian. All deposits held on call with banks are returned to Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") the following day. Details are shown in Note 3.

e) Cash Collateral and Margin Cash

Collateral cash provided/received by the Sub-Fund is identified on the Statement of Financial Position under Cash Collateral due from/to broker and is not included as a component of cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Sub-Fund classify that asset in its Statement of Financial Position separately from other assets and identifies the asset as pledged collateral. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the notes to the financial statements.

Initial margin deposits are made upon entering into derivative contracts and are generally made in cash or cash equivalents. Subsequent payments (variation margin) to and from the clearing broker are made on a daily basis based on changes in the market value of derivative contracts. Initial margin and variation margin is presented under Margin Cash Due from Broker or Margin Cash Due to Broker on the Statement of Financial Position.

f) Futures Contracts

A futures contract is a legal agreement, to buy or sell a particular commodity or financial instrument at a predetermined price at a specified time in the future.

Initial margin deposits are made upon entering into open futures contracts and are generally made in cash or cash equivalents. Subsequent payments (variation margin) to and from the clearing broker are made on a daily basis based on changes in the market value of futures contracts. Initial margin and variation margin is presented under Margin Cash Due from Broker or Margin Cash Due to Broker on the Statement of Financial Position. The fair value of open futures contracts is based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised.

g) Forward Foreign Exchange Contracts

Forward foreign exchange contracts are agreements between two parties to exchange two designated currencies at a specific time in the future.

The fair value of open forward foreign exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the valuation date. Changes in the value of forward foreign exchange contracts are recognised as unrealised gains or losses on forward foreign exchange contracts until the contracts are terminated, at which time realised gains and losses are recognised.

A Sub-Fund may use forward foreign exchange contracts for the purposes of hedging the currency exposure of the underlying securities into the relevant base currency or on behalf of a specific class in order to hedge some or all of the foreign exchange risk for such class.

For each relevant Sub-Fund, gains or losses on open foreign currency exchange spot contracts are included in Cash and Cash Equivalents in the Statement of Financial Position. Unrealised gains and losses on open forward foreign currency exchange contracts are included in Financial Derivative Instruments (the "FDIs") under assets or liabilities, as appropriate, on the Statement of Financial Position and are shown on the Schedule of Investments of each relevant Sub-Fund. Realised gains and losses and change in unrealised gains and losses on forward foreign currency contracts are included in Net Gain/(Loss) on Financial Assets at Fair Value through Profit or Loss and Financial Derivative Instruments on the Statement of Comprehensive Income.

h) Option Contracts

Options are contracts in which the writer (seller) promises that the contract buyer has the right, but not the obligation, to buy or sell a certain index, equity, bond or currency at a certain price (the strike price) on or before a certain expiration date, or exercise date. An option giving the buyer the right to buy at a certain price is called a call, while one that gives him/her the right to sell is called a put.

2. Material Accounting Policies (continued)

h) Option Contracts (continued)

A Sub-Fund may purchase and write call and put options on securities (including straddles), securities indices and currencies and use options on futures contracts (including straddles) and swap agreements and / or hedge against changes in interest rates, currency exchange rates or securities prices. A Sub-Fund may also use options as a substitute for taking a position in other securities and funds and/or to gain an exposure within the limits laid down by the Central Bank.

The fair value of open option positions is calculated and recorded by adding premium paid on the options to unrealised gain or loss on open contracts. The fair value of the options which are dealt in on a securities market are the settlement price as determined by the market.

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currency purchased. Premiums paid from the purchase of options, which expire unexercised, are treated as realised losses.

The value of options is included in Financial Derivative Instruments under assets or liabilities on the Statement of Financial Position, as appropriate. Realised gains and losses and change in unrealised gains and losses on options are included in Net Gain/(Loss) and Financial Derivative Instruments in Financial Assets at Fair Value through Profit or Loss on the Statement of Comprehensive Income.

i) Swap Contracts

A swap is a contract under which one party agrees to provide the other party with something, for example a payment at an agreed rate, in exchange for receiving something from the other party, for example the performance of a specified asset or basket of assets. Where specified in the Relevant Supplement, a Sub-Fund may enter into swap agreements (including total return swaps and contracts for differences) with respect to various underlyings, including currencies, interest rates, securities, collective investment schemes and indices.

A Sub-Fund may use these techniques to protect against changes in interest rates and currency exchange rates. A Sub-Fund may also use these techniques to take positions in or protect against changes in securities indices and specific securities prices.

A contract for difference is an agreement between a buyer and a seller stipulating that the seller will pay the buyer the difference between the current value of the security and its value when the contract is made. If the difference turns out to be negative, the buyer pays the seller.

A total return swap is a bilateral financial contract, which allows one party to enjoy all of the cash flow benefits of an asset without actually owning this asset. It involves the exchange of the right to receive the total return, income plus capital gains or losses, of a specified reference asset, index or basket of assets against the right to make fixed or floating payments.

In respect of currencies, a Sub-Fund may utilise currency swap contracts where the Sub-Fund may exchange currencies at a fixed rate of exchange for currencies at a floating rate of exchange or vice versa. These contracts allow a Sub-Fund to manage its exposures to currencies in which it holds investment. For these instruments, the Sub-Fund's return is based on the movement of currency exchange rates relative to a fixed currency amount agreed by the parties.

In respect of interest rates, a Sub-Fund may utilise interest rate swap contracts where the Sub-Fund may exchange interest rate cash flows for cash flows based on the return of an equity or fixed income instrument, a basket of such instruments or a securities index. These contracts allow a Sub-Fund to manage its interest rate exposures. For these instruments, the Sub-Fund's return is based on the movement of interest rates relative to a fixed rate agreed by the parties.

The notional amount of swap contracts is subsequently marked-to market to reflect the fair value of the swap which is reported as a financial asset or liability at fair value through profit or loss as appropriate on the Statement of Financial Position for each relevant Sub-Fund. The amounts of interest receivable and payable are included in the Interest Receivable on Financial Derivative Instruments and Interest Payable on Financial Derivative Instruments on the Statement of Financial Position, as appropriate. Realised gains and losses, change in unrealised gains and losses on swap contracts and the net amounts of interest payments and receipts on swap contracts are included in Net Gain/(Loss) on Financial Assets at Fair Value through Profit or Loss and Financial Derivative Instruments on the Statement of Comprehensive Income.

A Sub-Fund may use credit default swaps which are a mechanism for transferring credit risk between purchaser and seller. The protection buyer purchases protection from the protection seller for losses that might be incurred as a result of a default or other credit event (explained below) in relation to an underlying security.

2. Material Accounting Policies (continued)

i) Swap Contracts (continued)

The protection buyer pays a premium for the protection and the protection seller agrees to make a payment to compensate the protection buyer for losses incurred upon the occurrence of any one of a number of possible specified credit events, as set out in the credit default swap agreement. In relation to the use of credit default swaps, the Sub-Fund may be a protection buyer and / or a protection seller.

A Sub-Fund may also utilise swaptions, which is an option granting its owner the right but not the obligation to enter into an underlying swap.

j) Warrants

Warrants grant the right to acquire an underlying security from the issuer (as opposed to an option where a third party grants a right to acquire an underlying security as described above) at a fixed price. The fair value of warrants is based upon their quoted daily prices. Changes in the value of warrants and realised gains and losses on warrants are recognised as Net Gain/(Loss) on Financial Assets at Fair Value through Profit or Loss and Financial Derivative Instruments on the Statement of Comprehensive Income.

A Sub-Fund may hold warrants on securities as a substitute for taking a position in the underlying security and/or to gain an exposure within the limits laid down by the Central Bank.

k) Foreign Exchange Translation

Functional and Presentation Currency

Items included in the Sub-Funds' financial statements are measured using the currency in which Shareholder transactions take place (the "functional currency"). The functional currency and presentation currency of each Sub-Fund is as follows:

Sub-Fund	Functional currency	Presentation currency
Fidelity MSCI Emerging Markets Index Fund	USD	USD
Fidelity MSCI Europe Index Fund	EUR	EUR
Fidelity MSCI Japan Index Fund	USD	USD
Fidelity MSCI Pacific ex-Japan Index Fund	USD	USD
Fidelity MSCI World Index Fund	USD	USD
Fidelity S&P 500 Index Fund	USD	USD
Fidelity Enhanced Reserve Fund	USD	USD
Fidelity Global Credit ex-US Fund	USD	USD
Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ET	F USD	USD
Fidelity Sustainable USD EM Bond UCITS ETF	USD	USD
Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ET	TF USD	USD
Fidelity Global Government Bond Climate Aware UCITS ETF	USD	USD
Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF	USD	USD
Fidelity Sustainable EUR Corporate Bond Paris-Aligned Multifactor UCITS ETF	EUR	EUR
Fidelity Sustainable USD High Yield Bond Paris Multifactor UCITS ETF	USD	USD
Fidelity Sustainable EUR High Yield Bond Paris Multifactor UCITS ETF	EUR	EUR

Transactions and Balances

Assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the Statement of Financial Position date. Transactions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the period. Proceeds from subscriptions and amounts paid for redemptions in currencies other than the functional currency are translated into the functional currency at the exchange rates prevailing at the dates of the transactions.

2. Material Accounting Policies (continued)

I) Investments Purchased and Sold awaiting settlement

Investments purchased and sold represent receivables for securities sold and payables for securities purchased that have been contracted for but not yet settled or delivered on the statement of financial position date respectively. The due from brokers balance is held for collection. These amounts are recognised initially at fair value and subsequently measured at amortised cost. At each reporting date, the Sub-Funds shall measure the loss allowance on amounts due from broker at an amount equal to the lifetime expected credit losses if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the Sub-Funds shall measure the loss allowance at an amount equal to 12-month expected credit losses. Significant financial difficulties of the broker, probability that the broker will enter bankruptcy or financial reorganisation, and default in payments are all considered indicators that a loss allowance may be required if the credit risk increases to the point that it is considered to be credit impaired. During the financial years ended 31 January 2025 and 31 January 2024 no such impairments have occurred.

m) Interest from Financial Assets Through Fair Value and Profit and Loss

Interest from financial assets through fair value and profit and loss is recognised on the effective yield interest method and credited to the Statement of Comprehensive Income.

n) Dividend Income

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Income is shown gross of any non-recoverable withholding taxes and net of any tax credits. Withholding tax is disclosed in the Statement of Comprehensive Income.

o) Transaction Costs

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. Transaction costs, if any, are expensed as incurred in the Statement of Comprehensive Income.

p) Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accrual basis.

g) Foreign Withholding Taxes and Capital Gains Tax Accrued

Dividends, interest and capital gains (if any) received on investments made by each Sub-Fund may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Sub-Funds or their Shareholders.

Dividend and interest revenue is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

Where there is uncertainty over future income tax treatments that may arise on the sale of investments an accrual is in place for capital gains tax and is disclosed separately in the Statement of Financial Position. This current accrual on Fidelity MSCI Emerging Markets Index Fund relates to a capital gains tax provision for Brazilian and Indian emerging market investments and can change depending on the market value of these investments. A decrease in the market value of these investments may require a reduction in the accrual which can result in a negative value in the Statement of Comprehensive Income.

r) Redeemable Participating Shares

Redeemable Participating Shares provide the Shareholders with the right to redeem their shares for cash equal to their proportionate share of the Net Asset Value of the Sub-Funds and, accordingly, are classified as financial liabilities. The liability to Shareholders is presented in the Statement of Financial Position as "Net Assets Attributable to Holders of Redeemable Participating Shares" and is based on the residual assets of each Sub-Fund after deducting all other liabilities.

2. Material Accounting Policies (continued)

s) Distribution Policy

The Prospectus empowers the Directors to declare dividends in respect of Shares in any Distributing Class out of net income (including dividend income, securities lending income and interest revenue, less expenses) in respect of investments of each Sub-Fund (collectively, "Net Income") for the Index-Tracking Sub-Funds and out of either, Net Income and capital or Net Income for the Actively Managed Sub-Funds.

The Directors may in their sole discretion, determine that the Fund shall, on behalf of one or more Sub-Funds, apply an equalisation methodology in respect to any Distributing Class Shares. An equalisation account will be maintained for each Sub-Fund so that the amount distributed will be the same for all Shares of each Distributing Class notwithstanding different dates of issue.

A sum equal to that part of the subscription issued price of an Distributing Class Share which reflects income (if any) accrued but undistributed up to the date of issue will be deemed to be an equalisation payment and treated as repaid to Shareholders in the relevant Sub-Fund with the first dividend to which the Shareholder was entitled in the same relevant period as that in which the Shares are issued. The redemption price of each Distributing Class Share will also include an equalisation payment in respect of the accrued income of the relevant Sub-Fund up to the Dealing Day on which the relevant Distributing Class Shares are redeemed. The dividends will be automatically paid out to Shareholders in cash unless the Shareholder elects to reinvest the dividends in the Sub-Fund in respect of which the dividend is declared.

Index-Tracking Sub-Funds

In respect of Distributing Classes, and subject to Net Income being available for distribution, it is the current intention of the Directors, subject to any de minimis threshold, to declare dividends out of Net Income attributable to each of the Distributing Classes. Under normal circumstances, the Directors intend that dividends shall be declared on a quarterly basis in or around February, May, August and November of each year and paid on the last Thursday of that relevant month, or any such other Business Day that the Directors deem appropriate. However, Shareholders should note that the Directors may, in their discretion, decide not to make such payment in respect of a Distributing Class.

Fidelity Enhanced Reserve Fund

In respect of Distributing Classes, it is the current intention of the Directors, subject to any de minimis threshold, to declare dividends out of gross income attributable to each of the Distributing Classes.

Distributions out of gross income are made up of Net Income and capital. Under normal circumstances, the Directors intend that: (a) in respect of monthly Distributing Classes (MINCOME), dividends shall be declared on the first Business Day of each month and paid on the fifth Business Day of each month, or any such other Business Day that the Directors deem appropriate; and (b) in respect of quarterly Distributing Classes (QINCOME), dividends shall be declared on the first Business Day of and paid on the fifth Business Day of February, May, August and November, or any such other Business Day that the Directors deem appropriate. However, Shareholders should note that the Directors may, in their discretion, decide not to make such payment in respect of a Distributing Class. Dividends will be automatically paid out to Shareholders in cash unless the Shareholder elects to reinvest the dividends in the Sub-Fund in respect of which the dividend is declared.

Fidelity Global Credit ex-US Fund

In respect of the Accumulating Class in the Sub-Fund, the Directors have determined to accumulate all Net Income attributable to such Accumulating Class and therefore do not intend to declare dividends in respect of the Shares in such Accumulating Class.

Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD EM Bond UCITS ETF, Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD High Yield Bond Paris Multifactor UCITS ETF and Fidelity Sustainable EUR High Yield Bond Paris Multifactor UCITS ETF

In respect of Distributing Classes, and subject to Net Income being available for distribution, it is the current intention of the Directors, subject to any de minimis threshold, to declare dividends out of Net Income attributable to each of the Distributing Classes.

Under normal circumstances, the Directors intend that dividends shall be declared on a quarterly basis in or around February, May, August and November of each year and paid on the last Thursday of that relevant month, or any such other Business Day that the Directors deem appropriate. However, Shareholders should note that the Directors may, in their discretion, decide not to make such payment in respect of a Distributing Class.

2. Material Accounting Policies (continued)

^{*} A zero balance reflects actual amount rounding to less than USD 0.5.

Distributions are recognised in the Statement of Comprehensive Income as Finance Costs.

t) Income Equalisation

In respect of the distributing classes, each Sub-Fund operates equalisation arrangements and makes equalisation payments in respect of each share of such Distributing Classes to reflect the pro rata payment of distributions based on the period of time the share has been owned by a shareholder. Income Equalisation is recognised in the Statement of Comprehensive Income as Finance Costs.

u) Price Adjustment Policy (Swing Pricing)

A price adjustment policy has been adopted and implemented to protect the interests of the Shareholders. The purpose of the price adjustment policy is to allocate the costs associated with large inflows and outflows to investors transacting that day, thereby protecting the long-term Shareholder from the worst effects of dilution. It achieves this purpose by adjusting the share class price at which deals in a subfund are transacted. As such, share class prices may be adjusted up or down depending on the level and type of investor transactions on a particular day within a sub-fund. In this way the existing and remaining Shareholders do not suffer an inappropriate level of dilution.

2. Material Accounting Policies (continued)

u) Price Adjustment Policy (Swing Pricing) (continued)

The Fund will only trigger an adjustment in the price when there are significant net flows likely to have a material impact on the remaining Shareholders. The adjustment will be based on the normal dealing costs for the particular assets in which a sub-fund is invested but will not exceed 2% of the price. The Directors of the Manager may decide to increase this adjustment limit in exceptional circumstances to protect Shareholders' interests. Once an adjustment is made to a share class price, that price is the official price for that share class for all deals that day. Swing Pricing is applicable to the Fidelity Enhanced Reserve Fund and the Index Funds.

At 31 January 2025 and 31 January 2024, price adjustments were not made to the year end Net Asset Value of the Sub-Funds.

3. Cash and Cash Equivalents and Bank Overdraft

Cash and cash equivalents amount for the Sub-Funds for the financial years ended 31 January 2025 and 31 January 2024 are disclosed in the table below:

Cash and cash equivalents include cash in hand, deposits held on call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. All cash at bank balances are held with Brown Brothers Harriman, or with third party institutions approved by the Manager on overnight deposit or directly with a sub-custodian. All deposits held on call with banks are returned to the Depositary the following day.

3. Cash and Cash Equivalents and Bank Overdraft (continued)

In line with the Central Bank Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies published in March 2016, one or more Umbrella Cash Accounts at umbrella level in the name of the Fund (each, an "Umbrella Cash Account") are being operated by the Administrator in accordance with the requirements of the Central Bank. Such Umbrella Cash Accounts are designed to hold unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors.

The table below reflects the amount held in these cash accounts as at 31 January 2025 and 31 January 2024.

5. Share Capital

The Fund may issue up to 500,000,000,000,000 Shares of no par value. The maximum issued Share capital of the Fund shall be 500,000,000,000,000,000. Shares of no par value and the minimum issued Share capital of the Fund shall be €2 represented by two Subscriber Shares of no par value issued for €1 each. The issued share capital of the Fund shall not be less than the currency equivalent of €2 represented by two shares of no par value.

The Subscriber Shares entitle the holders to attend and vote at any general meetings of the Fund but do not entitle the holders to participate in the profits or assets of the Fund except for a return of capital on a winding-up. The Shares entitle the holders to attend and vote at general meetings of the Fund and (other than the Subscriber Shares) to participate equally in the profits and assets of the Sub-Fund to which the Shares relate, subject to any differences between fees, charges and expenses applicable to different Classes.

The movement in the number of redeemable participating Shares for each Sub-Fund for the financial years ended 31 January 2025 and 31 January 2024 is as follows:

¹ The Sub-Fund launched on 22 October 2024.

6. Taxation

Each Sub-Fund is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997. The Sub-Funds will not be liable to Irish tax in respect of their income and gains, other than on the occurrence of a chargeable event with respect to Irish resident shareholders. The Fund will be obliged to account for Irish income tax to the Irish Revenue Commissioners if Shares are held by non-exempt Irish resident Shareholders.

In accordance with the reporting fund regime introduced by the United Kingdom HM Revenue and Customs, each Share Class will be viewed as a separate "offshore fund" for UK tax purposes. The reporting regime permits an offshore fund to seek advance approval from HM Revenue and Customs to be treated as a reporting fund. Once an offshore fund has been granted "reporting fund" status it will maintain that status for so long as it continues to satisfy the conditions to be a "reporting fund", which include making reports to HM Revenue and Customs and investors for each period of account, without a requirement to apply for further certification by HM Revenue and Customs.

Each Share Class in the Sub-Funds is treated as a "reporting fund". This has been approved by HM Revenue and Customs.

Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of Shares by an Irish resident Shareholder or on the ending of a "Relevant Period".

A "Relevant Period" for these purposes is an eight year period beginning with the acquisition of the Shares by the Irish resident Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event does not arise in respect of:

- (i) a Shareholder who is not Irish resident and not ordinarily resident in Ireland at the time of the chargeable event provided the necessary signed statutory declarations are held by the Sub-Fund; or
- (ii) certain exempted Irish resident investors who have provided the Sub-Fund with the necessary signed statutory declaration.

Capital gains, dividends, and interest received by the Sub-Funds may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Sub-Funds or their Shareholders.

7. Fees and Expenses

All of the fees and expenses payable in respect of each Sub-Fund are paid as one single fee. This is referred to as the total expense ratio or "TER". The Manager is responsible for arranging the payment from the TER of all operational expenses of the Sub-Funds, including Directors', Auditors', Legal Advisors', Administrator's, Depositary's and other service providers' fees and expenses and Class hedging costs. The Manager is entitled to an annual fee in respect of the services that it provides to the Sub-Funds. However, this fee will only be paid in circumstances where there is a residual amount left from the TER after the other operational expenses have been paid. Save where another party has agreed to reimburse the Sub-Funds, the TER includes but is not limited to fees and expenses of the Investment Manager, Depositary, Administrator, Secretary and any sub-investment advisor.

Subject to applicable law and regulation, the Manager, the Investment Manager, any Sub-Investment Manager, the Administrator, the Depositary, the General Distributor or any Sub-Distributor may pay part or all of its fees to any person that invests in or provides services to the Fund or in respect of the Sub-Funds.

The TER does not include extraordinary costs, transaction costs and related expenses, including but not limited to, transaction charges, stamp duty or other taxes on the investments of the Sub-Funds, including duties and charges for portfolio re-balancing, withholding taxes, commissions and brokerage fees incurred with respect to the Sub-Funds' investments, interest on borrowings and bank charges incurred in negotiating, effecting or varying the terms of such borrowings, any commissions charged by intermediaries in relation to an investment in the Sub-Funds and such extraordinary or exceptional costs and expenses (if any) as may arise from time to time, such as material litigation in relation to the Sub-Funds or the Fund, which will be paid separately out of the assets of the relevant Sub-Fund.

The TER is calculated and accrued daily from the Net Asset Value of the Sub-Funds and payable at least quarterly in arrears. The TER of each Sub-Fund is as listed in the Relevant Supplement. If the Sub-Funds' expenses exceed the TER outlined above in relation to operating the Sub-Funds, the Manager will cover any shortfall from its own assets.

The table below outlines the maximum TER figures applicable to the active share classes of each Sub Fund:

Directors' Fees

The aggregate emoluments of the Directors paid by the Manager out of the TER on behalf of the Sub-Fund (including expenses) for the financial year ended 31 January 2025 was EUR20,000 which were paid to Bronwyn Wright as Independent Director.

The aggregate emoluments of the Directors paid by the Manager out of the TER on behalf of the Sub-Fund (including expenses) for the financial year ended 31 January 2024 was EUR23,333 which were paid to Denise Kinsella (resigned 31 March 2023) and Bronwyn Wright as Independent Directors for the duration of their respective service.

Executive Directors are not paid a fee from the Fund.

7. Fees and Expenses (continued)

Auditors' Remuneration

The statutory audit fee (including out-of-pocket expenses incurred by the auditors in connection with their work) paid by the Manager on behalf of the Fund for the financial year ended 31 January 2025 amounted to EUR170,436 (excluding VAT) and for the financial year ended 31 January 2024 was EUR122,953 (excluding VAT). There were no other fees paid to the auditors other than the statutory audit fee.

8. Related Parties

In the opinion of the Directors, the list of related parties under IAS 24 "Related Party Transactions" is as follows:

- FIL Limited the ultimate holding company and indirect owner of 100% of the following subsidiary undertakings namely:
 - (i) FIL Investment Management (Luxembourg) S.à r.l., Ireland Branch Manager and Secretary.
 - (ii) FIL Distributors Distributor.
 - (iii) FIL Investment Management (Hong Kong) Investment Manager.
 - (iv) FIL Fund Management Limited Investment Manager.
 - (v) FIL Investments International Investment Manager.
- The Manager and Secretary (i), the Distributor (ii), the Investment Managers (iii)(iv)(v) are related parties to the Fund.

The Manager as a related party to the Fund receives fees, as outlined in the Note 7. The fees incurred during the financial years ended 31 January 2025 and 31 January 2024 are disclosed in the Statement of Comprehensive Income. The amounts payable as at 31 January 2025 and 31 January 2024 are disclosed in the Statement of Financial Position.

- The Directors of the Fund and their dependents. The Directors' fees for the years ended 31 January 2025 and 31 January 2024 are disclosed in Note 7.
- FIL Fondsbank GmbH, FIL Nominee (Shareholdings) Limited, Fidelity Funds China RMB Bond Fund, Sub-Funds of Fidelity
 Qualifying Investor Fund: Fidelity Tactical Bond Fund and Fidelity Core Plus Fund are related parties as they held Shares in the
 Sub-Funds.

The Shares held as at 31 January 2025 and 31 January 2024 are disclosed in the tables below.

Sub-Fund	Related Party	Shares Held
Fidelity Global Credit ex-US Fund		
Class X-ACC USD	Fidelity Qualifying Investor Fund	1,176,988

All related parties transactions are at arm's length.

9. Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of the of the financial asset or liability. In order to achieve its investment objective, each Sub-Fund incurs transaction costs in relation to trading activity on its portfolio. These costs may include broker commissions, settlement fees, stamp duties, and financial transaction taxes. For some financial instruments, such as debt securities, repurchase agreements, and forward foreign exchange contracts, transaction costs are embedded in the price of the instruments and are not separately identifiable. Identifiable transaction costs incurred during the financial years ended 31 January 2025 and 31 January 2024 are recognised as an expense for financial reporting purposes in the Statement of Comprehensive Income.

10. Financial Risk Management

Each Sub-Fund may be exposed to market price risk, interest rate risk, credit risk, liquidity risk or currency risk arising from the financial instruments it holds. The Sub-Funds' overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on financial performance.

The policies documented below are standard operational practices and are reviewed regularly by the Investment Manager. In certain market conditions, the Investment Manager may apply additional risk procedures to minimise potential adverse effects on the Sub-Funds' financial performance.

The Directors and the Investment Manager perform the financial risk management procedures on behalf of the Fund.

a) Global Exposure

Under the UCITS Regulations, the Manager employs a risk management process which enables it to accurately monitor and manage the global exposure of the Sub-Funds to financial derivative instruments (which are a subset of the financial instruments in which the Sub-Funds invest).

The global exposure and leverage of each of the Sub-Funds other than Fidelity Global Credit ex-US Fund is calculated using the commitment approach and these Sub-Funds' global exposure will not exceed 100% of Net Asset Value.

The commitment approach converts the Sub-Funds' FDI positions into the equivalent positions in the underlying assets and seeks to ensure that the FDI risk is monitored in terms of any future "commitments" to which it is (or may be) obligated.

The global exposure and leverage of Fidelity Global Credit ex-US Fund is calculated using relative VaR and absolute VaR respectively. The absolute VaR of Fidelity Global Credit ex-US Fund will be no greater than 10% of the Net Asset Value of the Sub-Fund.

Fidelity Global Credit ex-US Fund

-37.50%	7.27%	-4.03%

^{*} Relative VaR Limit Utilization = [Fund VaR / Benchmark VaR] – 1

b) Market Risk

This risk comprises of three main types of risk: market price risk, currency risk and interest rate risk.

i) Market Price Risk

For Sub-Funds which invest in equities, the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events. Currency exchange rate movements will also cause changes in value when the currency of the investment is other than the Base Currency of the Sub-Fund holding that investment. The Sub-Funds policy is to manage market price risk through diversification and selection of securities and other financial instruments within specified limits set by the Board of Directors.

The following sensitivity analysis assumes a change in the market price of investments of 5% while holding all other variables constant. In practice this is unlikely to occur, and changes in some of the variables may be correlated. In addition, as the sensitivity analysis uses historical data as a basis for determining future events, it does not encompass all possible scenarios, particularly those that are of an extreme nature.

The Investment Manager deems the percentage used applicable for the Sub-Funds' analysis. At 31 January 2025 and 31 January 2024, had the fair value of investments increased/decreased by 5%, with all other variable held constant, the net asset attributable to shareholders for each Sub-Fund would have increased/decreased as set out in the table below:

10. Financial Risk Management (continued)

b) Market Risk (continued)

Fidelity Sustainable USD High Yield Bond Paris Multifactor UCITS			
ETF	USD	17,180,388	-
Fidelity Sustainable EUR High Yield Bond Paris Multifactor UCITS			
ETF	EUR	2,756,997	-

ii) Currency Risk

The Sub-Funds' total return and Statement of Financial Position can be significantly affected by foreign exchange rate movements if the Sub-Funds' assets and income are denominated in currencies other than the Base Currency of the Sub-Funds and this means that currency movements may significantly affect the Sub-Funds' Net Asset Value per Share. The three principal areas of foreign currency risk are where movements in exchange rates affect the value of investments, short term timing differences or income received.

At 31 January 2025 and 31 January 2024, had the exchange rates increased/decreased by 5%, with all other variable held constant, the net asset attributable to shareholders for each Sub-Fund would have increased/decreased as set out in the below tables. Forward Foreign Exchange Contracts held for Class Hedging Purposes are excluded from the analysis, as they are not considered to be exposed to the risk.

iii) Interest Rate Risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and future cash flows.

The majority of the Index Tracking Sub-Funds' financial assets and liabilities are non-interest bearing as at 31 January 2025 and 31 January 2024. As a result, the Index Tracking Sub Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

The interest rate risk profile of financial assets and financial liabilities of the Fidelity Enhanced Reserve Fund, Fidelity Global Credit ex-US Fund, Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD EM Bond UCITS ETF, Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Global Government Bond Climate Aware UCITS ETF, Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable EUR Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable EUR High Yield Bond Paris Multifactor UCITS ETF and Fidelity Sustainable EUR High Yield Bond Paris Multifactor UCITS ETF by the maturity date was as follows:

10. Financial Risk Management (continued)

c) Credit Risk

Each Sub-Fund may be exposed to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when they fall due. Impairment provisions are provided for losses that have been incurred by the Statement of Financial Position date, if any. The main concentration to which each Sub-Fund is exposed arises from each Sub-Fund's investments in derivative instruments. Each Sub-Fund is also exposed to counterparty credit risk on the cash and cash equivalents, amounts due from brokers and other receivable balances. The Index Tracking Sub-Funds invest in equity securities and have limited or no credit risk on their investments.

The Fidelity Enhanced Reserve Fund, Fidelity Global Credit ex-US Fund, Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD EM Bond UCITS ETF, Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Global Government Bond Climate Aware UCITS ETF, Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable EUR Corporate Bond Paris-Aligned Multifactor UCITS ETF, Fidelity Sustainable USD High Yield Bond Paris Multifactor UCITS ETF and Fidelity Sustainable EUR High Yield Bond Paris Multifactor UCITS ETF invest in debt securities and these Sub-Funds may be exposed to losses resulting from default of issuers or borrowers of debt which these Sub-Funds' holds.

As at 31 January 2025 and 31 January 2024, the institutions where the Sub-Funds' cash was held and their respective short term credit ratings, as rated by Fitch, are listed below:

d) Liquidity Risk

In normal market conditions the assets of each Sub-Fund comprise mainly realisable investments which can be readily sold. Each Sub-Fund's main liability is the redemption of any Shares that investors wish to sell. In general, the investments, including cash, of each Sub-Fund are managed so that it can meet its liabilities. Investments held may need to be sold if insufficient cash is available to finance such redemptions. If the size of the disposals are sufficiently large, or the market is illiquid, then there is a risk that either the investments might not be sold or the price at which they are sold may adversely affect the Net Asset Value of the Sub-Funds. The Manager employs an appropriate liquidity risk management process, which takes into account efficient portfolio management transactions employed by the Sub-Funds, in order to ensure that the Sub-Funds are able to comply with their stated redemption obligations. However, it is possible that in the type of circumstances described above, the Sub-Funds may not be able to realise sufficient assets to meet all redemption requests that they receive or the Sub-Funds may determine that the circumstances are such that meeting some or all of such requests is not in the best interests of the Shareholders.

The tables below analyse the Sub-Funds' financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position date to the contractual maturity date. The amounts in the table below are the contractual undiscounted cash flows.

Detailed analyses of the Sub-Funds' assets are not shown as they are considered liquid based on the fact that they could be converted to cash in less than one month at close to their carrying value. Forward Foreign Exchange Contracts held for Class Hedging Purposes are excluded from the analysis, as they are not considered to be exposed to the risk.

e) Capital Risk Management

The capital of each Sub-Fund is represented by the Net Assets Attributable to Holders of Redeemable Participating Shares. The amount of Net Assets Attributable to Holders of redeemable participating Shares is subject to subscriptions and redemptions at the discretion of the Shareholders as well as changes resulting from the Sub-Fund's performance. The Manager's objective when managing capital is to safeguard each Sub-Fund's ability to continue as a going concern in order to provide returns for Shareholders, provide benefits to other stakeholders and maintain a strong capital base to support the development of the investment activities of the Sub-Fund.

In order to maintain the capital structure, the Manager's policy is to perform the following:

- monitor liquidity relative to the assets under management and the dealing cycle;
- make appropriate adjustments to distributions the Sub-Funds pay to redeeming Shareholders; and
- redeem and issue new Shares in accordance with the Prospectus which permits the restriction of redemptions in certain circumstances and require certain minimum holdings and subscriptions.

10. Financial Risk Management (continued)

f) Fair Value Estimation

Each Sub-Fund has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels as defined under IFRS 13:

- (i) Level 1: Investments whose values are based on quoted market prices in active markets and are therefore classified within level 1 include equities listed on an active stock exchange, U.S. government treasury bills and certain non-U.S. sovereign obligations. Quoted prices for these instruments are not adjusted.
- (ii) Level 2: Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade corporate bonds and certain non-U.S. sovereign obligations and over the counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.
- (iii) Level 3: Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include certain corporate debt securities. As observable prices are not available for these securities, the Sub-Funds have used valuation techniques to derive the fair value.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the financial asset or liability.

The determination of what constitutes 'observable' requires significant judgment by the Directors. The Directors have delegated this task to the Administrator. The Administrator considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Where unobservable inputs are used in determining the fair value of an investment, the Administrator receives instruction from the Manager of the fair value measurement to use.

As at 31 January 2025 and 31 January 2024, cash and cash equivalents are classified as Level 1. All other assets and liabilities not disclosed in the tables below are classified as Level 2.

The following tables analyse within the fair value hierarchy of the Sub-Funds' financial assets and liabilities measured at fair value at 31 January 2025 and 31 January 2024:

Fidelity MSCI Emerging Markets Index Fund

Futures Contracts	15,974	_	_	15,974
Total Liabilities	15,974	-	-	15,974

^{*}The Level 3 holdings as at 31 January 2025, consist of the following investments: Kangmei Pharmaceutical with a fair value of USD Nil, is classified as Level 3 because it is unlisted and priced at cost as no vendor price is available. All Russian equity investments totalling USD Nil are classified as Level 3 because their fair value has been written down to zero. Refer to the SOI on page 42 for more details of Russian holdings written down. The equity holding Nebius Group has been written down to zero because its primary dealings are in Russia and is subject to sanctions.

There were no transfers between levels as at 31 January 2025 and 31 January 2024.

The following table presents movement in Level 3 instruments for the financial year ended 31 January 2025.

Balance at 1 February 2024	700
Change in unrealised appreciation / (depreciation)	198,525
Sales	(28,718)
Realised loss	(115,129)
Corporate actions	(55,378)
Balance at 31 January 2025	0

The following table presents movement in Level 3 instruments for the financial year ended 31 January 2024.

Balance at 1 February 2023	753
Change in unrealised appreciation / (depreciation)	(53)
Balance at 31 January 2024	700

A sensitivity analysis of the Level 3 investments is not required as unobservable inputs were not used in determining their valuation as the holdings have been either delisted and priced at last traded price or have been marked to zero.

^{**}The Equity level 3 holdings as at 31 January 2024, consist of the following investments: Siam Commercial Bank with a fair value of USD 700 and is classified as Level 3 because it is delisted. All Russian equity investments totalling USD Nil are classified as Level 3 because their fair value has been written down to zero. TCS Group Holding's fair value has been written down to zero because its primary dealings are in Russia and is subject to sanctions. F05238 with a fair value of USD Nil is classified as Level 3 because it is being priced at cost as no vendor price is available.

g) Cybersecurity Risk

The Fund and its service providers (including the Manager and Investment Manager) are susceptible to cyber-attacks and technological malfunctions that may have effects that are similar to those of a cyber-attack. Cyber-attacks include, among others, stealing or corrupting data maintained online or digitally, preventing legitimate users from accessing information or services on a website, releasing confidential information without authorisation, and causing operational disruption. Successful cyber-attacks against, or security breakdowns of, the Fund, the Manager, Investment Manager, or the Depositary, or other service provider may adversely affect the Sub-Funds or their Shareholders. For instance, cyber-attacks may interfere with the processing of Shareholder transactions, affect the Fund's ability to calculate its Net Asset Value, cause the release or misappropriation of private Shareholder information or confidential Sub-Fund information, impede trading, cause reputational damage, and subject the Fund to regulatory fines, penalties or financial losses, reimbursement or other compensation costs, and additional compliance costs. The Manager and the Investment Manager have established business continuity plans and systems designed to prevent cyber-attacks. Such plans and systems are subject to inherent limitations. Similar types of cyber security risks also are present for issuers of securities in which the Sub-Funds invest, which could result in material adverse consequences for such issuers, and may cause the Sub-Funds' investments in such securities to lose value.

h) Offsetting

The Sub-Funds are required to disclose the impact of offsetting assets and liabilities represented in the statement of financial position to enable users of the financial statements to evaluate the effect or potential effect of netting arrangements on its financial position for recognised assets and liabilities. These recognised assets and liabilities are derivative instruments that are either subject to an enforceable master netting arrangement or similar agreement or meet the following right of set-off criteria: the amounts owed by a Sub-Fund to another party are determinable, the Sub-Fund has the right to set-off the amounts owed with the amounts owed by the other party, the Sub-Fund intends to set-off on a net basis, and the Sub-Funds right of set-off is enforceable at law.

For financial reporting purposes, the Sub-Funds do not offset derivative assets and derivative liabilities in the statement of financial position. The following tables present the Sub-Funds over the counter derivative assets and liabilities by counterparty, net of amounts available for offset under ISDA Master Agreement and net of the related collateral received by the Sub-Funds for assets and pledged by the Sub-Funds for liabilities as at 31 January 2025 and 31 January 2024:

i) Custody and Title Risk

The Depositary is under a duty to hold in custody all financial instruments that may be registered in a financial instruments account opened in the depositary's books and all financial instruments that can be physically delivered to the depositary. The Depositary is required to ensure that all financial instruments that can be registered in a financial instruments account opened in the depositary's books are registered in the depositary's books within segregated accounts. For other assets, the Depositary shall verify the Fund's ownership of such assets.

The Depositary will maintain a record of the financial instruments entrusted to it and those assets for which it is satisfied that the Fund holds the ownership. When the Depositary employs a sub-custodian the Depositary retains responsibility for the assets of the Sub-Fund.

However, it should be noted that not all jurisdictions have the same rules and regulations as Ireland regarding the custody of assets and the recognition of the interests of a beneficial owner such as a Sub-Fund. Therefore, in such jurisdictions, there is a risk that if a subcustodian becomes bankrupt or insolvent, the Sub-Fund's beneficial ownership of the assets held by such sub-custodian may not be recognised and consequently the creditors of the sub-custodian may seek to have recourse to the assets of the Sub-Fund. In those jurisdictions where the Sub-Fund's beneficial ownership of its assets is ultimately recognised, the Sub-Fund may suffer delay and cost in recovering those assets.

The Sub-Funds may invest in markets where custodial and/or settlement systems are not fully developed, therefore the assets of a Sub Fund which are traded in such markets and which have been entrusted to sub-custodians, in circumstances where the use of such sub custodians is necessary, may be exposed to risk. The Depositary is obliged to maintain an appropriate level of supervision over the sub-custodian and make appropriate enquiries from time to time to confirm that the obligations of the agent continue to be competently discharged.

In arriving at the results for the financial year all amounts relate to continuing operations.

13. Soft Commission Agreements

There were no soft commission arrangements entered into during the financial years ended 31 January 2025 and 31 January 2024.

14. Cross-trades

The Manager and/or the Investment Manager may enter into trades for the account of a Sub-Fund with: (i) the accounts of other clients managed by the Manager, the Investment Manager or its affiliates; or (ii) their house accounts (i.e., accounts owned by the Manager, the Investment Manager or any of its connected persons over which it can exercise control and influence) ("cross-trades"). Such cross-trades will only be undertaken in accordance with the relevant requirements promulgated by the relevant authorities.

For the financial year ended 31 January 2025, the Fidelity Enhanced Reserve Fund entered into the following cross trade:

Trade Date	Security Name	Currency	Execution Amount
25/04/2024	Bank of America 3.96% 08/16/24	HKD	39,924,000

There were no cross trades during the financial year ended 31 January 2024.

15. Efficient Portfolio Management

The Sub-Funds may employ investment techniques and instruments for efficient portfolio management purposes only, subject to the conditions and within the limits from time to time laid down by the Central Bank of Ireland. Any such technique or instrument must be one which (alone or in combination with one or more other techniques or instruments) is believed by the Investment Manager to be economically appropriate to the efficient portfolio management of the Sub-Fund, i.e. the use of a technique or instrument may only be undertaken for the purposes of one or more of the following:

- (a) a reduction in risk,
- (b) a reduction in costs,
- (c) the generation of additional capital or income for the Sub-Fund with an appropriate level of risk, taking into account the risk profile of the Sub-Fund and the general provisions of the UCITS Regulations.

During the financial years ended 31 January 2025 and 31 January 2024, the Sub-Funds used futures contracts for efficient portfolio management purposes. The exposure, counterparties, net revenues and costs from using these techniques are all detailed below.

Exposure obtained through the efficient portfolio management:

16. Geopolitical and Macro Risks

Whilst geopolitical risk events and their impacts can never be fully predicted, the Manager continues to focus efforts on being prepared and agile to support timely and effective responses to protect investments managed or held, along with the Manager's financial and operational resiliency.

The Manager continues to monitor and assess risks as follows:

- Primary macro risks identified with the economists for 2025 are:
 - I. Trade wars leading to inflation, disruptive dollar rally, Financial Institution sell-off and loss of Federal Reserve credibility,
 - II. Deteriorating US/China relationship and increased geopolitical/sanctions risk,
 - III. Energy crisis and disruptive oil rally related to Middle East confrontation,
 - IV. Fiscal sustainability concerns.
- At the other end of the scale, micro risks (Asset Manager industry focused) continue to demand scale and specialism, e.g. client and market consolidation, value-chain shift to servicing the end-investor, Tech & AI 'arms race'.
- Market volatility is not expected to let up in 2025, and the risks described above are increasingly interconnected and tougher to avoid - resiliency, diversification and agility to respond continue to be the key mitigants referenced for global financial services.

The Manager's Directors are monitoring these risks closely, considering the needs and requirements of clients and stakeholders. Risk monitoring activities include the ongoing review of market volatility, fund performance, fund liquidity, capital resources, operational resilience and emerging risks that may arise.

17. NAV Reconciliation

An adjustment was made to the Dealing NAV of 31 January 2024 on the Fidelity Global Credit ex-US Fund. The adjustment related to a Credit Suisse Group AT1 corporate bond which was removed from Custody following a pronouncement by the Swiss Financial Market Supervisory Authority (FINMA) in March 2023. At the time pricing vendors continued to actively price this bond at an expected claims level. For the purpose of the financial statements, it was deemed appropriate to make an adjustment which resulted in a decrease of the Financial Statement NAV over the Dealing NAV as documented in the table below.

	31 January 2024
	USD
Dealing NAV	120,126,437
Financial Statement NAV	119,932,287
Dealing NAV per Share	9.30
Financial Statement NAV per Share	9.29

From 12 June 2024, the Manager took a decision to price the holding at zero. For the financial year ended 31 January 2025 it was deemed appropriate to make an adjustment to exclude the position from the Financial Statements with no effect on the Financial Statement NAV over the Dealing NAV.

18. Significant Events during the Financial Year

Ms. Orla Buckley was appointed as a Director of the Fund, effective 6 February 2024.

Mr. David Greco resigned as a Director of the Fund, effective 27 February 2024.

The Prospectus and the supplements for each of the sub funds of Fidelity UCITS II ICAV were updated on 30 July 2024. They have been updated to reflect certain changes to the sustainable investment framework as well as other administrative updates.

There have been no other significant events affecting the Fund during the financial year.

19. Events since the Financial Year End

The Prospectus and the supplements for the below mentioned sub funds were updated on 18 February 2025. The revised supplements/annexes reflect an update to the new sustainable investing framework that was rolled out across the Fund in July 2024, updates to fund names to address requirements of the ESMA naming guidelines and product development considerations, and update to the distribution policy disclosure for Fidelity Enhanced Reserve Fund, and other administrative updates.

Effective 18 February 2025, names changes occurred on the following sub-funds;

- Fidelity ESG USD EM Bond UCITS ETF (formerly Fidelity Sustainable USD EM Bond UCITS ETF)
- Fidelity EUR Corp Bond Research Enhanced PAB UCITS ETF (formerly Fidelity Sustainable EUR Corporate Bond Paris-Aligned Multifactor UCITS ETF)
- Fidelity EUR HY Corp Bond Research Enhanced PAB UCITS ETF (formerly Fidelity Sustainable EUR High Yield Bond Paris-Aligned Multifactor UCITS ETF)
- Fidelity Global Corp Bond Research Enhanced PAB UCITS ETF (formerly Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF)
- Fidelity Global HY Corp Bond Research Enhanced PAB UCITS ETF (formerly Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF)
- Fidelity USD Corp Bond Research Enhanced PAB UCITS ETF (formerly Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF)
- Fidelity USD HY Corp Bond Research Enhanced PAB UCITS ETF (formerly Fidelity Sustainable USD High Yield Bond Paris-Aligned Multifactor UCITS ETF)

Since the financial year ended 31 January 2025, the NAV of the sub-fund Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF decreased by approximately 65%. This reduction in NAV was primarily driven by redemptions during April 2025.

These redemptions occurred during the normal course of business and there is currently no intention to close this sub-fund.

The following table details the change in NAV of the sub-fund.

	Financial Statement NAV	
	31 January 2025	Dealing NAV 30 April 2025
	USD	USD
Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF	490,269,862	169,947,714

There have been no other significant events affecting the Fund after the financial year end and up to the date of approval of the financial statement.

20. Approval of Financial Statements

The annual report and audited financial statements were approved by the Board of Directors of the Fund on 22 May 2025.

Fidelity UCITS II ICAV

DIRECTORS' REPORT

The Directors present, herewith their annual report and audited financial statements for Fidelity UCITS II ICAV (the "Fund") for the financial year ended 31 January 2025.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations. The Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act") as amended requires the Directors to prepare financial statements for each financial year which give a true and fair view of the Fund's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Fund for the financial year. The Directors have elected to prepare the financial statements in accordance with applicable Irish law and International Financial Reporting Standards, as adopted by the European Union ("IFRS").

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in business.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy, at any time, the assets and liabilities and financial position of the Fund and enable them to ensure that the financial statements are prepared in accordance with IFRS and comply with the ICAV Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) ("UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). They are also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Fund's website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The Directors are required to entrust the assets of the Fund to a Depositary for safe-keeping. In carrying out this duty, the Fund has appointed Brown Brothers Harriman Trustee Services (Ireland) Limited as Depositary (the "Depositary").

The Financial Statements are available from website at the following link: https://www.fidelity.ie/fidelity-ucits-ii-icav/

Accounting Records

The Fund is obliged to keep or cause to be kept adequate accounting records as outlined in Section 110 of the ICAV Act. To achieve this, the Directors have appointed a service organisation Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"). The Fund's accounting records are retained at the Administrator's registered office at 30 Herbert Street, Dublin 2, Ireland.

Principal Activities

The objective of the Fund is the collective investment in transferable securities and/or other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with the UCITS Regulations.

The Fund was registered in Ireland on 14 November 2017 as an Irish collective asset-management vehicle with variable capital and having segregated liability between its Sub-Funds and is structured as an umbrella collective asset-management vehicle in that the share capital of the Fund may be divided into different Share Classes with one or more Share Classes representing a separate Sub-Fund of the Fund. Each Sub-Fund may have more than one Share Class. The assets of each Sub-Fund are invested in accordance with the investment objectives applicable to such Sub-Fund.

DIRECTORS' REPORT (CONTINUED)

Principal Activities (continued)

The Fund is organised in the form of an umbrella fund with segregated liability between sub-funds. The Prospectus provides that the Fund may offer separate sub-funds. Each sub-fund will have a distinct schedule of investments. Currently, there are 28 Sub-Funds under the umbrella. Of these 28 sub-funds, 10 Sub-Funds have 31 December year end and 18 Sub-Funds have 31 January year end. These 31 January year end financial statements are prepared for the below 16 Sub-Funds which were launched as of the financial year end (each, a "Sub-Fund" and, collectively, the "Sub-Funds").

There are two other Sub-Funds of the umbrella with 31 January year end (Fidelity MSCI Eurozone Index Fund and Fidelity MSCI UK Index Fund) that have been approved by the Central Bank of Ireland, but they have not been launched as at the financial year end.

Sub-Fund	Launch Date
Fidelity MSCI Emerging Markets Index Fund	20 March 2018
Fidelity MSCI Europe Index Fund	20 March 2018
Fidelity MSCI Japan Index Fund	20 March 2018
Fidelity MSCI Pacific ex-Japan Index Fund	20 March 2018
Fidelity MSCI World Index Fund	20 March 2018
Fidelity S&P 500 Index Fund	20 March 2018
Fidelity Enhanced Reserve Fund	26 March 2018
Fidelity Global Credit ex-US Fund	2 March 2020
Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF	22 March 2021
Fidelity Sustainable USD EM Bond UCITS ETF	25 March 2021
Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF	7 November 2022
Fidelity Global Government Bond Climate Aware Index UCITS ETF	15 March 2023
Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF	18 October 2023
Fidelity Sustainable EUR Corporate Bond Paris-Aligned Multifactor UCITS ETF	18 October 2023
Fidelity Sustainable USD High Yield Bond Paris-Aligned Multifactor UCITS ETF	22 October 2024
Fidelity Sustainable EUR High Yield Bond Paris-Aligned Multifactor UCITS ETF	22 October 2024
Fidelity MSCI Eurozone Index Fund	Unlaunched
Fidelity MSCI UK Index Fund	Unlaunched

Review of Business

The investment objectives of each individual Sub-Fund trading during the year ended 31 January 2025 are stated in the General Information section on pages from 2 to 12.

The performance of the Sub-Funds against these investment objectives for the relevant fiscal year is detailed in the Investment Manager Reports on pages from 13 to 24.

In addition to providing the performance of each Sub-Fund these reports also provide an additional portfolio commentary and a future outlook relevant to each individual Sub-Fund.

Principal Developments

The development and future activity for each Sub-Fund is detailed in the Investment Manager Reports on pages from 13 to 24. The portfolio commentary refers to the main contributors and detractors to performance of the Sub-Fund portfolios during the year.

Results for the Financial Year and Assets, Liabilities and Financial Position at 31 January 2025

Details of the assets, liabilities and financial position of the Sub-Funds and results for the financial year ended 31 January 2025 are set out in the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and Statement of Cash Flows.

DIRECTORS' REPORT (CONTINUED)

Directors

The names of the persons who were Directors at any time during the financial year are listed below:

Ms. Catherine Fitzsimons (Ireland) (Chairperson)

Mr. David Greco (USA) (resigned 27 February 2024)

Ms. Bronwyn Wright (Ireland)

Ms. Carla Sload (Ireland)

Ms. Orla Buckley (Ireland) (appointed 6 February 2024)

All current Directors are Non-Executive.

Ms. Bronwyn Wright is an Independent Director.

Directors' Interests

None of the Directors, the Secretary, nor their families holds or held any beneficial interests in the Fund at 31 January 2025 or during the financial year.

Transactions Involving Directors

There are no contracts or arrangements of any significance in relation to the business of the Fund in which the Directors had any interest, as defined in the ICAV Act, at any time during the financial year ended 31 January 2025 other than those disclosed in Note 7 'Fees' of these financial statements.

Connected Person Transactions

Connected Persons

The Manager, the Depositary, the Investment Manager and each of their respective affiliates are considered to be connected persons of the Fund for the purposes of the Central Bank UCITS Regulations.

The following table details the types of transaction entered into with counterparties that are connected persons:

Type of Transaction Counterparty

Administration Brown Brothers Harriman Fund Administration Services (Ireland) Limited

Depositary, FX and Hedging Services Brown Brothers Harriman Trustee Services (Ireland) Limited

Distributor FIL Distributors

Manager FIL Investment Management (Luxembourg) S.à r.l., Ireland Branch

Investment Manager FIL Fund Management Limited

FIL Investments Management (Hong Kong) Limited

FIL Investments International

Dealing with Connected Persons

Regulation 43 of the Central Bank UCITS Regulations "Restriction on transactions with connected persons" states that "a responsible person shall ensure that any transaction between a UCITS and connected person is:

- (i) conducted at arm's length; and
- (ii) in the best interest of the shareholders of the UCITS".

In accordance with Regulation 81(4) of the Central Bank UCITS Regulations, the Directors are satisfied that:

- (i) there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43 (1) are applied to all transactions with a connected person; and
- (ii) all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Fidelity UCITS II ICAV

DIRECTORS' REPORT (CONTINUED)

Risk Management Objectives and Policies

The principal risks and uncertainties faced by the Fund are outlined in Note 10 'Financial Risk Management'.

Dividends and Retention

The dividend distributions declared and paid during the financial year are disclosed in the Statement of Comprehensive Income and Note 2s "Distribution Policy".

Future Developments

The Sub-Funds will continue to pursue their investment objectives as set out in the Prospectus and outlined in these financial statements.

Independent Auditors

The independent auditor, Deloitte Ireland LLP ("Deloitte"), have indicated their willingness to continue in office in accordance with section 125(1) of the Irish Collective Asset-management Vehicles Act 2015 (as amended).

Irish Funds Corporate Governance Code for Management Companies

The Board of Directors has assessed the measures included in the voluntary Corporate Governance Code for Collective Investment Schemes and Management Companies as published by Irish Funds in December 2011 (the "IF Code"). The Board has adopted all corporate governance practices and procedures in the IF Code.

Signed on behalf of the Board of Directors by:

Catherine Fitzsimmons

Date: 22 May 2025

Carla Sload

Date: 22 May 2025

Fidelity UCITS II ICAV

REPORT FROM THE DEPOSITARY TO THE SHAREHOLDERS (UNAUDITED)

We have enquired into the conduct of the Fidelity UCITS II ICAV (the "Fund") for the financial year ended 31 January 2025 in our capacity as Depositary to the Fund

This report including the opinion has been prepared for and solely for the Shareholders in the Fund, in accordance with Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (The "UCITS Regulations"), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Fund in each annual accounting period and report thereon to the shareholders. Our report shall state whether, in our opinion, the Fund has been managed in that period in accordance with the provisions of the Fund's Instrument of Incorporation of the Fund and the UCITS Regulations. It is the overall responsibility of the Fund to comply with these provisions. If the Fund has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Fund has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Instrument of Incorporation of the Fund and the appropriate regulations and (ii) or otherwise in accordance with the Fund constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Fund has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Fund by the Instrument of Incorporation of the Fund, the UCITS Regulations and the Central Bank UCITS Regulations, and
- (ii) or otherwise in accordance with the provisions of the Instrument of Incorporation of the Fund, the UCITS Regulations and the Central Bank UCITS Regulations.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIDELITY UCITS II ICAV

Report on the audit of the annual accounts

Opinion on the annual accounts of Fidelity UCITS II ICAV (the 'ICAV')

In our opinion the annual accounts:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 January 2025 and of the result for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the applicable Regulations.

The annual accounts we have audited comprise:

- the Schedules of Investments;
- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 20, including material accounting policy information as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is the Irish Collective Asset-Management Acts 2015-2020 ("the ICAV Act") and IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the annual accounts in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Summary of our audit approach

Key audit matters	 The key audit matters that we identified in the current year were: Valuation of financial assets at fair value through profit or loss and financial derivative instruments; and Existence of financial assets at fair value through profit or loss and financial derivative instruments.
Materiality	The materiality that we used in the current year was 0.5% of Average Net Assets which was determined in respect of each sub-fund.
Scoping	We focused our audit scope, and the extent of our testing, based on our assessment of the risks of material misstatement and of the materiality determined.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIDELITY UCITS II ICAV

Significant changes in our approach

No significant changes in our approach were made in the current year.

Conclusions relating to going concern

In auditing the annual accounts, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the annual accounts is appropriate.

Our evaluation of the directors' assessment of the ICAV's ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the relevant controls in place regarding going concern as part of our audit risk assessment procedures.
- Challenging the reasonableness of the key assumptions applied by the directors in their assessment.
- Holding discussions with management on the directors' going concern assessment, the future plans for the ICAV and the
 feasibility of those plans.
- Reviewing all board meeting minutes during the period up to the date of approval of the annual accounts, for evidence of any discussions and/or decisions that could impact the ICAV's ability to continue as a going concern.
- Reviewing the capital activity and NAV movements, subsequent to the financial year end.
- Assessing the adequacy of the relevant going concern disclosures made in the annual accounts.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ICAV's ability to continue as a going concern for a period of at least twelve months from when the annual accounts are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the annual accounts of the current financial year and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the annual accounts as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of financial assets at fair value through profit or loss and financial derivative instrume

Key audit matter description

For the financial year ended the financial assets at fair value through profit or loss and financial derivative instruments of the ICAV represents 98% of total net assets.

The valuation of financial assets at fair value through profit or loss and financial derivative instruments is considered a key audit matter as it is the most significant balance on the Statement of Financial Position. This is also the main driver of the ICAV's performance and has been identified as the most significant risk of material misstatement. The appropriate valuation of the ICAV's financial assets at fair value through profit or loss and financial derivative instruments is crucial to ensuring the annual accounts are free from material misstatement.

Refer also to note 2c and 10 in the annual accounts.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIDELITY UCITS II ICAV

How the scope of our audit responded to the key audit matter

We have performed the following procedures to address the key audit matter:

- We obtained the Brown Brothers Harriman Fund Administration Services (Ireland) Limited SOC 1 Report in order to gain an understanding and evaluate the design, implementation and operating effectiveness of key controls over the valuation process for financial assets at fair value through profit or loss and financial derivative instruments; and
- We independently valued financial assets at fair value through profit or loss and financial derivative instruments by using independent market feeds and broker statements. We compared the prices published by independent pricing sources to the financial assets and financial instruments portfolio.

Existence of financial assets at fair value through profit or loss and financial derivative instrume

Key audit matter description

For the financial year ended the financial assets at fair value through profit or loss and financial derivative instruments of the ICAV represents 98% of total net assets.

The existence of the financial assets at fair value through profit or loss and financial derivative instruments is crucial to ensuring the annual accounts are free from material misstatement and involved significant audit effort in performing audit procedures. There is a risk that the financial assets may not exist at year end.

Refer also to note 2c and 10 in the annual accounts.

How the scope of our audit responded to the key audit matter

We have performed the following procedures to address the key audit matter:

- We obtained the Brown Brothers Harriman Fund Administration Services (Ireland) Limited SOC 1 Report in order to gain an understanding and evaluate the design and implementation of key controls over the existence process for financial assets at fair value through profit or loss and financial derivative instruments; and
- We obtained independent confirmations from the depositary and a selection of brokers at the financial year end and agreed the amounts held to the financial assets and financial derivative instruments portfolio.

Our audit procedures relating to these matters were designed in the context of our audit of the annual accounts as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the annual accounts is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

Our application of materiality

We define materiality as the magnitude of misstatement in the annual accounts that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the annual accounts as a whole as follows:

Basis for determining materiality

0.5% of Average Net Assets of each sub-fund (2024: 0.5% of Average Net Assets of each sub-fund)

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIDELITY UCITS II ICAV

Rationale for the benchmark applied

We have considered the Average Net Assets to be the critical component for determining materiality because the main objective of each Sub-Fund is to provide shareholders with a total return and thus the Average Net Assets was deemed to be the most appropriate measure for the primary users (shareholders) of the annual accounts.

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the annual accounts as a whole.

Performance materiality was set at 80% of materiality for the 2025 audit (2024: 80%). In determining performance materiality, we considered the following factors:

- our understanding of the ICAV;
- the quality of the control environment and whether we were able to rely on controls;
- the nature and extent of misstatements identified in previous audits; and
- our expectations in relation to misstatements in the current period.

We agreed with the Board of Directors that we would report to them all audit differences in excess of 5% of materiality (2024 : 5% of materiality) as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Board of Directors on disclosure matters that we identified when assessing the overall presentation of the annual accounts.

An overview of the scope of our audit

Our audit is a risk based approach taking into account the structure of the ICAV, types of financial assets, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the ICAV operates. The ICAV was registered in Ireland pursuant to the ICAV Act. The ICAV is authorised by the Central Bank of Ireland (the "Central Bank") as a UCITS (Undertaking for Collective Investment in Transferable Securities) pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011. The ICAV is organised as an open-ended umbrella fund with segregated liability between sub-funds. We assess the risks of each sub-fund separately. We have conducted our audit based on the books and records maintained by the administrator Brown Brothers Harriman Fund Administration Services (Ireland) Limited at 30 Herbert Street, Dublin 2, Ireland.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the annual accounts and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements.

Our opinion on the annual accounts does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual accounts or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the annual accounts or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIDELITY UCITS II ICAV

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the annual accounts and for being satisfied that they give a true and fair view and otherwise comply with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the directors are responsible for assessing the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the annual accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

A further description of our responsibilities for the audit of the annual accounts is located on IAASA's website at: https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance;
- results of our enquiries of management about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the ICAV's documentation of their policies and procedures relating to:
 - o identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
 - o the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations; and
- the matters discussed among the audit engagement team and relevant internal specialists, including IT specialists regarding how and where fraud might occur in the annual accounts and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the following areas:

related to revenue recognition with respect to the movement in unrealized gain/(loss) on financial assets at fair value through profit or loss and financial derivative instruments.

In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIDELITY UCITS II ICAV

We also obtained an understanding of the legal and regulatory framework that the ICAV operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the annual accounts. The key laws and regulations we considered in this context included the ICAV Act and the Applicable Regulations.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the annual accounts but compliance with which may be fundamental to the ICAV's ability to operate or to avoid a material penalty. These included the applicable Listing Rules and matters as regulated by the Central Bank of Ireland.

Audit response to risks identified

As a result of performing the above, we did not identify any key audit matters related to the potential risk of fraud or non-compliance with laws and regulations.

Our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the annual accounts;
- enquiring of management and the Board of Directors concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance and reviewing correspondence with the Central Bank of Ireland;
- In addressing the risk of fraud in revenue recognition with respect to the movement in unrealized gain/(loss) on financial assets at fair value through profit or loss and financial derivative instruments, we completed an unrealized gain/loss reconciliation by comparing the opening unrealized gain/loss to the closing unrealized gain/loss and comparing the movement to the balance per the annual accounts;
- In addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Report on other legal and regulatory requirements

Matters on which we are required to report by the ICAV Act and Applicable Regulations

In our opinion, the information given in the directors' report is consistent with the annual accounts and the directors' report has been prepared in accordance with the ICAV Act.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIDELITY UCITS II ICAV

Matters on which we are required to report by exception

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Opinion on other matters prescribed by the Applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the annual accounts to be readily and properly
 audited.
- The annual accounts are in agreement with the accounting records.

Other matters which we are required to address

We were appointed by the Board of Directors on 24 July 2019 to audit the annual accounts for the financial year end ending 31 January 2020. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 6 years, covering the years ending 31 January 2020 to 31 January 2025.

The non-audit services prohibited by IAASA's Ethical Standard were not provided and we remained independent of the ICAV in conducting the audit.

Our audit opinion is consistent with the additional report to the audit committee we are required to provide in accordance with ISA (Ireland) 260.

Use of our report

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act. Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

APPENDIX 2 - REPORT OF REMUNERATION (UNAUDITED)

Remuneration Disclosure

The Fund is managed by FIL Investment Management (Luxembourg) S.à r.l., Ireland Branch ('FIMLUX').

FIMLUX is a UCITS licensed Management Company and wholly owned subsidiary of FIL Limited ('FIL'). The FIL Group, consisting of FIL and its subsidiaries, has approved a remuneration policy which is applicable to all constituent parts of the group. In addition, FIMLUX has its own remuneration policy which closely reflects the FIL group policy. In the implementation of its policy, FIMLUX will ensure good corporate governance and promote sound and effective risk management.

Remuneration Policy

The remuneration policy does not encourage any risk taking which would be inconsistent with the risk appetite of the Fund, or the Prospectus. FIMLUX will ensure that any decisions are consistent with the overall business strategy, objectives and the remuneration policy and try to avoid any conflicts of interest which may arise.

Fixed remuneration is defined as base salary plus other benefits. Base salaries are set competitive to local market, based on an individual's specific role and responsibilities as well as their relevant experience, qualifications, performance and overall contribution to FIL. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses and long-term incentive awards. These discretionary pay elements are determined by individual performance and overall company affordability (set taking into consideration the financial and non-financial performance and associated business and operational risks).

A summary of the Remuneration Policy is available at https://www.fidelityinternational.com.

FIMLUX will ensure that the remuneration policy is reviewed internally and independently annually. There have not been any material changes to the adopted remuneration policy since the last review performed in December 2024 and the review outcome showed no exception. The Remuneration Policy applies to all employees of FIMLUX, including individuals whose professional activities have a material impact on the risk profile of the Management Company or the UCITS Funds it manages ('UCITS Identified Staff'). The UCITS identified staff include members of the Board of the Management Company, senior management, heads of relevant control functions and heads of other key functions. Individuals are notified of their identification and the implications of this status on at least an annual basis.

Total Remuneration paid to staff of the Management Company and to its delegates*

for the financial year ended 31/12/2024 EUR 11,330,971
Of which, fixed remuneration EUR 8,760,560
Of which, variable remuneration EUR 2,570,411

Total number of employees of the Management Company and its

delegates* (as at 31/12/2024)

Portion of remuneration that is attributable to the Fund (as at 31/12/2024)

3.36%

^{*} The information included for the delegates are pertaining to the Material Risk Takers identified under the delegation.

APPENDIX 3 – TRACKING ERROR (UNAUDITED)

Each of the Index Tracking Sub-Funds employ a "passive" investment strategy designed to replicate the performance of the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably possible (for example as a result of the number of securities or the illiquidity of certain securities within the Index), the Sub-Funds will use optimisation to select the Index securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

Tracking error measures the volatility of the return difference between each Index Tracking Sub-Fund and the Index. It is calculated as the standard deviation of the delivered excess returns over an annual period. Anticipated tracking error is disclosed for the Index Tracking Sub-Funds in the table below. Realised (ex-post) tracking error may vary from the anticipated tracking error, depending on a range of circumstances. These include transaction costs, securities lending income and withholding tax differences. The anticipated tracking error and ex-post tracking error are not expected to vary significantly under normal circumstances.

For the financial year ended 31 January 2025, the anticipated tracking errors and the ex-post tracking errors were as follows:

Sub-Fund	Anticipated tracking error (bps)	Ex-post tracking error (bps)
Fidelity MSCI Emerging Markets Index Fund	50	58*
Fidelity MSCI Europe Index Fund	20	9
Fidelity MSCI Japan Index Fund	40	18
Fidelity MSCI Pacific ex-Japan Index Fund	40	3
Fidelity MSCI World Index Fund	20	4
Fidelity S&P 500 Index Fund	15	1
Fidelity Global Government Bond Climate Aware UCITS ETF	50	19

^{*}The Ex-post tracking error increase over the anticipated tracking error was due to India capital gains tax impact.

The table below compares the realised Sub-Fund's performance against the performance of the relevant benchmark Index during the financial year ended 31 January 2025. An explanation for the difference gross of TER is provided:

	Sub-Fund return for the	Benchmark return for the				
	financial year ended	financial year ended	Tracking difference		Tracking difference	
	31 January	31 January	net of		gross of	
	2025	2025	TER	TER	TER	Explanation of the gross
Sub-Fund	%	%	%	%	%	tracking difference
Fidelity MSCI Emerging	14.92	14.75	0.17	0.20	0.37	The outperformance of the Sub-
Markets Index Fund						Fund was due to the sampling techniques employed.
Fidelity MSCI Europe Index Fund	14.20	13.82	0.38	0.10	0.48	The outperformance of the Sub Fund was due to the sampling techniques employed.
Fidelity MSCI Japan Index Fund	5.21	5.15	0.06	0.10	0.16	The outperformance of the Sub- Fund was due to the sampling techniques employed.
Fidelity MSCI Pacific ex- Japan Index Fund	12.24	12.24	-	0.13	0.13	The outperformance of the Sub- Fund was due to the sampling techniques employed.
Fidelity MSCI World Index Fund	21.41	21.44	(0.03)	0.12	0.09	The outperformance of the Sub- Fund was due to the sampling techniques employed.
Fidelity S&P 500 Index Fund	25.89	25.86	0.03	0.06	0.09	The outperformance of the Sub- Fund was due to the sampling techniques employed.
Fidelity Global Government Bond Climate Aware UCITS ETF	(1.13)	(1.59)	0.46	0.20	0.66	The outperformance of the Sub- Fund was due to the sampling techniques employed

APPENDIX 4 - SECURITIES FINANCING TRANSACTIONS (UNAUDITED)

The Securities Financing Transactions ("SFTs") Regulation (the "Regulation") came into force on 12 January 2016 and introduced additional disclosure requirements around securities lending, repurchase agreement/reverse repurchase agreements, total return swaps (TRSs) and other lending/borrowing transactions in annual and semi-annual financial statements, published after 13 January 2017. The Regulation came about due to what was perceived as 'shadow banking' risk in the securities financing markets and aims to reduce this risk by improving transparency in the securities financing markets in a number of ways:

- By imposing conditions on the 'reuse' of collateral, so that clients and counterparties understand the risks involved and give their consent to the reuse,
- By requiring managers to make detailed disclosures to their investors of the use they make of SFTs both in their periodic financial statements and pre-contractual documentation: and
- By requiring counterparties to report SFTs to a trade repository so as to provide transparency to regulators on the use of SFTs by market participants.

As the Sub-Funds did not hold any SFTs as at 31 January 2025, the report for the financial year end 31 January 2025 and financial statements do not include any additional disclosures.

For the financial year ended 31 January 2025

The Shareholder's Rights Directive II ("SRD II") is EU legislation which is applicable within Irish law from 30 March 2020. Under SRD II Asset Managers are required to provide additional annual information regarding the risks and composition of the portfolio.

Key material medium to long-term risks associated with the investments

Please refer to Note 10 for a detailed analysis of the risk management policies and procedure that effect the Sub-Funds.

Portfolio composition

Refer to each Sub-Fund's Schedule of Investments from page 25 to 194 for details of the portfolio composition by investment type and geographic location.

As at 31 January 2025, the following tables outline the Top 10 holdings by market value of each Sub-Fund.

Portfolio Turnover Rate

SRD II does not define a methodology for calculating the Portfolio Turnover Rate ("PTR"). For the purpose of these financial statements the following formula has been applied when calculating PTR.

PTR = (purchases + sales) - (subscriptions + redemptions) / average 12-month net asset value attributable to shareholders.

For the year financial year ended 31 January 2025 the PTR of each Fund is as follows:

Sub-Fund	PTR
Fidelity MSCI Emerging Markets Index Fund	(23.14)%
Fidelity MSCI Europe Index Fund	(52.45)%
Fidelity MSCI Japan Index Fund	(39.12)%
Fidelity MSCI Pacific ex-Japan Index Fund	(33.35)%
Fidelity MSCI World Index Fund	(56.65)%
Fidelity S&P 500 Index Fund	(62.53)%
Fidelity Enhanced Reserve Fund	30.28%
Fidelity Global Credit ex-US Fund	96.36%
Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF	194.73%
Fidelity Sustainable USD EM Bond UCITS ETF	164.44%
Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF	162.81%
Fidelity Global Government Bond Climate Aware UCITS ETF	45.73%

Portfolio Turnover Rate (continued)

Sub-Fund	PTR
Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF	100.81%
Fidelity Sustainable EUR Corporate Bond Paris-Aligned Multifactor UCITS ETF	93.83%
Fidelity Sustainable USD High Yield Bond Paris Multifactor UCITS ETF1	(8.89)%
Fidelity Sustainable EUR High Yield Bond Paris Multifactor UCITS ETF1	(78.32)%

¹ The Sub-Fund launched on 22 October 2024.

Portfolio Turnover Cost

Portfolio Turnover Costs ("PTC") is calculated as follows:

PTC = PTR (capped at 100%) x transaction cost

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability. For the financial year ended 31 January 2025 the PTC of each Sub-Fund is as follows:

Sub-Fund	PTC
Fidelity MSCI Emerging Markets Index Fund	-0.01%
Fidelity MSCI Europe Index Fund	-0.06%

¹ The Sub-Fund launched on 22 October 2024.

APPENDIX 6 - SUSTAINABLE FINANCE DISCLOSURE REGULATION (UNAUDITED)

Per the Sustainable Finance Disclosure Regulation ('SFDR') the following Sub-Fund is classified as Article 8:

- Fidelity Sustainable USD EM Bond UCITS ETF,
- Fidelity Global Government Bond Climate Aware UCITS ETF.

Per SFDR the following Sub-Funds are classified as Article 9:

- Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF,
- Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF,
- Fidelity Sustainable USD Corporate Bond Paris-Aligned Multifactor UCITS ETF,
- Fidelity Sustainable EUR Corporate Bond Paris-Aligned Multifactor UCITS ETF,
- Fidelity Sustainable USD High Yield Bond Paris-Aligned Multifactor UCITS ETF,
- Fidelity Sustainable EUR High Yield Bond Paris-Aligned Multifactor UCITS ETF.

All other Sub-Funds are classified as Article 6 Funds, meaning their investments do not take into account the EU criteria for environmentally sustainable economic activities.

Percentages contained in the SFDR Annexes are subject to rounding.

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the

investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Fidelity Sustainable Global Corporate Bond Paris-Aligned Multifactor UCITS ETF

Legal entity identifier: 254900UAY8JJLQGX4O56

Sustainable investment objective

	×	qua	conomic activities that do not lify as environmentally tainable under the EU Taxonomy			with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
			sustainable investments with a bjective:%		It pr	omoted E/S characteristics, but did not te any sustainable investments			

To what extent was the sustainable investment objective of this financial product met?

With effect from 30 July 2024, the Sub-Fund's approach towards sustainable investment objectives was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the sub-fund's precontractual disclosure. While the Sub-Fund now operates under the updated framework, there is no change in how the sub-fund approach sustainable investment objective.

The Sub-Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The sustainable investment objective of the sub-fund was to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve income and capital growth.

The reduction of carbon emission objective of the Sub-Fund was aligned with the Solactive Paris Aligned Global Corporate USD Index (the "Benchmark"). The Benchmark tracked the performance of investment grade corporate debt securities publicly issued globally while at the same time aligning with the Paris Agreement's climate targets on greenhouse gas emission reduction (the "EU PAB Emission Reduction Requirements"). The EU PAB Emission Reduction Requirements required the Benchmark to exhibit a level of emission intensity 50% lower than an equivalent global market universe (which does not integrate alignment with the Paris Agreement) at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. As a result of complying with the EU PAB Emission Reduction Requirements and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark was labelled as an EU Paris Aligned Benchmark.

The Sub-Fund considers that investment in a constituent of the Benchmark is an investment in

objectives of this

attained.

financial product are

economic activities with an environmental objective (that do not qualify as environmentally sustainable under the EU Taxonomy) and therefore investment in a constituent of the Benchmark is a sustainable investment.

The Sub-Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the Sub-Fund:

- i) the percentage of the Sub-Fund invested in sustainable investments: 99.43%
- ii) the percentage of the Sub-Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 97.78%
- iii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the previous reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund:

- i) the percentage of the Sub-Fund invested in sustainable investments: 98.52%
- ii) the percentage of the Sub-Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 97.48%
- iii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in controversies and activities that caused significant harm, including the exclusion of issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms (such as United Nations Global Compact (UNGC) principles) and with a significant negative impact on certain sustainable development goals ("SDGs"), including SDG 12: Responsible Consumption and Production, SDG 13: Climate Action, SDG 14: Life Below Water and SDG 15: Life on Land.

How were the indicators for adverse impacts on sustainability factors taken into account?

Quantitative data (where available) on PAI indicators was used to evaluate whether an issuer was involved in activities that caused significant harm to any environmental or social objective.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Benchmark excluded companies with verified failure to respect established norms such as the United Nations Global Compact (UNGC) principles, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, or UN Guiding Principles for Business and Human Rights.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions When investing directly in corporate issuers, the Sub-Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/02/2024 -

31/01/2025

Source of data: Fidelity International, as at 31 January 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Sub-Fund invested 99.43% in sustainable investments

What was the asset allocation?

The proportion of the investments of the Sub-Fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 99.43%, which corresponds to the proportion in sustainable investments. This included 1.65% have an environmental objective (which is aligned with the EU Taxonomy), 97.78% have an environmental objective (which is not aligned with the EU Taxonomy) and 0% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

investments in specific

Asset allocation describes the share of

assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

Source of data: Fidelity International, as at 31 January 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.65%. This contributed to the environmental objectives of climate change mitigation and climate change adaptation.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-

carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee

economy.
- operational
expenditure (OpEx)
reflecting green
operational activities of
investee companies.

companies, e.g. for a

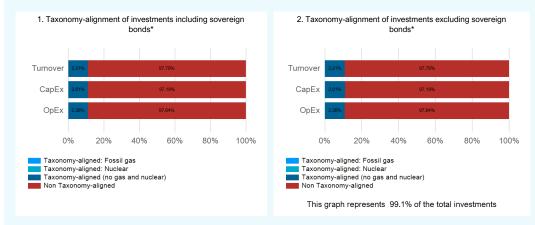

transition to a green

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy. The data included the contribution to the environmental objectives of climate change mitigation and adaptation. In a next iteration, this data will be enriched towards other EU Taxonomy environmental objectives, such as sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control and protection and restoration of biodiversity and ecosystems.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. The EU Taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.05% for transitional activities and 1.65% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.8% based on Turnover, 0.8% based on CapEx and 0.7% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.8% based on Turnover, 0.8% based on CapEx and 0.7% based on OpEx.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 97.78%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 0%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Sub-Fund were invested in

- (i) instruments that were previously constituents of the Benchmark which may be held for a transition period after they fall out of the Benchmark in a manner appropriate to protect the best interests of investors and will then be divested; and
- (ii) cash, investments used for hedging and efficient portfolio management purposes. In addition, all direct investments of the Sub-Fund were adhere to the Exclusions, do no significant harm to environmental or social objectives, have good governance practices and did not affect the delivery of the sustainable investment objective.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Sub-Fund attained the sustainable investment objective of alignment with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and achieved income and capital growth by tracking the performance of the Benchmark. The Sub-Fund's portfolio is aligned with the carbon emission performance of the Benchmark, which in turn is aligned with the EU PAB Emission Reduction Requirements. Fidelity have a Quarterly Sustainability Review for all our Article 9 funds, to monitor principal adverse impacts. Fidelity have actively engaged with issuers.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

The Benchmark has been designated as a reference benchmark to meet the sustainable investment objective.

How did the reference benchmark differ from a broad market index?

The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's sustainable investment objective was aligned with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio (i.e., by adhering to the EU PAB Emission Reduction Requirements) and to achieve income and capital growth. As also described above, the Benchmark was labelled as an EU Paris Aligned Benchmark, which means it also adhered to the EU PAB Emission Reduction Requirements. As such, the Benchmark was consistent with the sub-fund's investment objective.

How did this financial product perform compared with the reference benchmark?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark.

How did this financial product perform compared with the broad market index?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark. The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

(EU) 2020/852 establishing a list of

investee companies

practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

With effect from 31 July 2024, the Sub-Fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the Sub-Funds precontractual disclosure.

Based on this circumstance, this year's reporting was adapted:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted to the average of the data as of 30 April 2024 and 30 July 2024.
- the data 'ESG score", which is a new data as from 31 July 2024, was the average of the monthly datapoints for the period from 31 July 2024 to 31 January 2025 due to specific circumstances.
- the data 'sustainable investments' and its variations, was unchanged and reported as a quarterly average of the data at the end of the calendar as of 30 April 2024, 31 July 2024, 31 October 2024 and 31 January 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 31 January 2025

Prior to 30 July 2024, the Sub-Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The Sub-Fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the Sub-Fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The Sub-Fund promoted environmental and social characteristics by achieving an ESG score of its portfolio greater than the ESG score of the Benchmark (JP Morgan ESG EMBI Global Diversified Index). The

Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product are

attained.

Benchmark was designated as a reference benchmark for the purpose of attaining the environmental and social characteristics promoted. The Benchmark applied an ESG scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower. The screens applied by the Benchmark as part of its methodology were defined by the index provider and based on globally recognised standards and principles in areas such as environmental protection and human rights, and exclude for instance issuers that either participate in, or derive revenue from, activities such as the manufacture of controversial weapons, thermal coal or tobacco and UN Global Compact Violators. ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the Benchmark. The weighted average ESG score of the Sub-Fund's portfolio was measured against the ESG score of the Benchmark using either a weighted average or equal weighted method of calculation.

The Sub-Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 February 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund:

- i) the percentage of the Sub-Fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.25%
- ii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

For the period 31 July 2024 - 31 January 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund: i) the ESG score of the Sub-Fund's portfolio measured against the ESG score of the Benchmark: 4.58 vs 4.49

ii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 February 2023 - 31 January 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund:

- i) the percentage of the sub-fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 98.17%
- ii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this fund.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sub-Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Sub-Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this fund.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions When investing directly in corporate issuers, the Sub-Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 16: Investee countries subject to social violations.
- (iii) Quarterly reviews discussion and review of principal adverse impacts through the Sub-Fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/02/2024 - 31/01/2025

Asset allocation describes the share of

assets.

investments in specific

What was the proportion of sustainability-related investments?

The Sub-Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this fund.

What was the asset allocation?

The proportion of the investments of the sub-fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.17%, which corresponds to the proportion in securities with an ESG rating.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

F Fidelity

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Basic Materials	Mining	1.13%
Energy	Oil & Gas	1.83%
Financial	Investment Companies	2.5%
	Banks	1.07%
Government	Sovereign	86.6%
Industrial	Transportation	0.96%
	Engineering & Construction	0.17%
Utilities	Electric	0.94%

Source of data: Fidelity International, as at 31 January 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy. Even though the fund did not have such commitment, it may have invested into this type of investments.

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the environmental objectives of climate change mitigation and climate change adaptation.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy. The data included the contribution to the environmental objectives of climate change mitigation and adaptation. In a next iteration, this data will be enriched towards other EU Taxonomy environmental objectives, such as sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control and protection and restoration of biodiversity and ecosystems.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

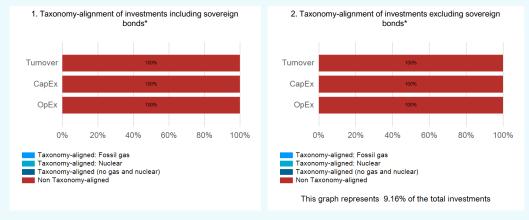

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes☐ In fossil gas☐ In nuclear energy☑ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. The EU Taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective not aligned with the EU Taxonomy. Even though the fund did not have such commitment, it may have invested into this type of investments.

What was the share of socially sustainable investments?

The Sub-Fund did not commit itself to having a minimum proportion of socially sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Sub-Fund were invested in assets aligned with the financial objective of the Sub-Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Sub-Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund took the following actions to meet the environmental or social characteristics:

- 1. Until 30 July 2024, the Sub-Fund invested in securities of issuers with favourable ESG characteristics.
- 2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
- 3. The Sub-Fund has applied the Exclusions.
- 4. As from 31 July 2024, the Sub-Fund achieved an ESG score of its portfolio greater than that of the Benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the Benchmark.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

The Benchmark has been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

The Benchmark applied an ESG scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower

The screens applied by the Benchmark as part of its methodology were defined by the index provider and based on globally recognised standards and principles in areas such as environmental protection and human rights, and excluded for instance issuers that either participated in, or derived revenue from, activities such as the manufacture of controversial weapons, thermal coal or tobacco and UN Global Compact Violators.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Sub-Fund achieved an ESG score of its portfolio greater than the ESG score of the Benchmark. The Benchmark applied an ESG scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower.

How did this financial product perform compared with the reference benchmark?

The Sub-Fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the Benchmark. The Investment Manager undertook monitoring of the Sub-Fund's ESG score on a periodic basis and the Sub-Fund aimed to achieve its ESG score targets by adjusting its portfolio on an ongoing basis.

How did this financial product perform compared with the broad market index?

The Sub-Fund aimed to achieve an ESG score of its portfolio greater than the ESG score of the Benchmark.

The Benchmark applied an ESG scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower.

The screens applied by the Benchmark as part of its methodology were defined by the index provider and based on globally recognised standards and principles in areas such as environmental protection and human rights, and excluded for instance issuers that either participated in, or derived revenue from, activities such as the manufacture of controversial weapons, thermal coal or tobacco and UN Global Compact Violators.

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Product name: Fidelity Sustainable Global High Yield Bond Paris-Aligned Multifactor UCITS ETF Legal entity identifier: 254900MS148ET4PT4191

	×	qu	economic activities that do not alify as environmentally stainable under the EU Taxonomy			with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
			sustainable investments with a bjective:%			omoted E/S characteristics, but did not e any sustainable investments		

To what extent was the sustainable investment objective of this financial product met?

With effect from 30 July 2024, the Sub-Fund's approach towards sustainable investment objectives was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the sub-fund's precontractual disclosure. While the Sub-Fund now operates under the updated framework, there is no change in how the sub-fund approach sustainable investment objective.

The Sub-Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The sustainable investment objective of the sub-fund was to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve income and capital growth.

The reduction of carbon emission objective of the Sub-Fund was aligned with the Solactive Paris Aligned Global Corporate High Yield USD Index (the "Benchmark"). The Benchmark tracked the performance of investment grade corporate debt securities publicly issued globally while at the same time aligning with the Paris Agreement's climate targets on greenhouse gas emission reduction (the "EU PAB Emission Reduction Requirements"). The EU PAB Emission Reduction Requirements required the Benchmark to exhibit a level of emission intensity 50% lower than an equivalent global market universe (which does not integrate alignment with the Paris Agreement) at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. As a result of complying with the EU PAB Emission Reduction Requirements and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark was labelled as an EU Paris Aligned Benchmark.

The Sub-Fund considers that investment in a constituent of the Benchmark is an investment in economic activities with an environmental objective (that do not qualify as environmentally sustainable under the EU Taxonomy) and therefore investment in a constituent of the Benchmark is a sustainable investment.

investment in an

contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

investment means an

economic activity that

The **EU Taxonomy** is a classification system laid down in Regulation

The Sub-Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the Sub-Fund:

- i) the percentage of the Sub-Fund invested in sustainable investments; 97.88%
- ii) the percentage of the Sub-Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 97.18%
- iii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the previous reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund:

- i) the percentage of the Sub-Fund invested in sustainable investments: 97.96%
- ii) the percentage of the Sub-Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 97.6%
- iii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in controversies and activities that caused significant harm, including the exclusion of issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms (such as United Nations Global Compact (UNGC) principles) and with a significant negative impact on certain sustainable development goals ("SDGs"), including SDG 12: Responsible Consumption and Production, SDG 13: Climate Action, SDG 14: Life Below Water and SDG 15: Life on Land.

How were the indicators for adverse impacts on sustainability factors taken into account?

Quantitative data (where available) on PAI indicators was used to evaluate whether an issuer was involved in activities that caused significant harm to any environmental or social objective.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Benchmark excluded companies with verified failure to respect established norms such as the United Nations Global Compact (UNGC) principles, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, or UN Guiding Principles for Business and Human Rights.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions When investing directly in corporate issuers, the Sub-Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/02/2024 -

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Sub-Fund invested 97.88% in sustainable investments

What was the asset allocation?

The proportion of the investments of the Sub-Fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 97.88%, which corresponds to the proportion in sustainable investments. This included 0.7% have an environmental objective (which is aligned with the EU Taxonomy), 97.18% have an environmental objective (which is not aligned with the EU Taxonomy) and 0% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

economy.

M

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

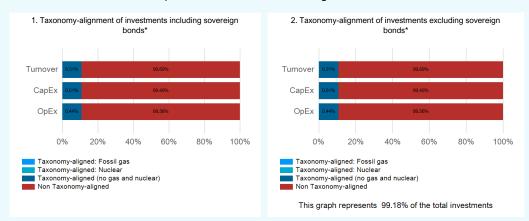

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.7%. This contributed to the environmental objectives of climate change mitigation and climate change adaptation.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy. The data included the contribution to the environmental objectives of climate change mitigation and adaptation. In a next iteration, this data will be enriched towards other EU Taxonomy environmental objectives, such as sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control and protection and restoration of biodiversity and ecosystems.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. The EU Taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.04% for transitional activities and 0.13% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover,0.1% based on CapEx and 0.1% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.1% based on CapEx and 0.1% based on OpEx.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 97.18%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 0%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Sub-Fund were invested in

- (i) instruments that were previously constituents of the Benchmark which may be held for a transition period after they fall out of the Benchmark in a manner appropriate to protect the best interests of investors and will then be divested; and
- (ii) cash, investments used for hedging and efficient portfolio management purposes. In addition, all direct investments of the Sub-Fund were adhere to the Exclusions, do no significant harm to environmental or social objectives, have good governance practices and did not affect the delivery of the sustainable investment objective.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Sub-Fund attained the sustainable investment objective of alignment with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and achieved income and capital growth by tracking the performance of the Benchmark. The Sub-Fund's portfolio is aligned with the carbon emission performance of the Benchmark, which in turn is aligned with the EU PAB Emission Reduction Requirements. Fidelity have a Quarterly Sustainability Review for all our Article 9 funds, to monitor principal adverse impacts. Fidelity have actively engaged with issuers.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

The Benchmark has been designated as a reference benchmark to meet the sustainable investment objective.

How did the reference benchmark differ from a broad market index?

The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's sustainable investment objective was aligned with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio (i.e., by adhering to the EU PAB Emission Reduction Requirements) and to achieve income and capital growth. As also described above, the Benchmark was labelled as an EU Paris Aligned Benchmark, which means it also adhered to the EU PAB Emission Reduction Requirements. As such, the Benchmark was consistent with the sub-fund's investment objective.

How did this financial product perform compared with the reference benchmark?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark.

How did this financial product perform compared with the broad market index?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark. The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fidelity Global Government Bond Climate Aware **UCITS ETF**

Legal entity identifier: 254900EDA0OI5E2BQS12

The **EU Taxonomy** is a classification system laid down in Regulation

To what extent were the environmental and/or social characteristics promoted by this financial product met?

With effect from 30 July 2024, the sub-fund's approach towards sustainable investment objectives was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the sub-fund's precontractual disclosure.

Based on this circumstance, this year's reporting was adapted:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted to the average of the data as of 30 April 2024 and 30 July 2024.
- the data 'constituents of the Index', which is a new data as from 30 July 2024, is the average of the monthly datapoints for the period from 31 July 2024 to 31 January 2025 due to specific circumstances.
- the data 'top investments' and 'sector' were unchanged and reported as of the year-end 31 January 2025.

The sub-fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The sustainable investment objective of the sub-fund was passively managed and promoted environmental and social characteristics by tracking the performance of the Solactive Paris Aware Global Government USD Index (the "Index") which aligned to achieve a reduction in carbon emission intensity on an ongoing basis as part of the index construction process.

The Index was designed to reflect the performance of global local currency government bonds, issued by investment grade countries, while at the same time aiming to exhibit a level of carbon emission intensity 14% lower than the investible universe at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. The Index has been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

The sub-fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 February 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the sub-fund:

- (i) the percentage of the sub-fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 99.14%.
- (ii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

For the period 31 July 2024 - 31 January 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the sub-fund:

- (i) the percentage of securities invested in constituents of the Index: 99.8%
- (ii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 February 2023 - 31 January 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the sub-fund:

- i) the percentage of the sub-fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 99.36%.
- ii) the percentage of the sub-fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund did not commit itself to having a minimum proportion of sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this fund.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sub-fund did not commit itself to having a minimum proportion of sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

The sub-fund did not commit itself to having a minimum proportion of sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sub-fund did not commit itself to having a minimum proportion of sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this fund.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) GHG intensity GHG intensity of investee countries was incorporated as a consideration within the Index methodology.
- (ii) Exclusions When investing directly in corporate issuers, the sub-fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 16. Investee countries subject to social violations.
- (iii) ESG rating For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression. (iv) Quarterly reviews discussion and review of principal adverse impacts through the sub-fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/02/2024 - 31/01/2025

Source of data: Fidelity International, as at 31 January 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Sub-Fund did not commit itself to having a minimum proportion of sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments, but is not monitored for this fund.

What was the asset allocation?

The proportion of the investments of the sub-fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 99.8%, which corresponds to the proportion of the investments of the sub-fund invested in securities which replicate the Index.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Government	Sovereign	92.72%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy. Even though the Sub-Fund did not have such commitment, it may have invested into this type of investments.

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the environmental objectives of climate change mitigation and climate change adaptation.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy. The data included the contribution to the environmental objectives of climate change mitigation and adaptation. In a next iteration, this data will be enriched towards other EU Taxonomy environmental objectives, such as sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control and protection and restoration of biodiversity and ecosystems.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	☐ In fossil gas	☐ In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies.

 capital expenditure (CapEx) showing the green investments made by investee

transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

companies, e.g. for a

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. The EU Taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

e sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective not aligned with the EU Taxonomy. Even though the fund did not have such commitment, it may have invested into this type of investments.

What was the share of socially sustainable investments?

The Sub-Fund did not commit itself to having a minimum proportion of socially sustainable investments. Even though the fund did not have such commitment, it may have invested into this type of investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Sub-Fund were invested in assets aligned with the financial objective of the Sub-Fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the Sub-Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund took the following actions to meet the environmental or social characteristics:

- 1. Until 30 July 2024, the sub-fund invested in securities of issuers with favourable ESG characteristics.
- 2. Quarterly Sustainability Review to discuss and review the sub-fund's qualitative and quantitative environmental and social characteristics.
- 3. The sub-fund has applied the Exclusions.
- 4. As from 31 July 2024, the sub-fund promoted environmental and social characteristics by tracking the performance of the Index which aims to achieve a reduction in carbon emission intensity on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

The Index aimed to exhibit a level of carbon emission intensity 14% lower than the investible universe at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The sub-fund's sustainable investment objective was to track the performance of the Index which aimed to achieve a reduction in carbon emission intensity on an ongoing basis. As described, the Index aimed to achieve a reduction in carbon emission intensity on an ongoing basis. The Index was therefore consistent with the environmental characteristics promoted by the Sub-Fund.

How did this financial product perform compared with the reference benchmark?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Index.

How did this financial product perform compared with the broad market index?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Index. The Index aimed to exhibit a level of carbon emission intensity 14% lower than the investible universe at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies

follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

	×	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective 			
		ade sustainable investments with a all objective:%					

To what extent was the sustainable investment objective of this financial product met?

With effect from 30 July 2024, the Sub-Fund's approach towards sustainable investment objectives was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the sub-fund's precontractual disclosure. While the Sub-Fund now operates under the updated framework, there is no change in how the sub-fund approach sustainable investment objective.

The Sub-Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The sustainable investment objective of the sub-fund was to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve income and capital growth.

The reduction of carbon emission objective of the Sub-Fund was aligned with the Solactive USD Corporate IG PAB Index (the "Benchmark"). The Benchmark tracked the performance of investment grade corporate debt securities publicly issued globally while at the same time aligning with the Paris Agreement's climate targets on greenhouse gas emission reduction (the "EU PAB Emission Reduction Requirements"). The EU PAB Emission Reduction Requirements required the Benchmark to exhibit a level of emission intensity 50% lower than an equivalent global market universe (which does not integrate alignment with the Paris Agreement) at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. As a result of complying with the EU PAB Emission Reduction Requirements and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark was labelled as an EU Paris Aligned Benchmark.

The Sub-Fund considers that investment in a constituent of the Benchmark is an investment in economic activities with an environmental objective (that do not qualify as environmentally sustainable under the EU Taxonomy) and therefore investment in a constituent of the Benchmark is a sustainable investment.

indicators measure

how the sustainable

financial product are

objectives of this

attained.

The Sub-Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the Sub-Fund:

- i) the percentage of the Sub-Fund invested in sustainable investments; 99.49%
- ii) the percentage of the Sub-Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 99.26%
- iii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the previous reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund:

- i) the percentage of the Sub-Fund invested in sustainable investments: 99.41%
- ii) the percentage of the Sub-Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 98.92%
- iii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in controversies and activities that caused significant harm, including the exclusion of issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms (such as United Nations Global Compact (UNGC) principles) and with a significant negative impact on certain sustainable development goals ("SDGs"), including SDG 12: Responsible Consumption and Production, SDG 13: Climate Action, SDG 14: Life Below Water and SDG 15: Life on Land.

How were the indicators for adverse impacts on sustainability factors taken into account?

Quantitative data (where available) on PAI indicators was used to evaluate whether an issuer was involved in activities that caused significant harm to any environmental or social objective.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Benchmark excluded companies with verified failure to respect established norms such as the United Nations Global Compact (UNGC) principles, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, or UN Guiding Principles for Business and Human Rights.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions When investing directly in corporate issuers, the Sub-Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Sub-Fund invested 99.49% in sustainable investments

What was the asset allocation?

The proportion of the investments of the Sub-Fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 99.49%, which corresponds to the proportion in sustainable investments. This included 0.23% have an environmental objective (which is aligned with the EU Taxonomy), 99.26% have an environmental objective (which is not aligned with the EU Taxonomy) and 0% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

Source of data: Fidelity International, as at 31 January 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies. The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.23%. This contributed to the environmental objectives of climate change mitigation and climate change adaptation.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy. The data included the contribution to the environmental objectives of climate change mitigation and adaptation. In a next iteration, this data will be enriched towards other EU Taxonomy environmental objectives, such as sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control and protection and restoration of biodiversity and ecosystems.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. The EU Taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.01% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.1% based on CapEx and 0.1% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover,0.1% based on CapEx and 0.1% based on OpEx.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 99.26%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 0%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Sub-Fund were invested in

- (i) instruments that were previously constituents of the Benchmark which may be held for a transition period after they fall out of the Benchmark in a manner appropriate to protect the best interests of investors and will then be divested; and
- (ii) cash, investments used for hedging and efficient portfolio management purposes. In addition, all direct investments of the Sub-Fund were adhere to the Exclusions, do no significant harm to environmental or social objectives, have good governance practices and did not affect the delivery of the sustainable investment objective.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Sub-Fund attained the sustainable investment objective of alignment with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and achieved income and capital growth by tracking the performance of the Benchmark. The Sub-Fund's portfolio is aligned with the carbon emission performance of the Benchmark, which in turn is aligned with the EU PAB Emission Reduction Requirements. Fidelity have a Quarterly Sustainability Review for all our Article 9 funds, to monitor principal adverse impacts. Fidelity have actively engaged with issuers.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

The Benchmark has been designated as a reference benchmark to meet the sustainable investment objective.

How did the reference benchmark differ from a broad market index?

The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's sustainable investment objective was aligned with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio (i.e., by adhering to the EU PAB Emission Reduction Requirements) and to achieve income and capital growth. As also described above, the Benchmark was labelled as an EU Paris Aligned Benchmark, which means it also adhered to the EU PAB Emission Reduction Requirements. As such, the Benchmark was consistent with the sub-fund's investment objective.

How did this financial product perform compared with the reference benchmark?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark.

How did this financial product perform compared with the broad market index?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark. The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Product name: Fidelity Sustainable EUR Corporate Bond Paris-Aligned Multifactor UCITS ETF

•	×	ΙY	es	•		No	
×			sustainable investments with conmental objective: 99.12%		char obje	comoted Environmental/Social (E/S) reacteristics and while it did not have as its ctive a sustainable investment, it had a cortion of% of sustainable investments	
	×	env	conomic activities that qualify as rironmentally sustainable under EU Taxonomy			with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy	
	×	qua	economic activities that do not alify as environmentally tainable under the EU Taxonomy			with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective	
			sustainable investments with a bjective:%			omoted E/S characteristics, but did not e any sustainable investments	

To what extent was the sustainable investment objective of this financial product met?

With effect from 30 July 2024, the Sub-Fund's approach towards sustainable investment objectives was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the sub-fund's precontractual disclosure. While the Sub-Fund now operates under the updated framework, there is no change in how the sub-fund approach sustainable investment objective.

The Sub-Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The sustainable investment objective of the sub-fund was to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve income and capital growth.

The reduction of carbon emission objective of the Sub-Fund was aligned with the Solactive Euro Corporate IG PAB Index (the "Benchmark"). The Benchmark tracked the performance of investment grade corporate debt securities publicly issued globally while at the same time aligning with the Paris Agreement's climate targets on greenhouse gas emission reduction (the "EU PAB Emission Reduction Requirements"). The EU PAB Emission Reduction Requirements required the Benchmark to exhibit a level of emission intensity 50% lower than an equivalent global market universe (which does not integrate alignment with the Paris Agreement) at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. As a result of complying with the EU PAB Emission Reduction Requirements and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark was labelled as an EU Paris Aligned Benchmark.

The Sub-Fund considers that investment in a constituent of the Benchmark is an investment in economic activities with an environmental objective (that do not qualify as environmentally sustainable under the EU Taxonomy) and therefore investment in a constituent of the Benchmark is a sustainable investment.

Sustainable

practices.

(EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

investment in an

contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

investment means an

economic activity that

The **EU Taxonomy** is a classification system laid down in Regulation

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Sub-Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the Sub-Fund:

- i) the percentage of the Sub-Fund invested in sustainable investments; 99.12%
- ii) the percentage of the Sub-Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 94.42%
- iii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the previous reference period, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund:

- i) the percentage of the Sub-Fund invested in sustainable investments: 99.33%
- ii) the percentage of the Sub-Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 97.5%
- iii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in controversies and activities that caused significant harm, including the exclusion of issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms (such as United Nations Global Compact (UNGC) principles) and with a significant negative impact on certain sustainable development goals ("SDGs"), including SDG 12: Responsible Consumption and Production, SDG 13: Climate Action, SDG 14: Life Below Water and SDG 15: Life on Land.

How were the indicators for adverse impacts on sustainability factors taken into account?

Quantitative data (where available) on PAI indicators was used to evaluate whether an issuer was involved in activities that caused significant harm to any environmental or social objective.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Benchmark excluded companies with verified failure to respect established norms such as the United Nations Global Compact (UNGC) principles, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, or UN Guiding Principles for Business and Human Rights.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions When investing directly in corporate issuers, the Sub-Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during

the reference period which is: 01/02/2024 -

31/01/2025

Source of data: Fidelity International, as at 31 January 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Sub-Fund invested 99.12% in sustainable investments

What was the asset allocation?

The proportion of the investments of the Sub-Fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 99.12%, which corresponds to the proportion in sustainable investments. This included 4.7% have an environmental objective (which is aligned with the EU Taxonomy), 94.42% have an environmental objective (which is not aligned with the EU Taxonomy) and 0% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

Source of data: Fidelity International, as at 31 January 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

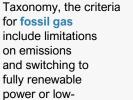

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 4.7%. This contributed to the environmental objectives of climate change mitigation and climate change adaptation.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy. The data included the

carbon fuels by the end

To comply with the EU

of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

contribution to the environmental objectives of climate change mitigation and adaptation. In a next iteration, this data will be enriched towards other EU Taxonomy environmental objectives, such as sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control and protection and restoration of biodiversity and ecosystems.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the

and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. The EU Taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.07% for transitional activities and 4.64% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 5.3% based on Turnover,6.5% based on CapEx and 7.4% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 5.3% based on Turnover,6.5% based on CapEx and 7.4% based on OpEx.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 94.42%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 0%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Sub-Fund were invested in

- (i) instruments that were previously constituents of the Benchmark which may be held for a transition period after they fall out of the Benchmark in a manner appropriate to protect the best interests of investors and will then be divested; and
- (ii) cash, investments used for hedging and efficient portfolio management purposes. In addition, all direct investments of the Sub-Fund were adhere to the Exclusions, do no significant harm to environmental or social objectives, have good governance practices and did not affect the delivery of the sustainable investment objective.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Sub-Fund attained the sustainable investment objective of alignment with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and achieved income and capital growth by tracking the performance of the Benchmark. The Sub-Fund's portfolio is aligned with the carbon emission performance of the Benchmark, which in turn is aligned with the EU PAB Emission Reduction Requirements. Fidelity have a Quarterly Sustainability Review for all our Article 9 funds, to monitor principal adverse impacts. Fidelity have actively engaged with issuers.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

The Benchmark has been designated as a reference benchmark to meet the sustainable investment objective.

How did the reference benchmark differ from a broad market index?

The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's sustainable investment objective was aligned with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio (i.e., by adhering to the EU PAB Emission Reduction Requirements) and to achieve income and capital growth. As also described above, the Benchmark was labelled as an EU Paris Aligned Benchmark, which means it also adhered to the EU PAB Emission Reduction Requirements. As such, the Benchmark was consistent with the sub-fund's investment objective.

How did this financial product perform compared with the reference benchmark?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark.

How did this financial product perform compared with the broad market index?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark. The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund was launched on 22 October 2024. The Sub-Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The sustainable investment objective of the sub-fund was to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve income and capital growth.

The reduction of carbon emission objective of the Sub-Fund was aligned with the Solactive USD Corporate HY PAB Index (the "Benchmark"). The Benchmark tracked the performance of investment grade corporate debt securities publicly issued globally while at the same time aligning with the Paris Agreement's climate targets on greenhouse gas emission reduction (the "EU PAB Emission Reduction Requirements"). The EU PAB Emission Reduction Requirements required the Benchmark to exhibit a level of emission intensity 50% lower than an equivalent global market universe (which does not integrate alignment with the Paris Agreement) at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. As a result of complying with the EU PAB Emission Reduction Requirements and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark was labelled as an EU Paris Aligned Benchmark.

The Sub-Fund considers that investment in a constituent of the Benchmark is an investment in economic activities with an environmental objective (that do not qualify as environmentally sustainable under the EU Taxonomy) and therefore investment in a constituent of the Benchmark is a sustainable investment.

The Sub-Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable

practices.

(EU) 2020/852

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the Sub-Fund:

- i) the percentage of the Sub-Fund invested in sustainable investments: 99.61%
- ii) the percentage of the Sub-Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 99.28%
- iii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

Not applicable as this is the first reporting period for the Sub-Fund.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in controversies and activities that caused significant harm, including the exclusion of issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms (such as United Nations Global Compact (UNGC) principles) and with a significant negative impact on certain sustainable development goals ("SDGs"), including SDG 12: Responsible Consumption and Production, SDG 13: Climate Action, SDG 14: Life Below Water and SDG 15: Life on Land.

How were the indicators for adverse impacts on sustainability factors taken into account?

Quantitative data (where available) on PAI indicators was used to evaluate whether an issuer was involved in activities that caused significant harm to any environmental or social objective.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Benchmark excluded companies with verified failure to respect established norms such as the United Nations Global Compact (UNGC) principles, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, or UN Guiding Principles for Business and Human Rights.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions When investing directly in corporate issuers, the Sub-Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during

the reference period which is: 22/10/2024 -

31/01/2025

Source of data: Fidelity International, as at 31 January 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Sub-Fund invested 99.61% in sustainable investments

What was the asset allocation?

The proportion of the investments of the Sub-Fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 99.61%, which corresponds to the proportion in sustainable investments. This included 0.33% have an environmental objective (which is aligned with the EU Taxonomy), 99.28% have an environmental objective (which is not aligned with the EU Taxonomy) and 0% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

Source of data: Fidelity International, as at 31 January 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU

Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of

investee companies.

economy.

\bigcirc

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

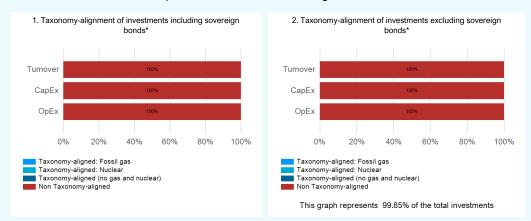

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.33%. This contributed to the environmental objectives of climate change mitigation and climate change adaptation.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy. The data included the contribution to the environmental objectives of climate change mitigation and adaptation. In a next iteration, this data will be enriched towards other EU Taxonomy environmental objectives, such as sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control and protection and restoration of biodiversity and ecosystems.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. The EU Taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the Sub-Fund.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 99.28%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 0%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Sub-Fund were invested in

- (i) instruments that were previously constituents of the Benchmark which may be held for a transition period after they fall out of the Benchmark in a manner appropriate to protect the best interests of investors and will then be divested; and
- (ii) cash, investments used for hedging and efficient portfolio management purposes. In addition, all direct investments of the Sub-Fund were adhere to the Exclusions, do no significant harm to environmental or social objectives, have good governance practices and did not affect the delivery of the sustainable investment objective.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Sub-Fund attained the sustainable investment objective of alignment with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and achieved income and capital growth by tracking the performance of the Benchmark. The Sub-Fund's portfolio is aligned with the carbon emission performance of the Benchmark, which in turn is aligned with the EU PAB Emission Reduction Requirements. Fidelity have a Quarterly Sustainability Review for all our Article 9 funds, to monitor principal adverse impacts. Fidelity have actively engaged with issuers.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

The Benchmark has been designated as a reference benchmark to meet the sustainable investment objective.

How did the reference benchmark differ from a broad market index?

The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's sustainable investment objective was aligned with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio (i.e., by adhering to the EU PAB Emission Reduction Requirements) and to achieve income and capital growth. As also described above, the Benchmark was labelled as an EU Paris Aligned Benchmark, which means it also adhered to the EU PAB Emission Reduction Requirements. As such, the Benchmark was consistent with the sub-fund's investment objective.

How did this financial product perform compared with the reference benchmark?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark.

How did this financial product perform compared with the broad market index?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark. The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

investment means an

economic activity that

The **EU Taxonomy** is a classification system laid down in Regulation

To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund was launched on 22 October 2024. The Sub-Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The sustainable investment objective of the sub-fund was to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve income and capital growth.

The reduction of carbon emission objective of the Sub-Fund was aligned with the Solactive Euro Corporate HY PAB Index (the "Benchmark"). The Benchmark tracked the performance of investment grade corporate debt securities publicly issued globally while at the same time aligning with the Paris Agreement's climate targets on greenhouse gas emission reduction (the "EU PAB Emission Reduction Requirements"). The EU PAB Emission Reduction Requirements required the Benchmark to exhibit a level of emission intensity 50% lower than an equivalent global market universe (which does not integrate alignment with the Paris Agreement) at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. As a result of complying with the EU PAB Emission Reduction Requirements and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark was labelled as an EU Paris Aligned Benchmark.

The Sub-Fund considers that investment in a constituent of the Benchmark is an investment in economic activities with an environmental objective (that do not qualify as environmentally sustainable under the EU Taxonomy) and therefore investment in a constituent of the Benchmark is a sustainable investment.

The Sub-Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

434

F Fidelity

How did the sustainability indicators perform?

For the reference period, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the Sub-Fund:

- i) the percentage of the Sub-Fund invested in sustainable investments: 99.69%
- ii) the percentage of the Sub-Fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 98.89%
- iii) the percentage of the Sub-Fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

Not applicable as this is the first reporting period for the Sub-Fund.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in controversies and activities that caused significant harm, including the exclusion of issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms (such as United Nations Global Compact (UNGC) principles) and with a significant negative impact on certain sustainable development goals ("SDGs"), including SDG 12: Responsible Consumption and Production, SDG 13: Climate Action, SDG 14: Life Below Water and SDG 15: Life on Land.

How were the indicators for adverse impacts on sustainability factors taken into account?

Quantitative data (where available) on PAI indicators was used to evaluate whether an issuer was involved in activities that caused significant harm to any environmental or social objective.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Benchmark excluded companies with verified failure to respect established norms such as the United Nations Global Compact (UNGC) principles, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, or UN Guiding Principles for Business and Human Rights.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions When investing directly in corporate issuers, the Sub-Fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 22/10/2024 -

Source of data: Fidelity International, as at 31 January 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

The Sub-Fund invested 99.69% in sustainable investments

What was the asset allocation?

The proportion of the investments of the Sub-Fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 99.69%, which corresponds to the proportion in sustainable investments. This included 0.8% have an environmental objective (which is aligned with the EU Taxonomy), 98.89% have an environmental objective (which is not aligned with the EU Taxonomy) and 0% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

Source of data: Fidelity International, as at 31 January 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.8%. This contributed to the environmental objectives of climate change mitigation and climate change adaptation.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy. The data included the contribution to the environmental objectives of climate change mitigation and adaptation. In a next iteration, this data will be enriched towards other EU Taxonomy environmental objectives, such as sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control and

Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

protection and restoration of biodiversity and ecosystems.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes☐ In fossil gas☐ In nuclear energy☑ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. The EU Taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.18% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the Sub-Fund.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 98.89%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 0%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Sub-Fund were invested in

- (i) instruments that were previously constituents of the Benchmark which may be held for a transition period after they fall out of the Benchmark in a manner appropriate to protect the best interests of investors and will then be divested; and
- (ii) cash, investments used for hedging and efficient portfolio management purposes. In addition, all direct investments of the Sub-Fund were adhere to the Exclusions, do no significant harm to environmental or social objectives, have good governance practices and did not affect the delivery of the sustainable investment objective.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Sub-Fund attained the sustainable investment objective of alignment with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and achieved income and capital growth by tracking the performance of the Benchmark. The Sub-Fund's portfolio is aligned with the carbon emission performance of the Benchmark, which in turn is aligned with the EU PAB Emission Reduction Requirements. Fidelity have a Quarterly Sustainability Review for all our Article 9 funds, to monitor principal adverse impacts. Fidelity have actively engaged with issuers.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

The Benchmark has been designated as a reference benchmark to meet the sustainable investment objective.

How did the reference benchmark differ from a broad market index?

The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's sustainable investment objective was aligned with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio (i.e., by adhering to the EU PAB Emission Reduction Requirements) and to achieve income and capital growth. As also described above, the Benchmark was labelled as an EU Paris Aligned Benchmark, which means it also adhered to the EU PAB Emission Reduction Requirements. As such, the Benchmark was consistent with the sub-fund's investment objective.

How did this financial product perform compared with the reference benchmark?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark.

How did this financial product perform compared with the broad market index?

The reduction of carbon emission objective of the sub-fund was achieved by matching the self-decarbonisation pathway of the Benchmark. The Benchmark complied with the EU PAB Emission Reduction Requirements which means that it differed from a broad market Index by exhibiting a level of emission intensity 50% lower than an equivalent global market universe at launch and subsequently aims for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. In addition, the Benchmark excluded issuers which meet any of the exclusion criteria set out in the minimum technical requirements for EU Paris-aligned benchmarks.

GENERAL INFORMATION

Fidelity UCITS II ICAV (the "Fund") was registered in Ireland pursuant to the Irish Collective Asset-management Vehicles Act 2015 on 14 November 2017 as amended under registration number C174793 and is authorised by the Central Bank of Ireland (the "Central Bank") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations").

Except where the context otherwise requires, defined terms shall bear the meaning given to them in the Prospectus of the Fund.

The Fund is organised in the form of an umbrella fund with segregated liability between sub-funds. The Prospectus provides that the Fund may offer separate sub-funds. Each sub-fund will have a distinct schedule of investments. Currently there are 28 sub-funds under the umbrella (the "ICAV II Umbrella"). Of these 28 sub-funds, 10 sub-funds have a December year end with a June interim period end and 18 sub-funds have a January year end with a July interim period end. These December year-end financial statements are prepared for the below 9 sub-funds which were launched as of the financial year end (each, a "Sub-Fund" and, collectively, the "Sub-Funds").

There is one other Sub-Fund of the ICAV II Umbrella with a December year end that has been approved by the Central Bank of Ireland (Fidelity Global Equity Fund), but it has not been launched as at the financial year end.

Sub-Fund	Launch Date
Fidelity Europe ex-UK Equity Fund	13 August 2018
Fidelity Japan Equity Fund	23 August 2018
Fidelity North America Equity Fund	28 August 2018
Fidelity UK Equity Fund	29 August 2018
Fidelity Global Aggregate Bond Fund	30 August 2018
Fidelity Global Sub-IG Fixed Income Fund	30 August 2018
Fidelity Asia Pacific ex-Japan Equity Fund	31 August 2018
Fidelity Alternative Listed Equity Fund	12 September 2018
Fidelity Global Emerging Markets Equity Fund	14 September 2018
Fidelity Global Equity Fund	Unlaunched

With the prior approval of the Central Bank, the Fund from time to time may create an additional Sub-Fund or Sub-Funds, the investment policies and objectives for which will be outlined in a Relevant Supplement, together with details of the initial offer period, the initial subscription price for each Share and such other relevant information in relation to the additional Sub-Fund or Sub-Funds as the Directors may deem appropriate, or the Central Bank requires, to be included. Each Relevant Supplement will form part of, and should be read in conjunction with, the Prospectus. In addition, the Fund may create additional Classes of Shares within a Sub-Fund to accommodate different terms, including different charges and/or fees and/or brokerage arrangements provided that the Central Bank is notified in advance, and gives prior clearance, of the creation of any such additional Class of Shares.

The most recent Prospectus of the Fund is dated 30 July 2024, the most recent Supplements for the Sub-Funds are dated 30 July 2024.

Fidelity Europe ex-UK Equity Fund

The investment objective of the Sub-Fund is to seek to achieve long-term capital growth.

The Fidelity Europe ex-UK Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in unit classes of the Fidelity Europe ex-UK Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. FIL Investments International (the "Investment Manager") is the Investment Manager of the Sub-Fund and the Master Fund.

The investment objective of the Sub-Fund is that all or substantially all of the proceeds of issue of each Class of Shares in the Sub-Fund (and in any circumstances at least 85% of the Sub-Fund's Net Asset Value) will be invested in the Master Fund. A small portion of the Sub-Fund may be retained in cash or invested in liquid instruments primarily listed or traded on the Recognised Markets for liquidity purposes and for the purposes of paying any expenses of the Sub-Fund, but such investments will not exceed 15% of the Net Asset Value of the Sub-Fund. Such instruments will include money market instruments including bank deposits, fixed or floating rate instruments (including commercial paper, notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds), cash and cash equivalents (including treasury bills) that are rated as investment grade or below or are unrated. While these liquid instruments will be primarily listed or traded on Recognised Markets, some of these instruments may be traded over-the-counter on electronic trade platforms. For the avoidance of doubt, the liquid instruments in which the Sub-Fund will invest do not include total return swaps, securities lending, repurchase agreements or reverse repurchase agreements.

Fidelity Europe ex-UK Equity Fund (continued)

The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may invest up to 15% of its Net Asset Value in liquid instruments described above. The Sub-Fund is also expected to have a similar risk profile to the Master Fund, which is not expected to have an above average risk profile or high volatility as a result of its use of financial derivative instruments.

The investment objective of the Master Fund is identical to that of the Sub-Fund, namely to seek to achieve long-term capital growth.

The Master Fund seeks to achieve its objective by obtaining exposure to a diversified portfolio, at least two thirds of which will be exposed to equities or equity-related securities of companies domiciled or exercising the predominant part of their economic activity in Europe, excluding the United Kingdom ("Europe ex-UK").

The Investment Manager (in the context of its role as investment manager of the Master Fund) has appointed a number of discretionary investment advisers as its delegates and will allocate some or all of the Master Fund's assets to such advisers. The Investment Manager is responsible for actively selecting each adviser to which assets will be allocated, for determining the amount of the Master Fund's assets to allocate to each adviser and for managing such portion of the Master Fund's assets as are not allocated to an adviser.

The Master Fund's investment strategy will pursue a policy of obtaining exposure to equities and equity-related securities of companies domiciled or exercising the majority of their economic activity in Europe ex-UK. Each adviser will select the exposures that it obtains on behalf of the Master Fund based on its experience of investing in Europe ex-UK equities, current market conditions and the investment objective of the Master Fund. The Master Fund's investment strategy will seek to obtain exposure to equities and equity-related securities that will provide long-term capital growth for the Master Fund and will not actively focus on any specific geographic region within Europe ex-UK, industry sector or market capitalisation.

The following is the active Share Class in the Sub-Fund as at 31 December 2024:

Share Class	Share Class Launch Date	Currency

Fidelity Japan Equity Fund

The investment objective of the Sub-Fund is to seek to achieve long-term capital growth.

The Fidelity Japan Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in unit classes of the Fidelity Japan Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Investment Manager is the Investment Manager of the Sub-Fund and the Master Fund.

The investment objective of the Sub-Fund is that all or substantially all of the proceeds of issue of each Class of Shares in the Sub-Fund (and in any circumstances at least 85% of the Sub-Fund's Net Asset Value) will be invested in the Master Fund. A small portion of the Sub-Fund may be retained in cash or invested in liquid instruments primarily listed or traded on the Recognised Markets for liquidity purposes and for the purposes of paying any expenses of the Sub-Fund, but such investments will not exceed 15% of the Net Asset Value of the Sub-Fund. Such instruments will include money market instruments including bank deposits, fixed or floating rate instruments (including commercial paper, notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds), cash and cash equivalents (including treasury bills) that are rated as investment grade or below or are unrated. While these liquid instruments will be primarily listed or traded on Recognised Markets, some of these instruments may be traded over-the-counter on electronic trade platforms. For the avoidance of doubt, the liquid instruments in which the Sub-Fund will invest do not include total return swaps, securities lending, repurchase agreements or reverse repurchase agreements.

The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may invest up to 15% of its Net Asset Value in liquid instruments described above. The Sub-Fund is also expected to have a similar risk profile to the Master Fund, which is not expected to have an above average risk profile or high volatility as a result of its use of financial derivative instruments.

The investment objective of the Master Fund is identical to that of the Sub-Fund, namely to seek to achieve long-term capital growth.

The Master Fund seeks to achieve its objective by obtaining exposure to a diversified portfolio, at least two thirds of which will be exposed to equities or equity-related securities of companies domiciled or exercising the predominant part of their economic activity in Japan.

Fidelity Japan Equity Fund (continued)

The Investment Manager (in the context of its role as investment manager of the Master Fund) has appointed a number of discretionary investment advisers as its delegates and will allocate some or all of the Master Fund's assets to such advisers. The Investment Manager is responsible for actively selecting each adviser to which assets will be allocated, for determining the amount of the Master Fund's assets to allocate to each adviser and for managing such portion of the Master Fund's assets as are not allocated to an adviser. The Investment Manager is the Investment Manager of the Sub-Fund and the Master Fund.

The Master Fund's investment strategy will pursue a policy of obtaining exposure to equities and equity-related securities of companies domiciled or exercising the majority of their economic activity in Japan. Each adviser will select the exposures that it obtains on behalf of the Master Fund based on its experience of investing in Japanese equities, current market conditions and the investment objective of the Master Fund. The Master Fund's investment strategy will seek to obtain exposure to equities and equity-related securities that will provide long-term capital growth for the Master Fund and will not actively focus on any specific geographic region within Japan, industry sector or market capitalisation.

Fidelity North America Equity Fund

The investment objective of the Sub-Fund is to seek to achieve long-term capital growth.

The Fidelity North America Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in unit classes of the Fidelity North America Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Investment Manager is the Investment Manager of the Sub-Fund and the Master Fund.

The investment objective of the Sub-Fund is that all or substantially all of the proceeds of issue of each Class of Shares in the Sub-Fund (and in any circumstances at least 85% of the Sub-Fund's Net Asset Value) will be invested in the Master Fund. A small portion of the Sub-Fund may be retained in cash or invested in liquid instruments primarily listed or traded on the Recognised Markets for liquidity purposes and for the purposes of paying any expenses of the Sub-Fund, but such investments will not exceed 15% of the Net Asset Value of the Sub-Fund. Such instruments will include money market instruments including bank deposits, fixed or floating rate instruments (including commercial paper, notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds), cash and cash equivalents (including treasury bills) that are rated as investment grade or below or are unrated. While these liquid instruments will be primarily listed or traded on Recognised Markets, some of these instruments may be traded over-the-counter on electronic trade platforms. For the avoidance of doubt, the liquid instruments in which the Sub-Fund will invest do not include total return swaps, securities lending, repurchase agreements or reverse repurchase agreements.

The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may invest up to 15% of its Net Asset Value in liquid instruments described above. The Sub-Fund is also expected to have a similar risk profile to the Master Fund, which is not expected to have an above average risk profile or high volatility as a result of its use of financial derivative instruments.

The investment objective of the Master Fund is identical to that of the Sub-Fund, namely to seek to achieve long-term capital growth.

The Master Fund seeks to achieve its objective by obtaining exposure to a diversified portfolio, at least two thirds of which will be exposed to equities or equity-related securities of companies domiciled or exercising the predominant part of their economic activity in the United States, Canada or Mexico ("North America").

The Investment Manager (in the context of its role as investment manager of the Master Fund) has appointed a number of discretionary investment advisers as its delegates and will allocate some or all of the Master Fund's assets to such advisers. The Investment Manager is responsible for actively selecting each adviser to which assets will be allocated, for determining the amount of the Master Fund's assets to allocate to each adviser and for managing such portion of the Master Fund's assets as are not allocated to an adviser.

Fidelity North America Equity Fund (continued)

The Master Fund's investment strategy will pursue a policy of obtaining exposure to equities and equity-related securities of companies domiciled or exercising the majority of their economic activity in North America. Each adviser will select the exposures that it obtains on behalf of the Master Fund based on its experience of investing in North American equities, current market conditions and the investment objective of the Master Fund. The Master Fund's investment strategy will seek to obtain exposure to equities and equity-related securities that will provide long-term capital growth for the Master Fund and will not actively focus on any specific geographic region within North America, industry sector or market capitalisation.

The following is the active Share Class in the Sub-Fund as at 31 December 2024:

Share Class	Share Class Launch Date	Currency

Fidelity UK Equity Fund

The investment objective of the Sub-Fund is to seek to achieve long-term capital growth.

The Fidelity UK Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in unit classes of the Fidelity UK Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Investment Manager of the Master Fund is the same as the Investment Manager of the Sub-Fund. The Investment Manager is the Investment Manager of the Sub-Fund and the Master Fund.

The investment objective of the Sub-Fund is that all or substantially all of the proceeds of issue of each Class of Shares in the Sub-Fund (and in any circumstances at least 85% of the Sub-Fund's Net Asset Value) will be invested in the Master Fund. A small portion of the Sub-Fund may be retained in cash or invested in liquid instruments primarily listed or traded on the Recognised Markets for liquidity purposes and for the purposes of paying any expenses of the Sub-Fund, but such investments will not exceed 15% of the Net Asset Value of the Sub-Fund. Such instruments will include money market instruments including bank deposits, fixed or floating rate instruments (including commercial paper, notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds), cash and cash equivalents (including treasury bills) that are rated as investment grade or below or are unrated. While these liquid instruments will be primarily listed or traded on Recognised Markets, some of these instruments may be traded over-the-counter on electronic trade platforms. For the avoidance of doubt, the liquid instruments in which the Sub-Fund will invest do not include total return swaps, securities lending, repurchase agreements or reverse repurchase agreements.

The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may invest up to 15% of its Net Asset Value in liquid instruments described above. The Sub-Fund is also expected to have a similar risk profile to the Master Fund, which is not expected to have an above average risk profile or high volatility as a result of its use of financial derivative instruments.

The investment objective of the Master Fund is identical to that of the Sub-Fund, namely to seek to achieve long-term capital growth.

The Master Fund seeks to achieve its objective by obtaining exposure to a diversified portfolio, at least two thirds of which will be exposed to equities or equity-related securities of companies domiciled or exercising the predominant part of their economic activity in the United Kingdom (the "UK").

The Investment Manager (in the context of its role as investment manager of the Master Fund) has appointed a number of discretionary investment advisers as its delegates and will allocate some or all of the Master Fund's assets to such advisers. The Investment Manager is responsible for actively selecting each adviser to which assets will be allocated, for determining the amount of the Master Fund's assets to allocate to each adviser and for managing such portion of the Master Fund's assets as are not allocated to an adviser.

The Master Fund's investment strategy will pursue a policy of obtaining exposure to equities and equity-related securities of companies domiciled or exercising the majority of their economic activity in the UK. Each adviser will select the exposures that it obtains on behalf of the Master Fund based on its experience of investing in UK equities, current market conditions and the investment objective of the Master Fund. The Master Fund's investment strategy will seek to obtain exposure to equities and equity-related securities that will provide long-term capital growth for the Master Fund and will not actively focus on any specific geographic region within the UK, industry sector or market capitalisation.

Fidelity Global Aggregate Bond Fund

The investment objective of the Sub-Fund is to seek to achieve long-term capital growth and income.

The Fidelity Global Aggregate Bond Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in unit classes of the Fidelity Global Aggregate Bond Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Investment Manager is the Investment Manager of the Sub-Fund and the Master Fund.

The investment objective of the Sub-Fund is that all or substantially all of the proceeds of issue of each Class of Shares in the Sub-Fund (and in any circumstances at least 85% of the Sub-Fund's Net Asset Value) will be invested in the Master Fund. A small portion of the Sub-Fund may be retained in cash or invested in liquid instruments primarily listed or traded on the Recognised Markets for liquidity purposes and for the purposes of paying any expenses of the Sub-Fund, but such investments will not exceed 15% of the Net Asset Value of the Sub-Fund. Such instruments will include money market instruments including bank deposits, fixed or floating rate instruments (including commercial paper, notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds), cash and cash equivalents (including treasury bills) that are rated as investment grade or below or are unrated. While these liquid instruments will be primarily listed or traded on Recognised Markets, some of these instruments may be traded over-the-counter on electronic trade platforms. For the avoidance of doubt, the liquid instruments in which the Sub-Fund will invest do not include total return swaps, securities lending, repurchase agreements or reverse repurchase agreements.

The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may invest up to 15% of its Net Asset Value in liquid instruments described above. The Sub-Fund is also expected to have a similar risk profile to the Master Fund, which is not expected to have an above average risk profile or high volatility as a result of its use of financial derivative instruments.

The investment objective of the Master Fund is identical to that of the Sub-Fund, namely to seek to achieve long-term capital growth and income.

The Master Fund seeks to achieve its objective by obtaining exposure to a diversified portfolio of fixed income securities, as described further below.

The Investment Manager (in the context of its role as investment manager of the Master Fund) has appointed a number of discretionary investment advisers as its delegates and will allocate some or all of the Master Fund's assets to such advisers. The Investment Manager is responsible for actively selecting each adviser to which assets will be allocated, for determining the amount of the Master Fund's assets to allocate to each adviser and for managing such portion of the Master Fund's assets as are not allocated to an adviser.

The Master Fund's investment strategy will pursue a policy of obtaining exposure to investment grade fixed, floating and adjustable rate, government and corporate debt securities issued by issuers located anywhere in the world (including emerging market countries) and each adviser will select the exposures that it obtains on behalf of the Master Fund based on its experience of investing in debt securities, current market conditions and the investment objective of the Master Fund. The Master Fund's investment strategy will seek to select debt securities that will provide long-term capital growth for the Master Fund and will not actively focus on any specific geographic region, industry sector or issuer capitalisation.

Fidelity Global Emerging Markets Equity Fund

The investment objective of the Sub-Fund is to seek to achieve long-term capital growth.

The Fidelity Global Emerging Markets Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in unit classes of the Fidelity Global Emerging Markets Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Investment Manager is the Investment Manager of the Sub-Fund and the Master Fund.

The investment objective of the Sub-Fund is that all or substantially all of the proceeds of issue of each Class of Shares in the Sub-Fund (and in any circumstances at least 85% of the Sub-Fund's Net Asset Value) will be invested in the Master Fund. A small portion of the Sub-Fund may be retained in cash or invested in liquid instruments primarily listed or traded on the Recognised Markets for liquidity purposes and for the purposes of paying any expenses of the Sub-Fund, but such investments will not exceed 15% of the Net Asset Value of the Sub-Fund. Such instruments will include money market instruments including bank deposits, fixed or floating rate instruments (including commercial paper, notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds), cash and cash equivalents (including treasury bills) that are rated as investment grade or below or are unrated.

While these liquid instruments will be primarily listed or traded on Recognised Markets, some of these instruments may be traded over-the-counter on electronic trade platforms. For the avoidance of doubt, the liquid instruments in which the Sub-Fund will invest do not include total return swaps, securities lending, repurchase agreements or reverse repurchase agreements.

The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may invest up to 15% of its Net Asset Value in liquid instruments described above. The Sub-Fund is also expected to have a similar risk profile to the Master Fund, which is not expected to have an above average risk profile or high volatility as a result of its use of financial derivative instruments.

Fidelity Global Emerging Markets Equity Fund (continued)

The investment objective of the Master Fund is identical to that of the Sub-Fund, namely to seek to achieve long-term capital growth.

The Master Fund seeks to achieve its objective by obtaining exposure to a diversified portfolio, at least two thirds of which will be exposed to equities or equity-related securities of companies domiciled or exercising the predominant part of their economic activity in emerging market countries (i.e. any country other than one which the World Bank defines as a High Income OECD member country).

The Investment Manager (in the context of its role as investment manager of the Master Fund) has appointed a number of discretionary investment advisers as its delegates and will allocate some or all of the Master Fund's assets to such advisers. The Investment Manager is responsible for actively selecting each adviser to which assets will be allocated, for determining the amount of the Master Fund's assets to allocate to each adviser and for managing such portion of the Master Fund's assets as are not allocated to an adviser.

The Master Fund's investment strategy will pursue a policy of obtaining exposure to equities and equity-related securities of companies domiciled or exercising the majority of their economic activity in emerging market countries. Each adviser will select the exposures that it obtains on behalf of the Master Fund based on its experience of investing in emerging market equities, current market conditions and the investment objective of the Master Fund. The Master Fund's investment strategy will seek to obtain exposure to equities and equity-related securities that will provide long-term capital growth for the Master Fund and will not actively focus on any emerging market country, industry sector or market capitalisation.

The following is the active Share Class in the Sub-Fund as at 31 December 2024:

Share Class	Share Class Launch Date	Currency
G Acc EUR	14 September 2018	EUR

INVESTMENT MANAGER'S REPORT

Fidelity Europe ex-UK Equity Fund

Fidelity Europe ex-UK Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in the units of the Class G Acc EUR of the Fidelity Europe ex-UK Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may only be investing 85% of its assets into the Master Fund. The Investment Manager of the Master Fund is the same as the Investment Manager of the Sub-Fund. The following Investment Manager's report is that of the Master Fund.

Market Commentary:

European equities have delivered returns of over 8% in 2024 despite declining Purchasing Managers' Indices (PMIs), political uncertainties in France and Germany, Trump's re-election in the US, and ongoing geopolitical tensions between Ukraine and Russia. However, this is significantly behind the outcome achieved by global and US markets. Europe's manufacturing PMI has been below the expansionary threshold of 50 for over two years and services PMIs have been slowing down, owing to data from Germany and France. While there are some positives such as a relatively resilient consumer and a stable jobs market, and the European Central Bank's (ECB) easing stance on inflation, the weak economic picture has meant that the debate continues around the pace and scale of the ECB's monetary easing. As anticipated, the ECB reduced its three key lending rates by 25 basis points (bps) in June, marking the bank's first interest rate cut since 2019, followed by three more interest rate cuts over the year. Early optimism around the outcome of the US presidential election eroded as investors shifted their focus towards the potential impact of trade tariffs on the eurozone's growth. Sentiment was also impacted by political instability in France and Germany. In France, Prime Minister Michel Barnier's minority government collapsed following a no-confidence vote and subsequently, President Emmanuel Macron nominated Francois Bayrou to be the new prime minister, reducing concerns of a government shutdown. In Germany, Chancellor Olaf Scholz lost a no confidence vote, paving the way for an early election in February 2025.

Portfolio Commentary:

The Master Fund returned 7.53% (Net) over the period, while the MSCI Europe ex-UK returned 6.83%. At the master level, two of the three sub-investment advisers posted positive performance. The significant exposure to a sub-investment adviser that follows a low volatility strategy was the leading contributor to returns, driven by positions in the industrials and financials sectors. A sub-investment adviser that invests on the basis of a quality-growth model also enhanced gains. Its underlying holdings in industrials, financials and information technology companies proved rewarding, while the position in the consumer staples sector held back some gains.

At the master level, underlying holdings in the financials and industrials sectors were among the leading contributors to returns, while consumer discretionary sector held back gains. At the country level, the exposure to Germany and Italy supported overall performance. Meanwhile, at the security level, SAP SE and Unicredit SPA were among the notable contributors.

Outlook:

The resounding victory for the Republicans in November's US election has shifted the economic landscape for 2025. In Europe, Fidelity's macro team expects a cyclical upswing in 2025, as falling inflation and lower interest rates help to resurrect capital expenditure from corporates and consumer confidence. Stronger real disposable income and easier financing conditions should facilitate the release of elevated excess savings to spur consumption growth. On monetary policy, the team expects the ECB to cut rates quickly to reach 2%, followed by a gradual easing to 1.5% by the end of 2025. On the flipside, we are mindful that Europe will have to navigate a shift in the US trade and industrial policy, that is likely to weaken its growth prospects and put downward pressure on domestic inflation as external demand slows. Potential tariffs from the US pose a downside risk, particularly for the automotive sector, and the resulting trade uncertainty could reduce growth by up to half a percentage point. Recent profit warnings by European industrial and automobile companies, as well as lacklustre sales by consumer discretionary names, raise doubts over the strength of the Chinese demand. Germany in particular is likely to face the impact of these headwinds given additional uncertainty due to the snap elections in February. While there are reasons to predict that European GDP growth is likely to lag that of the US, as a stock market the MSCI Europe Index has very diversified revenue exposure. There are many European companies that present attractive opportunities for investors. The manufacturing recession in Europe is already one of the longest in decades and we are probably closer to the end, which could make Europe more attractive in the near future.

Fidelity Japan Equity Fund

Fidelity Japan Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in the units of the Class G Acc EUR of the Fidelity Japan Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may only be investing 85% of its assets into the Master Fund. The Investment Manager of the Master Fund is the same as the Investment Manager of the Sub-Fund. The following Investment Manager's report is that of the Master Fund.

Market Commentary:

The Japanese equity market rose during the period. The market was driven primarily by central bank policy expectations, centred on the Bank of Japan (BoJ) and the US Federal Reserve (Fed) and accompanying yen weakness. Meanwhile, upbeat earnings results, including from index heavyweights, accompanied by share buyback announcements, also served to galvanise market sentiment.

However, the second half of the year saw periods of profit taking and a strengthening yen which weighed on overall market returns. In macroeconomic news, the BoJ decided to end its negative interest rate policy and eliminate yield curve controls in March 2024. This marked the central bank's first move to tighten the monetary policy in Japan in nearly two decades. In July, the BoJ raised interest rates again, while announcing a halving of its monthly bond buying. The BoJ increased the key rate target to 0.25% from near zero, and also unveiled a quantitative tightening plan that would roughly halve monthly bond buying to ¥3 trillion (\$19.6 billion), from the current ¥6 trillion yen, as of early 2026. In terms of currency movements, the yen fell to ¥161 against the US dollar, the lowest level since 1986, due to a combination of speculative flows and receding expectations for US rate cuts but strengthened later in the period as investors positioned for a further narrowing of the interest-rate gap between the US and Japan following unexpectedly large Fed rate cuts in September 2024. Meanwhile, Japan's Prime Minister Fumio Kishida announced that he would step down as leader of the ruling Liberal Democratic Party. Former defence minister Shigeru Ishiba unexpectedly won the leadership election and, despite initial speculation to the contrary, appeared set to maintain the key policies of the Kishida administration, namely overcoming deflation and raising wages. All sectors ended the 12-month period with positive returns, financials, energy and industrials leading the way.

Portfolio Commentary:

The Master Fund returned 18.38% (Net) over the period, while the TOPIX returned 20.02%. At the master level, all assets were moved into a newly added sub-investment adviser, Acadian. The transitioned happened during March-April 2024. Hence, a performance number for the newly added sub adviser is not available for the total period.

At the master level, underlying holdings in the industrials and financials sectors were the leading contributors to performance, followed by communication services and consumer discretionary sector. At the security level, the exposure to Recruit Holdings Co. and Hitachi Itd. led gains in absolute terms.

Outlook:

The transition to a mild inflation environment and the normalisation of monetary policy in Japan are positive for both the domestic economy and the stock market. Japanese companies are raising prices across the board and the latest wage negotiations are delivering higher levels of income growth, which will provide reassurance on the consumer side. Meanwhile, Tokyo Stock Exchange-led governance reforms are gaining momentum, and we are seeing progress in the rationalisation of cross shareholdings. While signs of further weakness in China's economic recovery and the risk of a US recession represent potential headwinds, the accumulation of positive factors support a robust mid-to-long-term outlook for the Japanese market.

Fidelity North America Equity Fund

Fidelity North America Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in the units of the Class G Acc EUR of the Fidelity North America Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may only be investing 85% of its assets into the Master Fund. The Investment Manager of the Master Fund is the same as the Investment Manager of the Sub-Fund. The following Investment Manager's report is that of the Master Fund.

Market Commentary:

US equities advanced during the year with the S&P 500 Index gaining roughly 25%. Companies that had strong ties to artificial intelligence or considered perceived beneficiaries of a Trump administration performed strongly. Markets were supported by resilient economic data, robust corporate earnings and easing monetary policy by major central banks. US equities saw another consecutive year of impressive returns as inflation cooled and consumer spending remained strong, while the job market proved to be resilient. However, US equities did witness a period of significant volatility during the summer as surprisingly weak economic data combined with the Bank of Japan's rate hike led to a sharp sell-off in markets. Nevertheless, markets quickly recovered as economic data picked up and the US exceptionalism narrative prevailed. The US elections were in focus this year with Donald Trump winning the presidential race in November and the Republican party securing control of both houses of congress. Against this backdrop, stocks rose meaningfully on the prospects for expansionary fiscal policy and a constructive environment for deregulation, supporting corporates. Strong GDP growth, low unemployment, increased consumer spending, and falling inflation removed any recession fears lingering from the prior year's rate hiking cycle. Corporate profits accompanied the rising economic tide with S&P 500 earnings expected to grow 9.4% in CY 2024 and 14.8% in CY 2025, according to FactSet. While inflation has yet to reach the Federal Reserve's 2% target, its declining trend provided the Federal Open Market Committee (FOMC) enough confidence for three rate cuts totalling 100 bps over 2024. At its last FOMC meeting in December, the Fed pivoted towards a more hawkish direction where Chair Powell emphasised a greater balance between inflation and unemployment. Equities responded accordingly by declining in December. Against this backdrop, all sectors except materials were positive over the year with communication services, information technology and financials leading the gains. Growth stocks outpaced their value counterparts as the incoming Republican administration's perceived less friendly stance towards the pharmaceuticals and biotech industries dampened sentiment around the healthcare sector, weighing on the value segment. At a market-cap level, all segments recorded positive returns with the large-cap stocks outperforming mid and small-caps.

Portfolio Commentary:

The Master Fund returned 16.50% (net of fees) over the period, while the S&P 500 returned 24.50%. At the master level, all the sub-investment advisers generated positive absolute performance. The significant exposure to a sub-investment adviser that follows a quality growth style was the leading contributor to absolute returns, driven by its exposure to the information technology (IT) sector. However, the strategy's underweight allocation to the communication services and consumer discretionary names detracted in relative terms. Furthermore, the allocation to a sub investment adviser that has a defensive orientation also had a positive impact on absolute performance, led by allocation in IT and financial companies. Conversely, weak security selection, particularly within the consumer discretionary and communication services companies weighed on relative performance.

At the master level, underlying positions in the IT, financials and consumer discretionary sectors were the key contributors to absolute performance. However, an underweight allocation to information technology and communication services sectors held back gains in relative terms. At the security level, the allocation to NVIDIA Corp and Amazon.com inc contributed the most to absolute performance.

Outlook:

The US economy continues to remain resilient but is experiencing a moderation in growth from recent years. However, the backdrop for equities is positive with inflation making meaningful progress towards its target and measures to reduce interest rates in position. However, the Fed's recent shift towards a slower pace of rate cuts may introduce some volatility in the markets. The change in administration and corresponding policy implications could provide the catalyst for certain industries and companies to thrive. The Republican Party's bias towards lower regulations and taxes could support certain US financial and energy companies. While there are signs of fragility in the lower- and middle-income groups, in aggregate, consumer balance sheets remain healthy. Looking ahead, we are paying close attention to the unemployment rate, the impact of interest rate cuts and savings rate. These factors can have a meaningful impact on consumer activity. However, instead of fixating on the macroeconomic picture, we continue to focus on bottom-up stock selection, backed by detailed fundamental research on companies that we believe are best able to add value to client portfolios.

Fidelity UK Equity Fund

Fidelity UK Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in the units of the Class G Acc EUR of the Fidelity UK Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may only be investing 85% of its assets into the Master Fund. The Investment Manager of the Master Fund is the same as the Investment Manager of the Sub-Fund. The following Investment Manager's report is that of the Master Fund.

Market Commentary:

UK equities continued to advance in 2024, overcoming spells of volatility while remaining sensitive to inflation and interest rate dynamics. The year started on a strong note as positive economic data surprises increased conviction in the soft-landing narrative and central banks signalled that interest rates were approaching their peak, driving the FTSE All-Share to record highs by March. This trajectory briefly faltered in April when strong US data prompted investors to temper rate cut expectations due to concerns about an overheating US economy, though sentiment recovered by May. In the UK, inflation ultimately moved closer to the Bank of England (BoE)'s 2% target, though persistently high services inflation kept rate cut expectations lower compared to the beginning of the year. In a notable shift, the BoE reduced its policy rate by 25 bps to 5.0% in July, the first rate cut in over four years. However, market confidence was subsequently tested by concerns over a potential recession in the US and the unwinding of yen carry trades following the Bank of Japan's unexpected interest rate hike. Domestic challenges including slowing economic activity also added to the uncertainty. Yet these market jitters proved short-lived, and markets found support in the accommodative messaging from central banks and fresh stimulus measures in China. Political developments were also back in focus with the conclusion of the UK elections in July, which resulted in a widely anticipated Labour majority, though this had little immediate impact on the market. October's budget announcement, while having a limited direct effect on equities, put pressure on the UK government bond (Gilts) market as the government announced plans for additional borrowing. Meanwhile, the BoE continued its monetary easing with a further 25 bps reduction in November but held rates steady at its December meeting. The year concluded with markets reacting to Donald Trump's victory in the US presidential election, with UK markets responding favourably to both the decisive election victory and the Republicans getting a majority in Congress.

Portfolio Commentary:

The Master Fund returned 10.23% (Net) over the period, while the FTSE All-share returned 9.47%. At the master level, all the sub-investment advisers generated positive performance. The significant exposure to a sub-investment adviser that follows an all-cap value strategy was the primary contributor to returns. The strategy's gains were primarily driven by positions in the financials and industrials sectors. Elsewhere, the exposure to a sub-investment adviser that has an equity income orientation also added value, supported by positions in the consumer staples and financials sectors.

At the master level, underlying holdings in the financials, industrials and consumer staples sectors were the key contributors to returns. However, the allocations to materials and consumer discretionary companies marginally weighed on performance. At the security level, the position in Natwest Group and Barclays plc were among the leading contributors.

Outlook:

There is optimism that the UK can continue on its path toward lower inflation. Sticky service prices and wage inflation are expected to eventually respond to looser labour market conditions, with job vacancies now significantly lower than their peak in 2022. High immigration since then has boosted labour supply, further supporting this adjustment. While the budget presents a clear challenge, it is viewed as a minor obstacle rather than a significant deviation from the economy's disinflationary trajectory. Furthermore, the UK equity market is seen as cheap and overlooked across various sentiment and valuation indicators. Some of the UK's positive attributes appear to be undervalued due to a narrow focus on the budget. Unlike much of Europe, the UK benefits from a stable and relatively pragmatic government for the next five years, whereas many neighbouring countries face elections where previously fringe parties could gain prominence, creating economic uncertainty. UK companies have a well-established tradition of prioritising shareholder interests. When valuations become excessively low, there are few state or family holdings to block M&A activity from unlocking value - a notable contrast to equally cheap emerging market stock markets.

Fidelity Global Aggregate Bond Fund

Fidelity Global Aggregate Bond Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in the units of the Class G Acc EUR Hedged of the Fidelity Global Aggregate Bond Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may only be investing 85% of its assets into the Master Fund. The Investment Manager of the Master Fund is the same as the Investment Manager of the Sub-Fund. The following Investment Manager's report is that of the Master Fund.

Market Commentary:

Global bond markets experienced a period of volatility but ultimately delivered positive returns over the review period, with corporate bonds outperforming sovereign bonds. Initially, sentiment came under pressure due to sticky core inflation and investors adjusting their expectations regarding potential interest rate cuts by major central banks. This led to a selloff in government bonds across developed markets. Nevertheless, markets began to rebound in May and continued this momentum towards the end of September. US Treasury yields fell from their year-to-date highs after the Federal Reserve (Fed) Chairman Jerome Powell hinted that further rate hikes were unlikely. Favourable labour market conditions and positive inflation data in the US further strengthened market sentiment. Additionally, during an annual symposium in August, Powell indicated that the Fed would begin to reduce interest rates, signalling a growing confidence in inflation returning to the Fed's target of 2%. However, a pickup in economic data, especially payroll and unemployment figures in late September, led the markets to recalibrate their expectations for interest rates, causing US Treasury yields to rise to their highest levels since late July. US elections and a growing focus on fiscal policy risk as well as the UK government's announcement of additional borrowing in its budget also contributed to market volatility. On the monetary policy front, the US Fed initiated its easing cycle with a 50-bps interest rate cut at its September meeting, while indicating a gradual pace of future rate cuts. Afterwards, the Fed implemented another two rate cuts during the November and December meetings, although indicating a slower pace of cuts in 2025. Additionally, five central banks within the 'Group of 10' currency bloc (the Swiss National Bank, Riksbank, Bank of Canada, European Central Bank (ECB), and the BoE lowered interest rates during the period. Conversely, the Bank of Japan raised its policy rate to 0.25% at its July meeting, leading to a significant spike in volatility. In the corporate credit space, investment grade credit spreads narrowed, supported by a stable corporate earnings outlook and balanced technical factors.

Portfolio Commentary:

The Master Fund returned 1.48% (Net) over the period, while the Bloomberg Barclays Global Aggregate Bond index returned 3.04%. At the master level, both sub-investment advisers generated positive absolute performance. The exposure to a sub-investment adviser that follows a global aggregate strategy proved to be the leading contributor to absolute performance. Gains were driven by holdings in mortgage-backed securities. At a country level, the exposure to the US drove the majority of the gains. Elsewhere, the allocation to a sub-investment adviser that invests primarily in government bonds had a marginally positive impact on performance. Exposure to securities in the US supported performance, while holdings in Mexico and Columbia weighed on returns.

At the master level, holdings in mortgage-backed securities contributed to absolute performance, while exposure to government bonds held back gains. In terms of ratings, AA rated bonds added value. Conversely, exposure to BBB rated securities proved unrewarding.

Outlook:

All through this year, discourse has focused on when the Fed would begin to cut rates and what the size and speed of the cuts would be. Now that they have cute rates by 50 bps to 5%, markets are continuing to focus on the next actions from the Fed. We believe that a dominant theme for fixed income markets in 2025 will be where US interest rates find themselves at the end of this rate cycle. Investors' estimates of where the terminal rate will trough has proven volatile so far. Post the September rate cut, the market's assessment of the terminal rate went up rather than down. The logic was that by doing more to address growth risks sooner, the Fed wouldn't need to reduce rates by as much overall. Furthermore, any new tariffs are likely to push inflation higher, making a case for the terminal rate ending up above what the market is pricing, as does the expected increase in the US fiscal deficit next year. There are other factors such as US recession risks and China stimulus, which can alter the outlook for terminal rate. Outside the US, geopolitical risks are still dominant, and it is worth keeping an eye on how things develop in order to assess whether we could experience another inflation shock. In Europe, the Eurozone is seeing weaker growth and stickier inflation than was expected at the start of the year, which has impacted ECB's ability to cut rates. However, we do expect the central bank to continue on their cutting cycle in the coming months. Contrastingly for the UK, we expect a more gradual easing cycle, given the stickier wage figures and growth continuing to beat expectations.

Fidelity Global Sub-IG Fixed Income Fund

Fidelity Global Sub-IG Fixed Income Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in the units of the Class G Acc EUR Hedged of the Fidelity Global Sub-IG Fixed Income Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may only be investing 85% of its assets into the Master Fund. The Investment Manager of the Master Fund is the same as the Investment Manager of the Sub-Fund. The following Investment Manager's report is that of the Master Fund.

Market Commentary:

The year 2024 has been remarkable for risk assets, as evidenced by the rally in global high-yield markets. This asset class has demonstrated significant macro resilience amid major geopolitical events, moderating inflation, robust balance sheets, improving capital market access, and central banks transitioning to an easing cycle. For context, the Global High Yield Bond Index posted a total return of over 9.2%. Regionally, US High Yield and European High Yield also delivered returns of 8.2% and 9.4%, respectively, while Asia High Yield rallied exceptionally, achieving a total return of 16.5% in 2024. The corporate results this year have demonstrated the resilience of business models, characterised by stable profit margins, leverage ratios, and sustained free cash flows. Throughout the year, the European and Chinese real estate sectors have emerged as top performers. The favourable interest rate cycle in Europe facilitated increased momentum in refinancing and asset sales, ultimately stabilising credit profiles, while China's property sector benefited from supportive government measures. From a credit ratings perspective, the most notable outperformer was the lower-rated distressed CCC rating segment. This cohort delivered significant returns over the period as investors discounted recessionary probabilities, given strong US economic data. Whereas in Europe, this segment experienced volatility due to idiosyncratic names driven by highly leveraged issuers such as Altice and Ardagh, particularly in March and April, engaging in liability management exercises (LMEs) to address their capital structure issues amidst rising interest costs. Meanwhile, the default rate has declined indicating that the global high yield market overall exhibits solid fundamental strength. From a capital market perspective, the high yield primary market activity increased despite volatile rates and geopolitical uncertainty. According to JP Morgan research, high yield issuance totalled \$217 billion in 2024, primarily driven by refinancing activities. The majority of the issuance came from the upper and middle rating tiers in the energy sector, followed by financials. Meanwhile, retail demand for high yield bonds strongly rebounded this year against the backdrop of resilient growth, low defaults, and elevated yields.

Portfolio Commentary:

The Master Fund returned 8.72% (Net) over the period, while the 50% ICE BofA 50% JPM Blend returned 5.0%. At the master level, both the sub-investment advisers generated positive performance. The exposure to a sub-investment adviser that invests primarily in high yield bonds supported returns as its holdings in the US proved rewarding. At a sector level, the allocations to industrials, communications and consumer cyclicals aided performance. Additionally, the position in a sub-investment adviser that invests primarily in emerging market bonds also supported absolute returns. Gains were primarily driven by holdings in the Netherlands and South Africa. At a sector level, exposure to communications proved rewarding, while selected industrial names held back gains.

At the master level, underlying positions in the industrials and energy sector were the key contributors to performance. At a regional level, position in the US and Argentina contributed the most.

Outlook:

The High Yield market still offers attractive all-in yields but is constrained by tight spreads. That dynamic, along with continued supportive fundamentals and technicals, suggest carry will dominate returns in the year ahead. The US and European economies are experiencing slow-paced growth. Should growth deteriorate and inflation rise amid uncertainty surrounding Trump's policies, central banks may be compelled to implement more aggressive cuts than previously expected, resulting in lower terminal interest rates. However, this carries the risk of technical support diminishing as high-yield companies may increase their borrowing at low costs and subsequently re-leverage their capital structures. Additionally, there may be an increase in activities associated with mergers and acquisitions. In Asia, policy responses are uncertain due to concerns about Trump's heavy tariffs, especially on China. However, we anticipate minimal fundamental impact on our portfolios, due to our low exposure to trade/external sensitive entities. Overall, we foresee controlled stabilisation in China's economy, and what matters most is observing a 'whatever it takes' approach rather than focusing on a specific stimulus figure.

Fidelity Asia Pacific ex-Japan Equity Fund

Fidelity Asia Pacific ex-Japan Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in the units of the Class G Acc EUR of the Asia Pacific ex-Japan Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may only be investing 85% of its assets into the Master Fund. The Investment Manager of the Master Fund is the same as the Investment Manager of the Sub-Fund. The following Investment Manager's report is that of the Master Fund.

Market Commentary:

Asia Pacific ex Japan equities advanced over 12 months to end December 2024. The start of the US Federal Reserve's (Fed) rate-cut cycle in mid-September, along with stimulus measures in China, helped alleviate investor concerns. However, towards the end of the period, concerns over potential tariff hikes following Donald Trump's election victory in the US and foreign exchange headwinds subdued investor sentiment across the region. At a regional level, Chinese and Hong Kong equities advanced, but the latter underperformed the broader region. In the technology-focused markets, South Korean equities declined with net selling by foreign investors. In South Korea, a short-lived martial law and subsequent impeachment of the President in December, also weighed on investor sentiment. Taiwanese equities continued to be dominated the chip-making industry amid a sustained recovery in global demand and rapid advancements in artificial intelligence (AI), electric vehicles (EV), and 5G technologies. Indian equities also gained. Association of Southeast Asian Nations (ASEAN) markets reported robust performance, with Singaporean equities leading gains. At a sector level in the region, information technology (IT) sector advanced strongly.

Portfolio Commentary:

The Master Fund returned 11.13% (Net) over the period, while the MSCI AC Asia Pacific ex-Japan returned 10.15%. At the master level, all the sub-investment advisers generated positive performance. The exposure to a sub-investment adviser that follows a low volatility strategy, proved rewarding as its underlying position in financials and information technology (IT) companies drove majority of gains. Returns were further supported by allocations to the healthcare and utilities sectors. Elsewhere, the holding in a sub-investment adviser that manages a core style strategy further enhanced gains as its allocations to financials, IT and Industrials names contributed positively. Conversely, allocations to the material sector had a negative impact on performance.

At the master level, underlying holdings in the IT, financials and industrials sectors were the key drivers to performance. At the country level, the exposure to AI exposed Taiwanese equities led the performance, followed by Chinese and Indian equities. However, exposure to Korean equities proved unrewarding. At the security level, Taiwan Semiconductor Manufacturing Company and Tencent Holdings were among the key contributors to performance.

Outlook:

Asia remains an attractive market for long-term investors. The region continues to experience structural growth across individual markets where favourable demographics are well-positioned to support a growing middle class, along with penetration of products and services. This underpins opportunities across strong franchises, along with high-quality lenders with a sizeable addressable market, technology giants at the heart of global supply chains, robust consumer brands, and future leaders creating new products and services and expanding their footprint. Asian equities continue to be supported by structural growth opportunities across various markets in the region. Despite the ongoing challenges in the China-US relationship, particularly with the return of Trump as the president, the actual impact on economic activity may be less severe than projected. It is yet to be established with a high degree of certainty whether President Trump would indeed impose high tariffs as a policy or use it only as a basis for negotiating favourable trade outcomes for the US. China continues to play a pivotal role in Asia's structural growth. With the recent fiscal and monetary announcements, it continues to attract global investor attention to its domestic market's discounted valuations and in turn driving market movements. Pockets of opportunity also include the demographic dividend in India and the ASEAN, with growing demand from the middle-class and increasing penetration of products and services, especially for basic banking services. Winners are emerging from overlooked market consolidation trends happening in various market segments. Asia has also become an important part of integrated global technology supply chains owing to the region's manufacturing excellence, economies of scale and technical skill set which is difficult to replicate.

Fidelity Alternative Listed Equity Fund

Fidelity Alternative Listed Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in the units of the Class G Acc EUR Hedged of the Fidelity Alternative Listed Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may only be investing 85% of its assets into the Master Fund. The Investment Manager of the Master Fund is the same as the Investment Manager of the Sub-Fund. The following Investment Manager's report is that of the Master Fund.

Market Commentary:

Global equities advanced in sterling terms over the 12-month period due to resilient economic data and easing monetary policy in key developed markets. Equities gained during the first half of the review period, as strong economic data, upbeat corporate earnings and decelerating inflation in developed markets reinforced the view that central banks had reached the peak of their tightening cycles. Markets further moved up in the second half of the period as major central banks, including the US Federal Reserve (Fed), the European Central Bank (ECB) and the BoE, cut key interest rates. Stimulus measures unveiled in China in September and Donald Trump's win in the US presidential election in November also buoyed equities. However, gains were limited as moderating but sticky inflation led investors to reduce their expectations on the size of rate cuts. Geopolitical conflicts, worries around US trade policy under Trump and the Bank of Japan (BoJ)'s decision to increase its policy rate also kept markets volatile. At a regional level, key regional markets ended higher, with the US and Japan gaining the most. At a sector level, communication services and information technology led the gains, while materials suffered the most. Overall, returns in sterling terms were supported by its depreciation against the US dollar and undermined by its appreciation against the euro and the yen.

Portfolio Commentary:

The Master Fund returned -5.16% (Net) over the period, while the Sonia returned 5.17%. The renewable energy infrastructure and real estate sectors were the primary detractors from performance. The performance was impacted by a rise in bond yields as 10 years UK government bond (Gilt) yields rose by 100 bps in 2024, most of it in the fourth quarter of 2024. The Master Fund is sensitive to bond yields because it invests in long-dated, income-based, real assets. The renewable energy sector was also impacted by large sell offs during the period. At an underlying security level, the positions in Renewables Infrastructure and Greencoat Renewables were among the key detractors from performance. Conversely, positions in precious metals supported returns as gold saw significant price gains, particularly in September, driven by weaker US job openings data and the US Fed interest rate cut.

Outlook:

Return drivers for listed alternatives are typically different from those for traditional investments. Listed alternatives have faced headwinds for some time now amid high Gilt yields. As we are investing in long-dated real assets, any rise in yields puts pressure on the present value of expected cash flows from these holdings. However, the BoE reduced its key lending rates in 2024. The impact of falling interest rates is expected to be recognised sooner rather than later. Costs disclosure reforms are also expected to take time to have an effect and the long-term structural changes to the UK power market, will provide further support to earnings within the renewable infrastructure sector. In terms of longer-term risks, most alternative assets are fairly illiquid, especially compared to their conventional counterparts.

Fidelity Global Emerging Markets Equity Fund

Fidelity Global Emerging Markets Equity Fund is a feeder UCITS and will seek to achieve its objective by investing at least 85% of its net assets in the units of the Class G Acc EUR of the Fidelity Global Emerging Markets Equity Fund (the "Master Fund"), being a sub-fund of Fidelity Common Contractual Fund II, a common contractual fund constituted as an umbrella fund and authorised in Ireland by the Central Bank pursuant to the UCITS Regulations. The Sub-Fund is expected to have similar performance to the Master Fund but the Sub-Fund's performance may differ given that it may only be investing 85% of its assets into the Master Fund. The Investment Manager of the Master Fund is the same as the Investment Manager of the Sub-Fund. The following Investment Manager's report is that of the Master Fund.

Market Commentary:

Emerging markets (EM) rose over 2024 but underperformed developed markets (DM). The underperformance was largely centred around the fourth quarter when EMs pulled back around the US election. In 2024, markets grappled with shifting expectations for monetary policy, a busy election calendar (in both the US and EMs), and stimulus announcements in China. EM equities pulled back and lagged DMs in January as economic data indicated the Fed might keep interest rates higher for longer. EMs then rallied in February, driven in part by better-than-expected consumption trends during the Chinese Lunar New Year. This positive momentum continued into the spring, after the Fed indicated it was on course to start cutting interest rates later in the year. EMs outperformed DMs over the second quarter, with post-election rallies in South Africa and India. Although markets globally pulled back in early August on concerns about a US recession and the unwind of the yen carry trade, EMs recovered as the Fed carried out a larger than expected interest-rate cut in September. More meaningful for EMs, however, was the announcement of stimulus measures in China towards the end of the month. EMs then retreated in October as the US dollar strengthened in advance of the US election and the China market pulled back. EMs remained under pressure in November and December as the outcome of the US election and rhetoric around tariffs weighed on sentiment.

Portfolio Commentary:

The Master Fund returned 8.91% (Net) over the period, while the MSCI Emerging Markets index returned 7.50%. At the master level, all sub-investment advisers generated positive performance. The exposure to a sub-investment adviser that manages a core strategy was the leading contributor to returns. Its positioning in information technology, financials and energy companies led gains, followed by the utility sector. Elsewhere, the allocation to a sub-investment adviser that follows a low volatility investment style also proved rewarding. The strategy's underlying position in information technology and industrial names drove majority of performance.

At the master level, underlying holdings in information technology and financials were the key contributors to performance, followed by communication services names. Conversely, positions in the materials and consumer staples sectors held back gains. At the country level, the exposure to equities in Taiwan, India and China had a positive impact on absolute performance, while holdings in Brazil and Korea weighed on performance. At the security level, positions in Taiwan Semiconductor and Tencent Holdings were among the key contributors to returns.

Outlook:

We continue to see broad-based balance-sheet strength among many EM companies. The fundamental position of many EM economies remains robust, with higher current account balances and greater foreign exchange reserves than has historically been the case. During the recent rate-hiking cycle, many emerging economies were ahead of developed economies in acting decisively to raise rates and bring inflation under control, meaning a number of EM economies started cutting interest rates well ahead of the US Federal Reserve. However, US policy direction creates an uncertain backdrop for EM equities. Furthermore, China has fallen short on consumption focused fiscal spending.

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024

1. Organisation

Fidelity UCITS II ICAV (the "Fund") was registered in Ireland pursuant to the Irish Collective Asset-management Vehicles Act 2015 on 14 November 2017 as amended under registration number C174793 and is authorised by the Central Bank of Ireland (the "Central Bank") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations").

The Fund is organised in the form of an umbrella fund with segregated liability between Sub-Funds. The Prospectus provides that the Fund may offer separate Sub-Funds. Each Sub-Fund will have a distinct schedule of investments. The portfolio of assets maintained for each Sub-Fund will be invested in accordance with the investment objectives and policies applicable to such Sub-Fund. For more information please refer to the General Information section on page 2.

2. Material Accounting Policies

The principal accounting policies applied in the preparation of these financial statements are set out below.

a) Basis of Preparation

The financial statements are prepared in accordance with International Financial Reporting Standards as adopted by the European Union ('IFRS'), interpretations adopted by the International Accounting Standards Board ('IASB'), ICAV Act 2015 and certain requirements of the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) UCITS Regulations 2019 (the "Central Bank UCITS Regulations") that apply to financial reports. The financial statements have been prepared on the going concern basis and under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates as adopted by the European Union. It also requires the Directors to exercise their judgement in the process of applying each Sub-Fund's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to each Sub-Fund's financial statements as disclosed in the notes from pages 44 to 63.

The Fund is authorised by the Central Bank as a UCITS pursuant to the UCITS Regulations.

b) New standards, amendments and interpretations

New standards and amendments to existing standards

There are no standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2024 that have a material effect on the financial statements of the Sub-Funds.

New standards, amendments and interpretations effective after 1 January 2025 and have not been early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2025 and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Sub-Funds.

c) Financial assets and financial liabilities at fair value through profit or loss

Classification

(i) Assets

The Sub-Funds classify their investments based on both the Sub-Funds business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Sub-Funds are primarily focused on fair value information and use that information to assess the assets' performance and to make decisions. The Sub-Funds have not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of the Sub-Funds debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving each the Sub-Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

2. Material Accounting Policies (continued)

c) Financial assets and financial liabilities at fair value through profit or loss (continued)

Classification (continued)

(i) Assets (continued)

The contractual cash flows of the Sub-Fund's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving each Sub-Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

(ii) Liabilities

Financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective Interest rate. Financial liabilities are classified according to the substance of the contractual arrangements entered into.

(iii) Recognition, derecognition and measurement

Purchases and sales of investments are recognised on trade date, the date on which the Sub-Funds commit to purchase or sell the asset. Investments are initially recognised at fair value. Transaction costs, if any, for all financial assets and liabilities carried at fair value through profit and loss are expensed as incurred in the Statement of Comprehensive Income.

Subsequent to initial recognition, all investments continue to be classified at fair value through profit or loss, and the changes in fair value are recognised as net unrealised gain/loss on investments in the Statement of Comprehensive Income in the period in which they arise.

Investments are derecognised when the contractual rights to the cash-flows from the financial asset expire or a Sub-Fund has transferred the financial asset and the transfer qualifies for de-recognition. A financial liability is de-recognised when the obligation specified in the contract is discharged, cancelled or has expired. Realised gains and losses on sales of investments are calculated based on the average cost of the investment in local currency and are recognised in net realised gain/loss on investments in the Statement of Comprehensive Income in the period in which they arise. Realised gains and losses on investment transactions in debt instruments are calculated as the difference between sales proceeds and the historic cost of the instrument.

(iv) Fair value estimation

At the financial year end, the Investments were valued at last traded price as is consistent with the Prospectus. In circumstances where the last traded price is not within the bid-ask spread, the Investment Manager will determine the point within the bid-ask spread that is most representative of fair value. Where market quotations are not available or are unrepresentative, fair value may be determined by the Sub-Fund's using reputable pricing sources (such as pricing agencies) or indicative prices from bond/debt market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. The Sub-Fund's would exercise judgement and estimates on the quantity and quality of pricing sources used. Where no market data is available, each Sub-Fund may value positions using their own models, which are usually based on valuation methods and techniques generally recognised as standard within the industry.

Shares or units in collective investment schemes shall be valued on the basis of the latest unaudited available net asset value per shares or units as published by the collective investment scheme.

(v) Transfers between levels of the fair value hierarchy

Transfers between levels of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period.

d) Cash and Cash Equivalents

Cash and cash equivalents include cash in hand, deposits held on call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. All cash at bank balances are held with Brown Brothers Harriman, or with third party institutions approved by FIL Investment Management (Luxembourg) S.à r.l. Ireland Branch (the "Manager") on overnight deposit or directly with a sub-custodian. All deposits held on call with banks are returned to Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") the following day. Details are shown in Note 3.

2. Material Accounting Policies (continued)

e) Foreign Exchange Translation

Functional and Presentation Currency

Items included in the Sub-Funds' financial statements are measured using the currency in which Shareholder transactions take place (the "functional currency"). The functional currency and presentation currency of each Sub-Fund is Euro.

Transactions and Balances

Assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the Statement of Financial Position date. Transactions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the financial year. Proceeds from subscriptions and amounts paid for redemptions in currencies other than the functional currency are translated into the functional currency at the exchange rates prevailing at the dates of the transactions.

f) Transaction Costs

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. Transaction costs, if any, are expensed as incurred in the Statement of Comprehensive Income.

g) Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accrual basis.

h) Redeemable Participating Shares

All Redeemable Participating Shares issued by the Sub-Funds provide the Shareholders with the right to redeem for cash at the value proportionate to the Shareholder's share in the Sub-Funds' net assets on the redemption date. In accordance with IAS 32, Redeemable Participating Shares have been classified as equity.

i) Distribution Policy

The Sub-Funds have only accumulating classes, for which the Directors have determined to accumulate all net income and therefore do not intend to declare dividends.

3. Cash at Bank and Bank Overdraft

Cash at Bank amount for the Sub-Funds for the financial years end 31 December 2024 and 31 December 2023 are disclosed in the table below:

Sub-Fund	Counterparty	31 December 2024	31 December 2023
Fidelity Europe ex-UK Equity Fund		EUR	EUR
	Citi	393	-
	Sumitomo Bank	_	379

	Sumitomo Bank	_	2
Fidelity Alternative Listed Equity Fund			
	HSBC	3	_
	Sumitomo Bank	_	3

Cash and cash equivalents include cash in hand, deposits held on call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. All cash at bank balances are held with Brown Brothers Harriman, or with third party institutions approved by the Manager on overnight deposit or directly with a sub-custodian. All deposits held on call with banks are returned to the Depositary the following day.

The table below reflects the bank overdraft balances as at 31 December 2024 and 31 December 2023.

Sub-Fund	Counterparty	31 December 2024	31 December 2023
Fidelity North America Equity Fund		EUR	EUR
	Brown Brothers Harriman	411,932	5
Fidelity UK Equity Fund			
	Brown Brothers Harriman	-	3
Fidelity Global Emerging Markets Equity Fund			
	Brown Brothers Harriman	567,231	2

4. Share Capital

The Fund may issue up to 500,000,000,000,000,000 Shares of no par value. The maximum issued Share capital of the Fund shall be 500,000,000,000 Shares of no par value and the minimum issued Share capital of the Fund shall be €2 represented by two Subscriber Shares of no par value issued for €1 each. The issued share capital of the Fund shall not be less than the currency equivalent of €2 represented by two shares of no par value.

There are no variations of rights between share classes of the Sub-Funds.

4. Share Capital (continued)

The movement in the number of redeemable participating Shares for each Sub-Fund for the financial years ended 31 December 2024 and 31 December 2023 is as follows:

Fidelity Europe ex-UK Equity Fund

Shares	Class G Acc EUR
Balance at 31 December 2022	209,902
Shares Issued During the Year	418,982
Shares Redeemed During the Year	(384,437)
Balance at 31 December 2023	244,447

Balance at 31 December 2023	371,692
Shares Issued During the Year	6,977,696
Shares Redeemed During the Year	(3,289,595)
Balance at 31 December 2024	4,059,793

5. Taxation

Each Sub-Fund is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997. The Sub-Funds will not be liable to Irish tax in respect of their income and gains, other than on the occurrence of a chargeable event with respect to Irish resident shareholders.

In accordance with the reporting fund regime introduced by the United Kingdom HM Revenue and Customs, each Share Class will be viewed as a separate "offshore fund" for UK tax purposes. The reporting regime permits an offshore fund to seek advance approval from HM Revenue and Customs to be treated as a reporting fund. Once an offshore fund has been granted "reporting fund" status it will maintain that status for so long as it continues to satisfy the conditions to be a "reporting fund", which include making reports to HM Revenue and Customs and investors for each period of account, without a requirement to apply for further certification by HM Revenue and Customs.

Each Share Class in the Sub-Funds is treated as a "reporting fund". This has been approved by HM Revenue and Customs.

Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of Shares by an Irish resident Shareholder or on the ending of a "Relevant Period". A "Relevant Period" for these purposes is an eight year period beginning with the acquisition of the Shares by the Irish resident Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event does not arise in respect of:

- (i) a Shareholder who is not Irish resident and not ordinarily resident in Ireland at the time of the chargeable event provided the necessary signed statutory declarations are held by the Sub-Fund; or
- (ii) certain exempted Irish resident investors who have provided the Sub-Fund with the necessary signed statutory declaration

Capital gains, dividends, and interest received by the Sub-Funds may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Sub-Funds or their Shareholders.

6. Fees and Expenses

All of the fees and expenses payable in respect of each Sub-Fund are paid as one single fee. This is referred to as the total expense ratio or "TER". The Manager is responsible for arranging the payment from the TER of all operational expenses of the Sub-Funds, including Directors', Auditors', Legal Advisors', Administrator's, Depositary's and other service providers' fees and expenses and Class hedging costs. The Manager is entitled to an annual fee in respect of the services that it provides to the Sub-Funds. However, this fee will only be paid in circumstances where there is a residual amount left from the TER after the other operational expenses have been paid. Save where another party has agreed to reimburse the Sub-Funds, the TER includes but is not limited to fees and expenses of the Investment Manager, Depositary, Administrator, Secretary and any sub-investment advisor.

Subject to applicable law and regulation, the Manager or the Investment Manager may pay part or all of its fees to any person that invests in or provides services to the Fund or in respect of the Sub-Funds.

The TER does not include extraordinary costs, transaction costs and related expenses, including but not limited to, transaction charges, stamp duty or other taxes on the investments of the Sub-Funds, including duties and charges for portfolio re-balancing, withholding taxes, commissions and brokerage fees incurred with respect to the Sub-Funds' investments, interest on borrowings and bank charges incurred in negotiating, effecting or varying the terms of such borrowings, any commissions charged by intermediaries in relation to an investment in the Sub-Funds and such extraordinary or exceptional costs and expenses (if any) as may arise from time to time, such as material litigation in relation to the Sub-Funds or the Fund, which will be paid separately out of the assets of the relevant Sub-Fund. The TER is calculated and accrued daily from the Net Asset Value of the Sub-Funds and payable at least quarterly in arrears. The TER of each Sub-Fund is as listed in the Relevant Supplement. If the Sub-Funds' expenses exceed the TER outlined above in relation to operating the Sub-Funds, the Manager will cover any shortfall from its own assets.

6. Fees and Expenses (continued)

The table below outlines the maximum TER applicable to each Sub-Fund:

	TER
Sub-Fund	(% of Net Asset Value)
Fidelity Europe ex-UK Equity Fund	_
Class G Acc EUR	1.00
Fidelity Japan Equity Fund	
Class G Acc EUR	1.00
Fidelity North America Equity Fund	
Class G Acc EUR	1.00
Fidelity UK Equity Fund	
Class G Acc EUR	1.00
Fidelity Global Aggregate Bond Fund	
Class G Acc EUR	0.65
Fidelity Global Sub-IG Fixed Income Fund	
Class G Acc EUR	0.80
Fidelity Asia Pacific ex-Japan Equity Fund	
Class G Acc EUR	1.00
Fidelity Alternative Listed Equity Fund	
Class G Acc EUR	1.00
Fidelity Global Emerging Markets Equity Fund	
Class G Acc EUR	1.00

Directors' Fees

The aggregate emoluments of the Directors paid by the Manager out of the TER on behalf of the overall ICAV II Umbrella (including expenses) for the financial year ended 31 December 2024 was EUR20,000 which were paid to Bronwyn Wright as Independent Director.

The aggregate emoluments of the Directors paid by the Manager out of the TER on behalf of the overall ICAV II Umbrella (including expenses) for the financial year ended 31 December 2023 was EUR23,333 which were paid to Denise Kinsella (resigned 31 March 2023) and Bronwyn Wright as Independent Directors for the duration of their respective service.

Executive Directors are not paid a fee from the Fund.

Auditors' Remuneration

The statutory audit fee (including out-of-pocket expenses incurred by the auditors in connection with their work) paid by the Manager on behalf of the Fund for the financial year ended 31 December 2024 amounted to EUR41,648 (excluding VAT) and for the financial year ended 31 December 2023 amounted to EUR39,666 (excluding VAT). There were no other fees paid to the auditors other than the statutory audit fee.

7. Related Parties

In the opinion of the Directors, the list of related parties under IAS 24 "Related Party Transactions" is as follows:

- FIL Limited the ultimate holding company and indirect owner of 100% of the following subsidiary undertakings namely:
 - (i) FIL Investment Management (Luxembourg) S.à r.l. Ireland Branch Manager and Secretary.
 - (ii) FIL Distributors Distributor.
 - (iii) FIL Fondsbank GmbH.

7. Related Parties (continued)

The Manager and Secretary (i), the Distributor (ii) and FIL Fondsbank GmbH (iii) are related parties to the Fund.

The Manager as a related party to the Fund receives fees, as outlined in the Note 6. The fees incurred during the financial years ended 31 December 2024 and 31 December 2023 are disclosed in the Statement of Comprehensive Income. The amounts payable as at 31 December 2024 and 31 December 2023 are disclosed in the Statement of Financial Position.

- The Directors of the Fund and their dependents. The Directors' fees for the years ended 31 December 2024 and 31 December 2023 are disclosed in Note 6.
- Fidelity Common Contractual Fund II is a related party as the Sub-Funds invest in its respective sub-funds.
- FIL Fondsbank GmbH, as a related party to the Fund held Shares in each of the Sub-Funds.

The Shares held by it at 31 December 2024 and 31 December 2023 are disclosed in the tables below:

All related parties transactions are at arm's length.

8. Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of the of the financial asset or liability. In order to achieve its investment objective, each Sub-Fund incurs transaction costs in relation to trading activity on its portfolio. These costs may include broker commissions, settlement fees, stamp duties, and financial transaction taxes. For some financial instruments, such as debt securities, repurchase agreements, and forward foreign exchange contracts, transaction costs are embedded in the price of the instruments and are not separately identifiable. There were no transaction costs incurred during the years ended 31 December 2024 and 31 December 2023.

9. Financial Risk Management

The Sub-Funds intend to achieve their investment objective by investing all, or substantially all, of their investable assets in the Master Funds which have the same investment objectives and policies as the relevant Sub-Fund and are also managed by the Investment Manager. Accordingly, the description herein of the Sub-Funds' risks refers to those that will be pursued directly by the Master Funds.

Each Sub-Fund may be exposed to market price risk, interest rate risk, credit risk, liquidity risk or currency risk arising from the financial instruments it holds. The Sub-Funds' overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on financial performance.

The policies documented below are standard operational practices and are reviewed regularly by the Investment Manager. In certain market conditions, the Investment Manager may apply additional risk procedures to minimise potential adverse effects on the Sub-Funds' financial performance.

The Directors and the Investment Manager perform the financial risk management procedures on behalf of the Fund.

a) Global Exposure

Under the UCITS Regulations, the Manager employs a risk management process which enables it to accurately monitor and manage the global exposure of the Sub-Funds to financial derivative instruments ("FDI") (which are a subset of the financial instruments in which the Sub-Funds invest).

The Sub-Funds do not use financial derivative instruments and as such do not expect to be leveraged. The Sub-Funds' global exposure is calculated using the commitment approach and the Sub-Funds' global exposure will not exceed 100% of Net Asset Value.

The commitment approach converts the Sub-Funds' FDI positions into the equivalent positions in the underlying assets and seeks to ensure that the FDI risk is monitored in terms of any future "commitments" to which it is (or may be) obligated.

b) Market Risk

This risk comprises of three main types of risk: market price risk, currency risk and interest rate risk.

Market Price Risk

The Sub-Funds are indirectly exposed to price risk in relation to their investment in Shares of the Master Funds as prices in the future are uncertain. Shares in the Master Funds are classified on the Statement of Financial Position as financial assets at fair value through profit or loss. For Master Funds which invest in stocks, the value of those stocks may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events. Currency exchange rate movements will also cause changes in value when the currency of the investment is other than the Base Currency of the Sub-Funds holding that investment.

9. Financial Risk Management (continued)

b) Market Risk (continued)

Market Price Risk (continued)

The following sensitivity analysis assumes a change in the market price of investments while holding all other variables constant. In practice this is unlikely to occur, and changes in some of the variables may be correlated. In addition, as the sensitivity analysis uses historical data as a basis for determining future events, it does not encompass all possible scenarios, particularly those that are of an extreme nature. The Investment Manager deems the percentage used applicable for the Sub-Funds' analysis. At 31 December 2024 and 31 December 2023, had the fair value of investments increased/decreased by 5%, with all other variable held constant, the net asset attributable to shareholders for each Sub-Fund would have increased/decreased as set out in the table below:

	Effect on NAV	Effect on NAV
Sub-Fund	31 December 2024	31 December 2023
Fidelity Europe ex-UK Equity Fund	219,509	180,021
Fidelity Japan Equity Fund	125,182	143,563
Fidelity North America Equity Fund	6,823,114	1,810,544
Fidelity UK Equity Fund	59,388	177,604
Fidelity Global Aggregate Bond Fund	572,290	766,076
Fidelity Sub-IG Fixed Income Fund	878,416	748,613
Fidelity Asia Pacific ex-Japan Equity Fund	175,203	171,087
Fidelity Alternative Listed Equity Fund	317,888	308,831
Fidelity Global Emerging Markets Equity Fund	2,693,457	210,802

Currency Risk

The Sub-Funds' total return and Statement of Financial Position can be significantly affected by foreign exchange rate movements if the Sub-Funds' assets and income are denominated in currencies other than the Base Currency of the Sub-Funds and this means that currency movements may significantly affect the Sub-Funds' Net Asset Value per Share. The three principal areas of foreign currency risk are where movements in exchange rates affect the value of investments, short term timing differences or income received.

The Sub-Funds are not directly subject to currency risk as their investments are denominated in the Sub-Funds' Base Currency. However, the respective Master Funds may hold investments subject to currency risk and Sub-Funds will also indirectly be subject to this risk.

Interest Rate Risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and future cash flows.

The Sub-Funds' financial assets and liabilities are non-interest bearing as at 31 December 2024 and 31 December 2023. As a result, the Sub-Funds are not directly subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates. However, the Master Funds may hold investments subject to interest rate risk and the Sub-Funds will also indirectly be subject to this risk.

c) Credit Risk

Credit risk is the risk that a counterparty or an issuer will be unable to pay amounts in full when due. The Sub-Fund will be exposed to credit risk on parties with whom it trades and will also bear the risk of settlement default. The Manager may instruct the Depositary to settle transactions on a delivery free of payment basis where the Manager believes that this form of settlement is appropriate. Shareholders should be aware, however, that this may result in a loss to the Sub-Fund if a transaction fails to settle and the Depositary will not be liable to the Sub-Fund or the shareholders for such a loss.

A Sub-Fund is exposed to the credit risk of the counterparties (such as the Depositary) or the brokers and dealers and exchanges through which, it deals, whether it engages in exchange-traded or off-exchange transactions. Counterparty risk is a risk to both parties and should be considered when evaluating a contract. A Sub-Fund may be subject to the possibility of insolvency, bankruptcy or default of a counterparty with which the Sub-Fund trades such instruments, which could result in substantial losses to the Sub-Fund. A Sub-Fund may be subject to risk of loss of its assets held by a broker in the event of the broker's bankruptcy, the bankruptcy of any clearing broker through which the broker executes and clears transactions on behalf of the Sub-Fund, or the bankruptcy of an exchange clearing house.

9. Financial Risk Management (continued)

c) Credit Risk (continued)

As at 31 December 2024 and 31 December 2023, the institution where the Sub-Funds' cash was held and its respective short term credit ratings, as rated by Fitch, is listed below:

Institution	Short Term Credit Indicator 31 December 2024	Short Term Credit Indicator 31 December 2023	
Brown Brothers Harriman	F1+	F1+	
Citi	F1	_	
DNB Bank	F1	F1	
HSBC	F1+	_	
Royal Bank of Canada	F1+	F1+	
Sumitomo Bank	F1	F1	

All cash at bank balances at the financial year end are held with Brown Brothers Harriman in segregated accounts or swept to overnight time deposits held in pooled accounts in eligible institutions.

The Sub-Funds are not directly subject to credit risk. However, the Master Funds may hold investments subject to credit risk and the Sub-Funds will also indirectly be subject to this risk.

Expected Credit Losses

Application of the expected credit loss impairment model per IFRS 9 has resulted in no expected credit loss allowances recorded against each Sub-Fund's debtors at 31 December 2024 (31 December 2023: None) because the majority of each Sub-Fund's investments are measured at fair value through profit and loss and comprise of high credit quality investment grade holdings.

d) Liquidity Risk

In normal market conditions the assets of each Sub-Fund comprise mainly realisable investments which can be readily sold. Each Sub-Fund's main liability is the redemption of any Shares that investors wish to sell. In general, the investments, including cash, of each Sub-Fund are managed so that it can meet its liabilities. Investments held may need to be sold if insufficient cash is available to finance such redemptions. If the size of the disposals are sufficiently large, or the market is illiquid, then there is a risk that either the investments might not be sold or the price at which they are sold may adversely affect the Net Asset Value of the relevant Sub-Fund. The Investment Manager employs an appropriate liquidity risk management process, which takes into account efficient portfolio management transactions employed by the Sub-Funds, in order to ensure that the Sub-Funds are able to comply with their stated redemption obligations.

However, it is possible that in the type of circumstances described above, a Sub-Fund may not be able to realise sufficient assets to meet all redemption requests that it receives or the Fund may determine that the circumstances are such that meeting some or all of such requests is not in the best interests of the Shareholders.

As at 31 December 2024 and 31 December 2023, all liability amounts are due within three months.

There is no liquidity mis-match between the Sub-Funds and the respective Master Funds.

e) Capital Risk Management

The capital of each Sub-Fund is represented by the net assets attributable to holders of redeemable participating Shares. The amount of net assets attributable to holders of redeemable participating Shares is subject to subscriptions and redemptions at the discretion of the Shareholders as well as changes resulting from the Sub-Funds' performance. The Investment Manager's objective when managing capital is to safeguard the Sub-Funds' ability to continue as a going concern in order to provide returns for Shareholders, provide benefits to other stakeholders and maintain a strong capital base to support the development of the investment activities of the Sub-Funds.

In order to maintain the capital structure, the Investment Manager's policy is to monitor the level of subscriptions and redemptions relative to the assets it expects to be able to liquidate.

The Prospectus and Instrument of Incorporation include the ability to restrict redemptions and require certain minimum holdings and subscriptions.

9. Financial Risk Management (continued)

f) Fair Value Estimation

Each Sub-Fund has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- (i) Level 1: Investments whose values are based on quoted market prices in active markets and are therefore classified within level 1 include active listed equities, U.S. government treasury bills and certain non-U.S. sovereign obligations. Quoted prices for these instruments are not adjusted.
- (ii) Level 2: Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade corporate bonds and certain non-U.S. sovereign obligations, shares of open-end mutual funds and over the counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.
- (iii) Level 3: Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include certain corporate debt securities. As observable prices are not available for these securities, the Sub-Funds have used valuation techniques to derive the fair value.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the financial asset or liability.

The puttable value of redeemable participating Shares is calculated based on the net difference between total assets and all other liabilities of the Sub-Funds in accordance with the Prospectus. These Shares are not traded on an active market.

A demand feature is attached of those Shares, as they are redeemable at the holder's option and can be put back to the relevant Sub-Fund at any dealing for cash equal to a proportionate share of the Sub-Fund's Net Asset Value attributable to the share class. The fair value is based on the amount payable on demand, discounted from the first date that the amount could be required to be paid. The impact of discounting in this instance is not material. As such, level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable participating shares.

The determination of what constitutes 'observable' requires significant judgment by the Directors. The Directors have delegated this task to the Administrator. The Administrator considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Where unobservable inputs are used in determining the fair value of an investment, the Administrator receives instruction from the Manager of the fair value measurement to use.

As at 31 December 2024 and 31 December 2023, cash and cash equivalents are classified as Level 1. All other assets and liabilities not disclosed in the tables below are classified as Level 2.

There were no investments classified at Level 3 at the years ended 31 December 2024 and 31 December 2023.

9. Financial Risk Management (continued)

The following tables analyse within the fair value hierarchy of the Sub-Funds' financial assets and liabilities measured at fair value at 31 December 2024 and 31 December 2023:

g) Cybersecurity Risk

The Fund and its service providers (including the Investment Manager) are susceptible to cyber-attacks and technological malfunctions that may have effects that are similar to those of a cyber-attack. Cyber-attacks include, among others, stealing or corrupting data maintained online or digitally, preventing legitimate users from accessing information or services on a website, releasing confidential information without authorisation, and causing operational disruption. Successful cyber-attacks against, or security breakdowns of, the Fund, the Manager and the Investment Manager, or the Depositary, or other service provider may adversely affect the Sub-Funds or their Shareholders. For instance, cyber-attacks may interfere with the processing of Shareholder transactions, affect the ability to calculate the Net Asset Value, cause the release or misappropriation of private Shareholder information or confidential Sub-Fund information, impede trading, cause reputational damage, and subject the Fund to regulatory fines, penalties or financial losses, reimbursement or other compensation costs, and additional compliance costs. The Manager and the Investment Manager have established business continuity plans and systems designed to prevent cyber-attacks. Such plans and systems are subject to inherent limitations. Similar types of cyber security risks also are present for issuers of securities in which the Sub-Funds invest, which could result in material adverse consequences for such issuers, and may cause the Sub-Funds' investments in such securities to lose value.

h) Custody and Title Risk

The Depositary is under a duty to hold in custody all financial instruments that may be registered in a financial instruments account opened in the depositary's books and all financial instruments that can be physically delivered to the depositary. The Depositary is required to ensure that all financial instruments that can be registered in a financial instruments account opened in the depositary's books are registered in the depositary's books within segregated accounts. For other assets, the Depositary shall verify the Sub-Fund's ownership of such assets. The Depositary will maintain a record of the financial instruments entrusted to it and those assets for which it is satisfied that the Sub-Fund holds the ownership. When the Depositary employs a sub-custodian the Depositary retains responsibility for the assets of the Sub-Fund.

However, it should be noted that not all jurisdictions have the same rules and regulations as Ireland regarding the custody of assets and the recognition of the interests of a beneficial owner such as a Sub-Fund. Therefore, in such jurisdictions, there is a risk that if a sub-custodian becomes bankrupt or insolvent, the Sub-Fund's beneficial ownership of the assets held by such sub-custodian may not be recognised and consequently the creditors of the sub-custodian may seek to have recourse to the assets of the Sub-Fund. In those jurisdictions where the Sub-Fund's beneficial ownership of its assets is ultimately recognised, the Sub-Fund may suffer delay and cost in recovering those assets.

The Sub-Funds may invest in markets where custodial and/or settlement systems are not fully developed, therefore the assets of a Sub-Fund which are traded in such markets and which have been entrusted to sub-custodians, in circumstances where the use of such subcustodians is necessary, may be exposed to risk. The Depositary shall maintain an appropriate level of supervision over the subcustodian and make appropriate enquiries from time to time to confirm that the obligations of the agent continue to be competently discharged.

10. Net Gain/(Loss) on Financial Assets at Fair Value through Profit or Loss

Net Gain/(Loss) on Financial Assets at Fair Value through Profit or Loss for the financial years ended 31 December 2024 and 31 December 2023 are disclosed in the table below:

11. Soft Commission Agreements

From 3 January 2018, as a result of the Markets in Financial Instruments Directive II ("MiFID II") adopted by European Securities and Markets Authority ("ESMA"), research and advisory services are no longer paid out of commissions arising from the Sub-Funds portfolio transactions.

There were no soft commission arrangements entered into during the financial years ended 31 December 2024 and 31 December 2023.

12. Efficient Portfolio Management

The Sub-Funds may employ investment techniques and instruments for efficient portfolio management purposes only, subject to the conditions and within the limits from time to time laid down by the Central Bank. Any such technique or instrument must be one which (alone or in combination with one or more other techniques or instruments) is believed by the Advisers to be economically appropriate to the efficient portfolio management of the Sub-Fund, i.e. the use of a technique or instrument may only be undertaken for the purposes of one or more of the following:

- (a) a reduction in risk;
- (b) a reduction in costs; or
- (c) the generation of additional capital or income for the Sub-Fund with an appropriate level of risk, taking into account the risk profile of the Sub-Fund and the general provisions of the UCITS Regulations.

During the financial years ended 31 December 2024 and 31 December 2023, the Sub-Funds did not employ any investment techniques and instruments for efficient portfolio management.

13. Cross-trades

The Manager and/or the Investment Manager may enter into trades for the account of a Sub-Fund with: (i) the accounts of other clients managed by the Manager, the Investment Manager or its affiliates; or (ii) their house accounts (i.e., accounts owned by the Manager, the Investment Manager or any of its connected persons over which it can exercise control and influence) ("cross-trades"). Such cross-trades will only be undertaken in accordance with the relevant requirements promulgated by the relevant authorities. There were no cross-trades during the financial years ended 31 December 2024 and 31 December 2023.

14. Geopolitical and Macro Risks

Whilst geopolitical risk events and their impacts can never be fully predicted, the Manager continues to focus efforts on being prepared and agile to support timely and effective responses to protect investments managed or held, along with the Manager's financial and operational resiliency.

The Manager continues to monitor and assess risks as follows:

- Primary macro risks identified with the economists for 2025 are:
 - I. Trade wars leading to inflation, disruptive dollar rally, Financial Institution sell-off and loss of Federal Reserve credibility,
 - II. Deteriorating US/China relationship and increased geopolitical/sanctions risk,
 - III. Energy crisis and disruptive oil rally related to Middle East confrontation,
 - IV. Fiscal sustainability concerns.
- At the other end of the scale, micro risks (Asset Manager industry focused) continue to demand scale and specialism, e.g. client
 and market consolidation, value-chain shift to servicing the end-investor, Tech & AI 'arms race'.
- Market volatility is not expected to let up in 2025, and the risks described above are increasingly interconnected and tougher to avoid - resiliency, diversification and agility to respond continue to be the key mitigants referenced for global financial services.

The Manager's Directors are monitoring these risks closely, considering the needs and requirements of clients and stakeholders. Risk monitoring activities include the ongoing review of market volatility, fund performance, fund liquidity, capital resources, operational resilience and emerging risks that may arise.

15. Significant Events during the Financial Year

Ms. Carla Sload was appointed as a Director of the Fund, effective 9 January 2024.

Ms. Orla Buckley was appointed as a Director of the Fund, effective 6 February 2024.

Mr. David Greco resigned as a Director of the Fund, effective 27 February 2024.

There have been no other significant events affecting the Fund during the financial year.

16. Events since the Financial Year End

There have been no significant events affecting the Fund after the financial year end and up to the date of approval of the financial statements.

17. Approval of Financial Statements

The annual report and audited financial statements were approved by the Board of Directors of the Fund on 28 April 2025.

DIRECTORS' REPORT (UNAUDITED)

The Directors present, herewith their annual report and audited financial statements for Fidelity UCITS II ICAV (the "Fund") for the financial year ended 31 December 2024.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations. The Irish Collective Asset-management Vehicles Act 2015 as amended (the "ICAV Act") requires the Directors to prepare financial statements for each financial year which give a true and fair view of the Fund's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Fund for the financial year end. The Directors have elected to prepare the financial statements in accordance with applicable Irish law and International Financial Reporting Standards, as adopted by the European Union ("IFRS").

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in business.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy, at any time, the assets and liabilities and financial position of the Fund and enable them to ensure that the financial statements are prepared in accordance with IFRS and comply with the ICAV Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) ("UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). They are also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Fund's website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The Directors are required to entrust the assets of the Fund to a Depositary for safe-keeping. In carrying out this duty, the Fund has appointed Brown Brothers Harriman Trustee Services (Ireland) Limited as Depositary (the "Depositary").

Accounting Records

The Fund is obliged to keep or cause to be kept adequate accounting records as outlined in Section 110 of the ICAV Act. To achieve this, the Directors have appointed a service organisation, Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"). The Fund's accounting records are retained at the Administrator's registered office at 30 Herbert Street, Dublin 2, Ireland.

Principal Activities

The objective of the Fund is the collective investment in transferable securities and/or other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with the UCITS Regulations.

The Fund was registered in Ireland on 14 November 2017 as an Irish collective asset-management vehicle with variable capital and having segregated liability between its Sub-Funds and is structured as an umbrella collective asset-management vehicle in that the share capital of the Fund may be divided into different Share Classes with one or more Share Classes representing a separate Sub-Fund of the Fund. Each Sub-Fund may have more than one Share Class. The assets of each Sub-Fund are invested in accordance with the investment objectives applicable to such Sub-Fund.

DIRECTORS' REPORT (UNAUDITED) (CONTINUED)

Principal Activities (continued)

The Fund is organised in the form of an umbrella fund with segregated liability between sub-funds. The Prospectus provides that the Fund may offer separate sub-funds. Each sub-fund will have a distinct schedule of investments. Currently there are 28 sub-funds under the ICAV II Umbrella. Of these 28 sub-funds, 10 sub-funds have a December year end with a June interim period end and 18 sub-funds have a January year end with a July interim period end. These December year-end financial statements are prepared for the below 9 sub-funds which were launched as of the financial year end (each, a "Sub-Fund" and, collectively, the "Sub-Funds").

There is one other Sub-Fund of the ICAV II Umbrella with a December year end that has been approved by the Central Bank of Ireland (Fidelity Global Equity Fund), but it has not been launched as at the financial year end.

Name	Launch Date
Fidelity Europe ex-UK Equity Fund	13 August 2018
Fidelity Japan Equity Fund	23 August 2018
Fidelity North America Equity Fund	28 August 2018
Fidelity UK Equity Fund	29 August 2018
Fidelity Global Aggregate Bond Fund	30 August 2018
Fidelity Global Sub-IG Fixed Income Fund	30 August 2018
Fidelity Asia Pacific ex-Japan Equity Fund	31 August 2018
Fidelity Alternative Listed Equity Fund	12 September 2018
Fidelity Global Emerging Markets Equity Fund	14 September 2018
Fidelity Global Equity Fund	Unlaunched

Review of Business

The investment objectives of each individual Sub-Fund trading during the financial year ended 31 December 2024 are stated in the General Information section on page 2.

The performance of the Sub-Funds against these investment objectives for the relevant fiscal year is also detailed in the Investment Manager Reports on pages from 11 to 19.

In addition to providing the performance of each Sub-Fund these reports also provide an additional portfolio commentary and a future macroeconomic outlook relevant to each individual Sub-Fund.

Principal Developments

The development and future activity for each Sub-Fund is detailed in the Investment Manager Reports on pages from 11 to 19. The Outlook section details the current and future macroeconomic outlook. The portfolio commentary considers the strengths and weaknesses of the current portfolio during the fiscal year and what assets it may purchase in the future to strengthen the portfolio.

Results for the Financial Year and Assets, Liabilities and Financial Position at 31 December 2024

Details of the assets, liabilities and financial position of the Sub-Funds and results for the financial year ended 31 December 2024 are set out in the Statement of Financial Position, Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and the Statement of Cash Flows.

DIRECTORS' REPORT (UNAUDITED) (CONTINUED)

Directors

The names of the persons who were Directors at any time during the financial year are listed below:

Ms. Catherine Fitzsimons (Ireland) (Chairperson)

Mr. David Greco (USA) (resigned 27 February 2024)

Ms. Bronwyn Wright (Ireland)

Ms. Carla Sload (Ireland) (appointed 9 January 2024)
Ms. Orla Buckley (Ireland) (appointed 6 February 2024)

All current Directors are Non-Executive.

Ms. Bronwyn Wright is an Independent Director.

Directors' Interests

None of the Directors, the Secretary, nor their families holds or held any beneficial interests in the Fund at 31 December 2024 or during the financial year.

Transactions Involving Directors

There are no contracts or arrangements of any significance in relation to the business of the Fund in which the Directors had any interest, as defined in the ICAV Act, at any time during the financial year ended 31 December 2024 other than those disclosed in Note 7 'Related Parties' of these financial statements.

Connected Person Transactions

Connected Persons

The Manager, the Depositary, the Distributor, the Administrator, the Investment Manager and each of their respective affiliates are considered to be connected persons of the Fund for the purposes of the Central Bank UCITS Regulations.

The following table details the types of transaction entered into with counterparties that are connected persons:

Type of Transaction Counterparty

Administration Brown Brothers Harriman Fund Administration Services (Ireland) Limited

Depositary, FX and Hedging Services Brown Brothers Harriman Trustee Services (Ireland) Limited

Distributor FIL Distributors

Manager FIL Investment Management (Luxembourg) S.à r.l. Ireland Branch

Investment Manager FIL Investments International

Dealing with Connected Persons

Regulation 43 of the Central Bank UCITS Regulations "Restriction on transactions with connected persons" states that "a responsible person shall ensure that any transaction between a UCITS and connected person is:

- (i) conducted at arm's length; and
- (ii) in the best interest of the unit-holders of the UCITS".

In accordance with Regulation 81(4) of the Central Bank UCITS Regulations, the Directors of the Manager are satisfied that:

- (i) there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and
- (ii) all transactions with connected persons that were entered into during the financial year to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

DIRECTORS' REPORT (UNAUDITED) (CONTINUED)

Risk Management Objectives and Policies

The principal risks and uncertainties faced by the Fund are outlined in Note 9 'Financial Risk Management'.

Dividends and Retention

The Sub-Funds have only accumulating classes, for which the Directors have determined to accumulate all net income and therefore do not intend to declare dividends.

Future Developments

The Sub-Funds will continue to pursue their investment objectives as set out in the Relevant Supplements and outlined in these financial statements.

Independent Auditors

The Fund has reappointed Deloitte Ireland LLP, Chartered Accountants & Registered Auditors, as its Independent Auditor in accordance with the ICAV Act.

Irish Funds Corporate Governance Code for Management Companies

The Board of Directors has assessed the measures included in the voluntary Corporate Governance Code for Collective Investment Schemes and Management Companies as published by Irish Funds in December 2011 (the "IF Code"). The Board has adopted all corporate governance practices and procedures in the IF Code.

REPORT FROM DEPOSITARY TO THE SHAREHOLDERS (UNAUDITED)

We have enquired into the conduct of the Fidelity UCITS II ICAV (the "Fund") for the year ended 31 December 2024 in our capacity as Depositary to the Fund.

This report including the opinion has been prepared for and solely for the Shareholders in the Fund, in accordance with Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ("The UCITS Regulations"), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Fund in each annual accounting period and report thereon to the shareholders. Our report shall state whether, in our opinion, the Fund has been managed in that period in accordance with the provisions of the Fund's Instrument of Incorporation of the Fund and the UCITS Regulations. It is the overall responsibility of the Fund to comply with these provisions. If the Fund has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Fund has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Instrument of Incorporation of the Fund and the appropriate regulations and (ii) otherwise in accordance with the Fund constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Fund has been managed during the period, in all material respects:

A MAS

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Fund by the Instrument of Incorporation of the Fund, the UCITS Regulations and the Central Bank UCITS Regulations, and
- (ii) otherwise in accordance with the provisions of the Instrument of Incorporation of the Fund, the UCITS Regulations and the Central Bank UCITS Regulations.

Deloitte Ireland LLP Chartered Accountants & Statutory Audit Firm

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIDELITY UCITS II ICAV

Report on the audit of the annual accounts

Opinion on the annual accounts of Fidelity UCITS II ICAV (the 'ICAV')

In our opinion the annual accounts:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 December 2024 and of the result for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the applicable Regulations.

The annual accounts we have audited comprise:

- the Schedule of Investments;
- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets attributable to holders of Redeemable Participating Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 17, including material accounting policy information as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is the Irish Collective Asset-Management Acts 2015-2020 ("the ICAV Act") and IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the annual accounts" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the annual accounts in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the annual accounts, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the annual accounts is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ICAV's ability to continue as a going concern for a period of at least twelve months from when the annual accounts are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIDELITY UCITS II ICAV

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the annual accounts and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the annual accounts does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual accounts or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the annual accounts or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of annual accounts that give a true and fair view and have been properly prepared in accordance with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the directors are responsible for assessing the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the annual accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Matters on which we are required to report by the ICAV Act and the applicable Regulations

In our opinion, the information given in the directors' report is consistent with the annual accounts and the directors' report has been prepared in accordance with the ICAV Act.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration specified by the ICAV Act are not made.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIDELITY UCITS II ICAV

Opinion on other matters prescribed by the applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the annual accounts to be readily and properly audited
- The annual accounts are in agreement with the accounting records.

Use of our report

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act. Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

APPENDIX 2 - REPORT OF REMUNERATION (UNAUDITED)

Remuneration Disclosure

The Fund is managed by FIL Investment Management (Luxembourg) S.à r.l. Ireland Branch ('FIMLUX'),

FIMLUX is a UCITS licensed Management Company and wholly owned subsidiary of FIL Limited ('FIL'). The FIL Group, consisting of FIL and its subsidiaries, has approved a remuneration policy which is applicable to all constituent parts of the group. In addition, FIMLUX has its own remuneration policy which closely reflects the FIL group policy. In the implementation of its policy, FIMLUX will ensure good corporate governance and promote sound and effective risk management.

Remuneration Policy

The remuneration policy does not encourage any risk taking which would be inconsistent with the risk appetite of the Fund, or the Prospectus. FIMLUX will ensure that any decisions are consistent with the overall business strategy, objectives and the remuneration policy and try to avoid any conflicts of interest which may arise.

Fixed remuneration is defined as base salary plus other benefits. Base salaries are set competitive to local market, based on an individual's specific role and responsibilities as well as their relevant experience, qualifications, performance and overall contribution to FIL. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses and long-term incentive awards. These discretionary pay elements are determined by individual performance and overall company affordability (set taking into consideration the financial and non-financial performance and associated business and operational risks).

A summary of the Remuneration Policy is available at https://www.fidelityinternational.com.

FIMLUX will ensure that the remuneration policy is reviewed internally and independently annually. There have not been any material changes to the adopted remuneration policy since the last review performed in December 2024 and the review outcome showed no exception. The Remuneration Policy applies to all employees of FIMLUX, including individuals whose professional activities have a material impact on the risk profile of the Management Company or the UCITS Funds it manages ('UCITS Identified Staff'). The UCITS identified staff include members of the Board of the Management Company, senior management, heads of relevant control functions and heads of other key functions. Individuals are notified of their identification and the implications of this status on at least an annual basis.

Fidelity Asia Pacific ex-Japan Equity Fund	FIL Investments International
Fidelity Alternative Listed Equity Fund	FIL Investments International
Fidelity Global Emerging Markets Equity Fund	FIL Investments International

^{*} The information included for the delegates are pertaining to the Material Risk Takers identified under the delegation.

APPENDIX 3 – SECURITIES FINANCING TRANSACTIONS (UNAUDITED)

The Securities Financing Transactions ("SFTs") Regulation (the "Regulation") came into force on 12 January 2016 and introduced additional disclosure requirements around securities lending, repurchase agreement/reverse repurchase agreements, total return swaps (TRSs) and other lending/borrowing transactions in annual and semi-annual financial statements, published after 13 January 2017. The Regulation came about due to what was perceived as 'shadow banking' risk in the securities financing markets and aims to reduce this risk by improving transparency in the securities financing markets in a number of ways:

- By imposing conditions on the 'reuse' of collateral, so that clients and counterparties understand the risks involved and give their consent to the reuse,
- By requiring managers to make detailed disclosures to their investors of the use they make of SFTs both in their periodic financial statements and pre-contractual documentation; and
- By requiring counterparties to report SFTs to a trade repository so as to provide transparency to regulators on the use of SFTs by market participants.

As the Sub-Funds did not hold any SFTs as at 31 December 2024, the annual report and audited financial statements do not include any additional disclosures.

APPENDIX 4 – SHAREHOLDER'S RIGHTS DIRECTIVE II (UNAUDITED)

For the financial year ended 31 December 2024

The Shareholder's Rights Directive II ("SRD II") is EU legislation which is applicable within Irish law from 30 March 2020. Under SRD II Asset Managers are required to provide additional annual information regarding the risks and composition of the portfolio.

Key material medium to long-term risks associated with the investments

Please refer to Note 9 for a detailed analysis of the risk management policies and procedure that effect the Sub-Funds.

Portfolio composition

Refer to each Sub-Fund's Schedule of Investments from pages 20 to 28 for details of the portfolio composition by investment type and geographic location.

As at 31 December 2024, the following tables outline the Top 10 holdings by market value of each Sub-Fund.

Fidelity Europe ex-UK Equity Fund - Top 10 portfolio holdings by market value

Holding	Туре	Market Value (EUR)
Fidelity CCF II Europe ex-UK Equity Fund - Class G Acc EUR	Transferable Securities	4,390,183

Fidelity Japan Equity Fund - Top 10 portfolio holdings by market value

Portfolio Turnover Rate

SRD II does not define a methodology for calculating the Portfolio Turnover Rate ("PTR"). For the purpose of these financial statements the following formula has been applied when calculating PTR.

PTR = (purchases + sales) - (subscriptions + redemptions) / average 12-month net asset value attributable to shareholders.

For the year financial year ended 31 December 2024 the PTR of each Sub-Fund is as follows:

Fund	PTR
Fidelity Europe ex-UK Equity Fund	(0.00)%
Fidelity Japan Equity Fund	(0.00)%
Fidelity North America Equity Fund	(0.47)%
Fidelity UK Equity Fund	0.00%
Fidelity Global Aggregate Bond Fund	0.00%
Fidelity Global Sub-IG Fixed Income Fund	0.00%
Fidelity Asia Pacific ex-Japan Equity Fund	0.00%
Fidelity Alternative Listed Equity Fund	0.00%
Fidelity Global Emerging Markets Equity Fund	(1.72)%

Portfolio Turnover Cost

Portfolio Turnover Costs ("PTC") is calculated as follows:

PTC = PTR (capped at 100%) x transaction cost

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability.

For the financial year ended 31 December 2024 the PTC of each Sub-Fund is as follows:

Fund	PTC
Fidelity Europe ex-UK Equity Fund	0.00%
Fidelity Japan Equity Fund	0.00%
Fidelity North America Equity Fund	0.00%
Fidelity UK Equity Fund	0.00%
Fidelity Global Aggregate Bond Fund	0.00%
Fidelity Global Sub-IG Fixed Income Fund	0.00%
Fidelity Asia Pacific ex-Japan Equity Fund	0.00%
Fidelity Alternative Listed Equity Fund	0.00%
Fidelity Global Emerging Markets Equity Fund	0.00%

Fidelity UCITS II ICAV

APPENDIX 5 – SUSTAINABLE FINANCE DISCLOSURE REGULATION (UNAUDITED)

Per the Sustainable Finance Disclosure Regulation ('SFDR') the Sub-Funds do not meet the criteria for SFDR Article 8 or 9 Funds and are classified as SFDR Article 6 Funds meaning their investments do not take into account the EU criteria for environmentally sustainable economic activities.
